

CONTENTS

Chapter 1 ■ Getting Started with 3ds Max	1
Understanding the 3ds Max Interface Elements -----	3
Menus in 3ds Max -----	4
The Main Toolbar -----	5
The Command Panel -----	5
The Create Panel -----	7
The Modify Panel -----	8
The Hierarchy Panel -----	8
The Motion Panel -----	8
The Display Panel -----	8
The Utilities Panel -----	8
The Lower Interface Bar -----	9
The Viewports -----	9
The Home Grid -----	10
The Quadmenus -----	11
Working with Viewports -----	11
Changing a Viewport View -----	12
Zooming a View -----	12
Panning a Viewport -----	14
Rotating a Viewport -----	14
Maximizing the Active Viewport -----	15
Configuring Viewports -----	16
Controlling Viewport Rendering -----	16
Customizing the Viewport Layout -----	17
Adding a Viewport Background Image -----	19
Setting System Units -----	21
Managing 3ds Max Files -----	22
Creating a New File -----	22
Saving the 3ds Max Scene File -----	23
Opening your Saved File -----	24
Importing and Exporting a File -----	24

Chapter 2 ■ Working with Objects 27

Working with Primitive Objects ----- 29

 Creating a Box ----- 31

 Creating a Sphere ----- 33

 Creating a Prism using the Keyboard Rollout ----- 35

Modifying the Primitives ----- 36

 Editing the Attributes of a Primitive in the Create Panel ----- 36

 Modifying the Parameters of a Primitive in the Modify panel ----- 38

Selecting Objects ----- 39

 Selecting Objects using the Select Object Tool (A) ----- 40

 Selecting the Objects by Name ----- 41

 Selecting the Objects by Color ----- 42

 Selecting the Objects by Defining a Selection Region ----- 43

Transforming Objects ----- 45

 Coordinate Systems in 3ds Max ----- 46

 Axis Constraints Settings ----- 46

 Transform Gizmos ----- 47

 Transformation Center ----- 49

 Transforming Objects with the Transformation Tools ----- 50

 Moving an Object ----- 50

 Rotating an Object ----- 51

 Scaling an Object ----- 52

 Transforming Objects with the Type-in Dialog Box ----- 54

Hiding/Freezing the Objects ----- 55

 Hiding/Freezing the Objects using the Display Floater Dialog box ----- 56

 Hiding/Freezing the Objects using the Display Panel ----- 57

Cloning Objects ----- 58

Mirroring Objects ----- 61

Grouping Objects ----- 62

 Creating a Group ----- 63

 Opening and Closing a Group ----- 64

 Attaching and Detaching Objects in a Group ----- 65

Linking Objects	66
Unlinking Objects	67
Aligning Objects	68
Aligning Objects using Quick Align Tool	69
Chapter 3 ■ Introducing Modifiers	71
Modifier Types	73
The Modifier Stack	74
Using Modifiers	75
Applying a Modifier	75
Removing a Modifier	75
Turning On/Off the effect of a Modifier	75
Changing the Order of Modifiers in the Stack	76
Using the Cut, Copy, and Paste Options	76
Understanding the Objects' sub-objects and the Modifiers' sub-objects	76
Applying the Bend Modifier	77
Applying the Taper Modifier	79
Applying the Twist Modifier	82
Applying the Noise Modifier	84
Applying the Stretch Modifier	86
Applying the Squeeze Modifier	89
Applying the Lattice Modifier	92
Using the Free Form Deformation Modifier	95
Chapter 4 ■ Working with 2D Shapes	101
Working with Shape Primitives	102
Creating a Line	104
Creating a Star	108
Creating a Text	109
Parameters of Text	110
Creating Multi-Spline Shapes	111
Modifying the Splines	112

Rendering Splines	112
Making Splines Editable	113
Converting a Spline into an Editable Spline	113
Applying the Edit Spline Modifier to a Spline	114
Entering Sub-Object Level	115
Combining Existing Shapes into One Shape	116
Using the Cross Section Feature	117
Editing Vertices	119
Inserting Vertices	120
Breaking a Segment	121
Working with Refine and Connect Features	121
Using the Weld and Fuse Features	122
Working with Boolean Feature	123
Extruding Splines with Extrude Modifier	125
Lathing Splines using Lathe Modifier	126
Using the Bevel Modifier	127
Using the Sweep Modifier	128
Chapter 5 ■ Polygonal Mesh Objects	131
Creating Mesh Objects	132
Converting an Object into an Editable Poly Object	132
Collapsing an Object	133
Applying the Edit Poly Modifier	133
Selecting Sub-objects of an Editable Poly Object	133
Cutting a Polygon	134
Editing Polygons	136
Chapter 6 ■ Compound Objects	141
Introducing Compound Objects	142
Creating Conform Objects	143
Using the Shape Merge Object	145
Creating a Scatter Object	146
Creating a Terrain Object	147

Creating a Loft Object-----	148
Deforming a Loft Object-----	149
Scale Deformations-----	149
Twist Deformation-----	152
Teeter Deformations-----	153
Bevel Deformation-----	154
Fit Deformation-----	155
Creating Boolean Object-----	156
Chapter 7 ■ Materials and Maps	161
Understanding the Material Types in 3ds Max-----	162
Working with Material Editor-----	163
The Material Editor Interface-----	165
The Material/Map Browser-----	167
The Sample Slots-----	168
Changing the Sample Type for the Sample Slot-----	169
Getting New Material in a Sample Slot-----	169
Applying Materials to Objects-----	170
Removing a Material-----	172
Adding Materials to Library-----	173
Saving Material in the Current Material Library-----	173
Saving Materials in a New Library-----	174
Using the Standard Material-----	175
Working with Standard Material Rollouts-----	176
Shader Basic Parameters Rollout-----	176
Basic Parameters Rollout-----	177
The Color Selector Dialog Box-----	179
Hue/Blackness/Whiteness(HBW)-----	180
Red/Green/Blue (RGB)-----	180
Hue/Saturation/Value (HSV)-----	180
Working with Shaders Types for Standard Material-----	181
The Blinn Shader-----	181
The Anisotropic Shader-----	184

Understanding Maps and Map Types -----	186
Understanding the Map Types -----	186
Understanding Mapping Coordinates -----	187
Using the Maps Rollout -----	187
The Bitmap Map -----	188
Working with the Bitmap Parameter Rollout -----	190
Cropping and Placing a Bitmap -----	191
The Gradient Map -----	193
The Cellular Map -----	196
The Dent Map -----	199
The Falloff Map -----	200
Working with Compositor Maps -----	201
The Composite Map -----	201
The Mask Map -----	202
The Mix Map -----	203
The RGB Multiply Map -----	204
Working with Maps in the Others Category -----	204
The Flat Mirror Map -----	204
The Raytrace Material -----	204
The Reflect/Refract Map -----	205
Adjusting Materials on an Object using the UVW Map Modifier	205
Chapter 8 ■ All About Lights -----	209
Understanding Standard and Photometric Lights -----	210
Standard Lights -----	210
Photometric Lights -----	211
Understanding Key Light, Fill Light and Backlight -----	212
Using the Default Lightning -----	212
Creating Standard Light Objects -----	214
Modifying Parameters of a Light Object -----	218
Turning the Lights ON/OFF -----	218
Modifying the Color of a Light -----	219
Modifying the Brightness of Light -----	220

Modifying the Attenuation of a Light -----	221
Applying Shadows to a Light -----	222
Including/Excluding Objects from a Light's Effects -----	223
Working with Sunlight System -----	225
Working with Photometric Lights -----	227
Modifying the Color of the Photometric Lights -----	228
Chapter 9 ■ Animation in 3ds Max -----	231
Understanding Frames, Keyframes and Keys -----	232
Working with Keys -----	232
Auto Key Mode -----	232
Set Key Mode -----	232
3ds Max Animation Tools -----	233
The Time Slider -----	233
The Track Bar -----	234
Time Controls -----	234
Changing the Number of Frames in Your Scene -----	235
Animating Objects in Auto Key Mode -----	235
Animating Objects in Set Key Mode -----	237
Working with the Motion Panel -----	239
Creating a Transform Key using the Motions Panel -----	239
Modifying the Trajectory of an Object -----	240
Assigning a Path Constraint -----	242
Animating Objects -----	244
Animating Modifiers -----	244
Animating Materials -----	244
Animating Lights -----	244
