

# Contents

<b>CHAPTER 1 .....</b>	<b>11</b>
<b><i>Fundamentals of Problem Solving .....</i></b>	<b>11</b>
1.1 The Basic Model of Computation .....	12
Phase 1: Defining the problem .....	12
Phase 2: Problem Analysis .....	12
Phase 3: Designing .....	13
Phase 4: Program Coding .....	13
Phase 5: Program Testing .....	14
Phase 6: Program Maintenance .....	14
1.2 Algorithm .....	15
Algorithms in detail .....	16
1.3 Flow Charts .....	18
1.4 Programming Languages .....	43
1.5 Compilation, Linking and Loading .....	44
Review Questions .....	46
<b>CHAPTER 2 .....</b>	<b>49</b>
<b><i>Introduction to 'C' Language .....</i></b>	<b>49</b>
2.1 Variables and Identifiers .....	50
2.2 Built-in Data Types .....	50
2.3 Variable Definition .....	51
2.4 Arithmetic operators and Expressions .....	52
2.5 Constants and Literals .....	53
2.6 Simple assignment statement .....	59
2.7 Basic input/output statement .....	60
2.8 Simple 'C' programs – the “main( )” function .....	69
2.9 Other assignment statements – post/pre increment/decrement .....	73
2.10 More on Assignment operators .....	76

2.11 Operator Precedence ..... 77  
Review Questions ..... 82

**CHAPTER 3 ..... 85**

**Conditionals and Loops ..... 85**

3.1 Decision making within a program ..... 86  
    3.1.1 Conditions, Relational Operators, Logical Connectives ..... 86  
    3.1.2 The if statement ..... 89  
    3.1.3 The if else statement ..... 91  
3.2 Loops ..... 94  
    3.2.1 While statement ..... 94  
    3.2.2 The for statement ..... 96  
    3.2.3 Nested loops ..... 96  
    3.2.3 Infinite loops ..... 97  
3.3 Other conditionals and loops ..... 97  
    3.3.1 If-else if-else statement ..... 97  
    3.3.2 Switch statement ..... 98  
    3.2.3 the Do-while statement ..... 103  
Review Questions ..... 119

**CHAPTER 4 ..... 125**

**Array ..... 125**

4.1 Introduction to one dimensional arrays ..... 126  
    One-dimensional array ..... 126  
4.2 Definition of arrays ..... 126  
4.3 Accessing array elements ..... 127  
4.4 Array manipulation ..... 128  
    4.4.1 Searching for an element in an array ..... 128  
    4.4.2 Insertion of an element in an array ..... 130  
    4.4.3 Deletion of an element from an array ..... 130  
    4.4.4 Finding the largest/smallest element in an array ..... 130  
4.5 Introduction to two dimensional arrays ..... 131  
    4.5.1 Matrix representation ..... 131

4.5.2 Addition of two matrices .....	136
4.5.3 Multiplication of two matrices .....	137
4.5.4 Transpose of a square matrix .....	139
4.6 Null terminated strings as array of characters .....	140
Review Questions .....	156

**CHAPTER 5 ..... 159**

***Functions* ..... 159**

5.1 Top-down approach of problem solving.....	160
5.2 Modular programming and functions .....	160
5.3 Prototype of a function .....	161
5.3.1 Formal parameter list .....	161
5.3.2 Return Type .....	161
5.4 Function Definition .....	162
5.5 Function invocation .....	163
5.5.1 Parameter passing – call by value .....	163
5.5.2 Parameter passing using arrays .....	164
5.6 Recursive Functions .....	166
Review Questions .....	172

**CHAPTER 6 ..... 173**

***Structures and Unions* ..... 173**

6.1 New data types using struct .....	174
6.2 Variable definition of type struct .....	174
6.3 Accessing components of a struct using ‘.’ Operator .....	175
6.4 Assignment operator on struct variables .....	175
6.5 Nesting of structures .....	180
6.6. Variant structures and unions .....	189
Variant structures and unions .....	195
Enumeration .....	197
Review Questions .....	200

<b>CHAPTER 7</b> .....	<b>201</b>
<b>Address Arithmetic and Pointers</b> .....	<b>201</b>
7.1 Run time address of a variable using & (address of operator) .....	202
7.2 Variables of pointer type-definition .....	202
7.3 Pointer initialization of the “null” pointer .....	203
7.4 De-referencing of a pointer type variable-the ‘*’ operator .....	203
7.5 Plus, minus, comparison operators on pointer type variables .....	203
7.6 Arrays and Pointers .....	205
Why? .....	207
7.7 Run-time storage allocation .....	212
7.7.1 Malloc() and calloc() function calls .....	213
7.8 Dynamic representation of a two dimensional array .....	214
Review questions .....	224
<b>CHAPTER 8</b> .....	<b>227</b>
<b>Self Referential Structures and Linked Lists</b> .....	<b>227</b>
8.1 Creation of a singly connected linked list .....	231
8.2 Traversing a linked list .....	232
8.3 Insertion into a linked list .....	233
8.4 Deletion from a linked list .....	235
Review Questions .....	242
<b>CHAPTER 9</b> .....	<b>243</b>
<b>Advanced topics on Variables</b> .....	<b>243</b>
9.1 Scope and Life-time of variables – global & local variables .....	244
9.2 Storage specification of variables .....	244
9.2.1 auto, register, static variables .....	244
9.3 External Variables .....	245
9.4 Bit-wise operators .....	248
Review questions .....	251

<b>CHAPTER 10 .....</b>	<b>253</b>
<b><i>File Processing</i> .....</b>	<b>253</b>
10.1 Concept of Files .....	254
10.2 File opening in various modes and closing a file .....	254
10.3 Reading from a file .....	255
10.4 Writing onto a file .....	257
Review Questions .....	273
<b>CHAPTER 11 .....</b>	<b>275</b>
<b><i>Advanced Features of 'C'</i> .....</b>	<b>275</b>
11.1 Pre-compilation in 'C' .....	276
11.2 The #include directive .....	276
11.3 Macros – definition and expansion .....	277
Simple Macro Substitution .....	277
Macros with Arguments .....	278
Nesting of Macros .....	279
Undefining a Macro (#undef) .....	280
11.4 Solved examples on Macros .....	280
11.5 Conditional inclusion .....	283
11.6 Variable length argument list in functions .....	286
Review Questions .....	288
