about this book xxiii
about the title xxviii
about the cover illustration xxix

PART 1 GETTING STARTED 1

1 *Introducing Prototype and Scriptaculous* 3

1.1 A brief history of Ajax 4

Prehistory 5 ■ *The pioneer phase* 6
The settlers arrive 6 ■ *Civilization* 7

1.2 What is Prototype? 7

JavaScript language features 8 ■ *Web browser features* 10

1.3 What is Scriptaculous? 11

Visual effects 11 ■ *Drag and drop* 12
Components 12 ■ *Utilities and testing frameworks* 13

- 1.4 Applying Prototype and Scriptaculous 13
 - Introducing the Ratings example* 13
 - Adding Prototype and Scriptaculous* 20
- 1.5 Summary 25

2 *Introducing QuickGallery* 26

- 2.1 Design and implementation 27
 - Application requirements* 27
 - *Navigating the filesystem* 29
 - *Generating the thumbnail image* 32
 - *Putting the pieces together* 33
 - Creating the HTML* 37
- 2.2 Evaluating the classic web app model 41
 - Links, forms, and full-page refresh* 41
 - The classic web app and QuickGallery* 42
- 2.3 Summary 44

3 *Simplifying Ajax with Prototype* 45

- 3.1 Redesigning for Ajax 46
 - Designing the asynchronous request* 47
 - Prototype's Ajax classes* 50
- 3.2 Using XML and Ajax 56
 - Designing the XML response* 56
 - *Modifying the server-side code* 57
 - *Writing the client code* 59
- 3.3 Using JSON and Ajax 67
 - Modifying the server code* 68
 - *Modifying the client code* 69
- 3.4 Summary 70

4 *Using Prototype's Advanced Ajax Features* 71

- 4.1 Prototype's advanced Ajax classes 72
 - Ajax.Updater* 72
 - *Ajax.PeriodicalUpdater* 73
 - Ajax.Responders* 74
- 4.2 Using HTML and Ajax 74
 - Generating the HTML fragment* 75
 - *Modifying the client-side code* 76
 - *Updating multiple DOM elements* 77
 - *Automatically updating content* 83

- 4.3 Comparing data- and content-centric Ajax 85
 - Considering ease of development* 85 ▪ *Fitting the tools* 87
 - Comparing performance* 87 ▪ *Looking for future-proof solutions* 92
- 4.4 Summary 93

PART 2 SCRIPTACULOUS QUICKLY95

5 *Scriptaculous Effects* 97

- 5.1 Quick win: adding an effect with only one line 99
- 5.2 Setting up Scriptaculous and the examples 100
 - Getting Scriptaculous* 101
 - Loading the Scriptaculous libraries* 102
- 5.3 Types of Scriptaculous effects 103
- 5.4 Understanding the effects 104
 - The effects laboratory* 104 ▪ *The common effects options* 107 ▪ *Exploring the core effects* 109 ▪ *Exploring the combination effects* 114
- 5.5 Easy toggling of Show and Hide effects 117
 - The Effect.toggle() utility function* 118
 - The Toggle Pane widget* 119
- 5.6 Working with transitions 125
 - Using the built-in transitions* 126 ▪ *Introducing the Transition Mapper* 127 ▪ *Writing your own transitions* 130
- 5.7 Gaining control during effects 131
- 5.8 Canceling effects 133
- 5.9 Controlling multiple effects 134
 - Running simultaneous effects* 134 ▪ *Running serial effects* 135
- 5.10 Summary 139

6 *Scriptaculous Controls* 140

- 6.1 Using the sample programs for this chapter 141
- 6.2 The in-place text editor 142
 - Creating an in-place text editor* 143 ▪ *The InPlaceEditor options* 146 ▪ *Some usage examples* 154

- 6.3 The `InPlaceCollectionEditor` 162
 - Creating an `InPlaceCollectionEditor`* 162
 - The `InPlaceCollectionEditor` Options* 165
- 6.4 The Ajax autocompleter control 167
 - Creating an Ajax autocompleter* 168 ■ *Ajax.Autocompleter options* 171 ■ *The sci-fi movie autocompleter servlet* 174
 - Styling the choices menu* 179
- 6.5 The Scriptaculous local autocompleter control 181
 - Creating a local autocompleter* 181
 - Autocompleter.Local options* 183
- 6.6 The slider control 187
 - Creating a slider control* 188 ■ *Using images with a slider* 191
 - The Control.Slider options* 193 ■ *A more absorbing example* 197
- 6.7 Summary 202

7 *Scriptaculous Drag and Drop* 204

- 7.1 The sample code for this chapter 205
- 7.2 The sample code for this chapter 207
- 7.3 Dragging things around 207
 - Making an element draggable* 208 ■ *Draggable options* 210
- 7.4 Dropping dragged things 217
 - Defining drop targets* 218 ■ *Drop target options* 218
 - Drag and drop example* 223
- 7.5 Sorting by drag and drop 228
 - Creating a sortable element* 228 ■ *Sortable element options* 231
 - Serializing the sortable elements* 243
- 7.6 Summary 248

PART 3 PROTOTYPE IN DEPTH249

8 *All About Objects* 251

- 8.1 Introducing the Scratchpad application 252
- 8.2 The Object type 254
 - Creating an Object* 255 ■ *Defining object types using prototypes* 258 ■ *Reflecting on objects* 261

- 8.3 Objects and Prototype 263
 - Simplifying constructors with Class.create()* 263
 - Declaring object hierarchies with Object.extend()* 265
 - Simple object merging* 265 ■ *Modeling Object hierarchies* 269
- 8.4 Summary 276

9 *Fun with Functions* 277

- 9.1 JavaScript functions 278
 - Declaring functions* 279 ■ *Calling functions* 280
 - Function context* 282 ■ *Function closures* 284
 - When to use context and closures* 286
- 9.2 Extending functions with Prototype.js 288
 - The bind() method* 288
 - The bindAsEventListener() method* 289
- 9.3 Summary 291

10 *Arrays Made Easy* 292

- 10.1 Introducing Arrays 293
- 10.2 The native JavaScript Array 294
 - Iterating over Arrays using length* 294 ■ *Treating Arrays like stacks : pop() and push(), shift() and unshift()* 295
 - Chopping and changing with slice(), splice(), and concat()* 296
 - Reordering Arrays with reverse() and sort()* 298 ■ *Arrays and Strings: join() and split()* 299 ■ *Other Array-like objects* 299
- 10.3 Prototype.js and Arrays 300
 - Accessing elements by position using first(), last(), and indexOf()* 300 ■ *Modifying Arrays using clear(), compact(), without(), and flatten()* 301
- 10.4 Methods of the Enumerable object 303
 - Searching through arrays: all(), any(), and include()* 304
 - Filtering arrays with detect(), findAll(), reject(), grep(), and partition()* 306 ■ *Handling complex array elements with pluck(), invoke(), and collect()* 309 ■ *Constructing complex array elements with inject() and zip()* 313 ■ *Numerical ordering with max(), min(), and sortBy()* 316 ■ *Working with DOM collections* 318

- 10.5 Working with Hashes and ObjectRanges 319
 Using the Hash object 319 ▪ *Using the ObjectRange* 323
- 10.6 Summary 324

11 *Back to the Browser* 325

- 11.1 A crash course in DOM methods 326
 Traversing the tree 328 ▪ *Modifying the tree* 331
- 11.2 Prototype and the DOM 334
 Simple helper functions 334 ▪ *The Element object* 336
 Insertion objects 342 ▪ *The Position object* 344
- 11.3 Extending the Event object 349
- 11.4 Working with HTML forms 351
- 11.5 Summary 355

PART 4 ADVANCED TOPICS357

12 *Prototype and Scriptaculous in Practice* 359

- 12.1 QuickGallery application requirements 360
- 12.2 Building the slideshow editor 361
 Modifying the page layout 361 ▪ *Defining a drag-and-drop strategy* 367 ▪ *Implementing drag and drop* 368
 Providing editable captions 371
- 12.3 Adding Ajax-based persistence 375
 Defining the persistence format 375 ▪ *Saving a slideshow* 376
 Loading content from the server 378
- 12.4 Creating the toolbar 381
- 12.5 Building the slideshow player 384
 Specifying a user interface 384 ▪ *Implementing the slideshow player* 386 ▪ *Launching the player* 389
- 12.6 Putting it all together 393
- 12.7 Summary 408

13	<i>Prototype, Scriptaculous, and Rails</i>	410
13.1	Generating JavaScript	411
	<i>Hello World, Prototype, and Rails style</i>	412
	<i>Introducing Rails helpers</i>	413
13.2	Ajax helpers	415
	<i>Standard configuration options</i>	416
	▪ <i>A tour of Ajax helpers</i>	418
13.3	Scriptaculous helpers	424
	<i>Creating visual effects</i>	424
	▪ <i>Implementing in-place editors</i>	425
	▪ <i>Adding autocomplete features</i>	426
	<i>Implementing drag and drop</i>	428
13.4	To JavaScript or not to JavaScript	433
13.5	The next level: RJS	434
	<i>The multiple-update problem</i>	434
	▪ <i>Hello from RJS</i>	435
	<i>Multiple updates and RJS</i>	437
	▪ <i>A tour of RJS</i>	438
	<i>Rendering RJS inline</i>	441
13.6	Summary	441
appendix A	<i>HTTP Primer</i>	443
appendix B	<i>Measuring HTTP Traffic</i>	458
appendix C	<i>Installing and Running Tomcat 5.5</i>	469
appendix D	<i>Installing and Running PHP</i>	477
appendix E	<i>Porting Server-Side Techniques</i>	489
	<i>index</i>	497
