Part 1 Portals and web parts 1

<i>1</i>	<i>Introducing portals and web parts</i>	<i>3</i>		
1.1	Introduction	3		
1.2	What is a portal?	5		
	Anatomy of a portal	6 ♦ A portal example	8	
1.3	Using the ASP.NET 2.0 portal framework	16		
	Components of the framework	16		
1.4	Introducing Adventure Works Cycles database	18		
	What is the database?	18 ♦ You're hired!	19	
	Getting our hands on data	21		
1.5	Summary	31		
<i>2</i>	<i>Web parts: the building blocks of portals</i>	<i>32</i>		
2.1	Introduction	32		
2.2	Exploring web parts	33		
	Discovering the GenericWebPart control	34		
2.3	Understanding the WebPart class	38		
	Using custom controls	38 ♦ Creating web parts with user controls	42	
2.4	Understanding web part internals	45		
	IWebPart	46 ♦ IWebActionable	48 ♦ IWebEditable	52

2.5	Applying themes and styles	54
2.6	Adding web parts to the Adventure Works Solution	59
2.7	Summary	64
3	<i>Using web part connections</i>	65
3.1	Dissecting connections	65
	The Master/Details scenario	66 ♦ The Parent/Child scenario
	67	
3.2	Creating simple connections	70
	Creating a connection consumer	72
3.3	Sorting out connection types	74
	Static connections	75 ♦ Dynamic connections
	76	
3.4	Using transformers	79
	Using pre-defined transformers	84
3.5	Adventure Works—implementing connections for HR	90
3.6	Summary	95
4	<i>The Web Part Manager</i>	96
4.1	Introduction	96
	A control with many hats	97
4.2	The Page Lifecycle	100
4.3	Page display modes	101
4.4	Web part authorization	104
4.5	Importing and exporting web parts	108
4.6	Using WebPartManager with master pages	119
4.7	Adventure Works—additions to the HR code	121
4.8	Summary	125
5	<i>Working with zones</i>	127
5.1	Introduction	127
5.2	Classifying zones	128
	WebPart zones	128 ♦ Tool zones
	129 ♦ WebZone—the	
	common base class	130 ♦ Zone appearance
	131	
5.3	Custom rendering of zones	133
	The structure of zones	134 ♦ Rendering the header, body, and
	footer	135 ♦ Displaying the galleries in a DropDownList
	136	
5.4	Using WebPartChrome	139
	Defining chrome types	139 ♦ Customizing chrome
	141	
	Viewing the results of custom chrome	142

5.5	Explaining parts	143
	EditorZone parts	144 ♦ CatalogZone parts 148
5.6	Zone additions to the Adventure Works Portal	150
	Planning the CatalogZone extensions	151
	Creating a custom catalog part	151
5.7	Summary	157
6	<i>Understanding personalization</i>	158
6.1	Introduction	158
6.2	Defining personalization	159
6.3	Personalization in action	161
6.4	Lifecycle of personalization data	169
	Storing personalization data	170 ♦ The PersonalizationProvider class 171 ♦ Setting up the database 176
6.5	Working with personalization data	180
	SetPersonalizationDirty	181 ♦ Personalization interfaces 183
6.6	Personalization of the Adventure Works portal	187
	Allowing users to change personalization scope	187
	Adding a Notes web part	191
6.7	Summary	197

Part 2 Extending the portal framework 199

7	<i>Creating an enhanced editing experience</i>	201
7.1	Introduction	201
7.2	Supplying custom editing controls	202
	Improving the FavoritesWebPart	203
7.3	Improving usability	214
	Reducing mouse clicks	214 ♦ Creating a collapsible EditorZone 219 ♦ A finishing touch 225
7.4	Summary	228
8	<i>Useful portal customizations</i>	229
8.1	Introduction	229
8.2	Making common tasks accessible	230
	Identifying common tasks	231
	Creating a common tasks MenuBar	232

8.3	Versioned personalization data	234
	Creating a revision of data	236 ♦ Approving a revision 238
	Allowing a user to commit changes	240
8.4	Creating an area for tool zones	243
	Moving our task zones	244 ♦ Displaying the TaskZone area 246
8.5	Adding a CatalogZone dialog	247
	Displaying catalogs	249 ♦ Displaying web parts 251
	Communicating between web pages	253
8.6	Summary	255
9	<i>Portal management</i>	257
9.1	Introduction	257
9.2	Preparing for deployment	258
	Code instrumentation	259 ♦ Health monitoring 262
9.3	Recovering from errors gracefully	268
	Providing a custom error page	269 ♦ Logging the failure 270
9.4	When all else fails	271
	Self-maintenance of web parts	272 ♦ Managing personalization data 279
9.5	Summary	281
10	<i>Into the future</i>	282
10.1	Introduction	282
10.2	Reflecting on the portal	283
10.3	A world of web portals	284
	SharePoint	284 ♦ Internet portals 286
	Developer extensibility	287
10.4	Ajax behavior	287
	Making Client-side Callbacks	289 ♦ Announcing Atlas 292
	Using Atlas	293
10.5	Introducing Live.com—a modern mega-portal	299
	Personalizing the Live.com portal	300 ♦ MicrosoftGadgets.com—a repository of custom gadgets 301 ♦ Creating a custom Live.com gadget 302
10.6	Call to action	308
<i>appendix</i>	<i>Creating the Adventure Works project</i>	<i>310</i>
	<i>index</i>	<i>319</i>
