

Table of Contents

Introduction	xxvii
Chapter 1: Essential Java	1
<i>In Depth</i>	3
All about Java.....	3
Java Appears	4
All about Bytecodes	5
Java Security	5
Java Programs.....	6
Java Platform Standard Edition 6.....	9
<i>Immediate Solutions</i>	10
Getting and Installing Java	10
What about CLASSPATH?	11
What was New in J2SE 5?	11
Caching Entire BufferedImages.....	11
Methods Related to Hardware Acceleration of Images.....	11
Hardware-Accelerated Rendering Using OpenGL	12
Solaris OpenGL Notes.....	13
Notes on Linux OpenGL.....	13
Microsoft Windows OpenGL-based Pipeline	13
Support for CUPS Printers – Solaris and Linux	13
Bicubic Interpolation Assistance	13
Generating Fonts from Files and Streams.....	13
Better Text Rendering Performance and Reliability.....	14
Rendering Multilingual Text.....	14
What was Deprecated in J2SE 5?	14
What’s New in Java SE 6?	14
Enhanced Collection Framework.....	14
Dynamic Compilation.....	14
Support for Internationalization.....	15

Table of Contents

Database	15
Security	15
Web Services	15
Desktop Improvement	15
JavaBeans Activation Framework (JAF).....	16
What has been Deprecated in Java SE 6?.....	16
What is JSP?	16
What is J2EE?	17
What are Application Servers (Tomcat, Jrun, WebSphere, WebLogic, etc.)?.....	18
What is JSF?	19
What is J2ME?.....	19
What is Struts?	20
Subfolders Created by JDK.....	21
Writing Code: Creating Code Files	21
Writing Code: Knowing Java’s Reserved Words.....	22
Writing Code: Creating an Application.....	24
Line 1—public class app	24
Line 2—public static void main(String[] args)	25
Line 3—System.out.println(“Hello from Java!”);	25
Compiling Code	26
Compiling Code: Using Command-Line Options	27
Cross-Compilation Options	28
Compiling Code: Checking for Deprecated Methods.....	29
Running Code.....	29
Running Code: Using Command-Line Options.....	32
Basic Skills: Commenting Your Code	33
Basic Skills: Import Java Packages and Classes.....	35
Basic Skills: Finding Java Classes with CLASSPATH.....	37
Creating Applets	38
Running Applets	40
Creating Windowed Applications.....	41
Running Windowed Applications	42
Designing Java Programs.....	43
Performance	43
Maintainability	44
Extensibility	44
Availability.....	44
Distributing Your Java Program.....	45

Chapter 2: Variables, Arrays, and Strings	47
<i>In Depth</i>.....	49
Variables	49
Data Typing.....	50
Arrays.....	51
Strings.....	53
<i>Immediate Solutions</i>.....	55
What Data Types are Available?	55
Creating Integer Literals	56
Creating Floating-Point Literals.....	57
Creating Boolean Literals.....	58
Creating Character Literals.....	58
Creating String Literals	59
Declaring Integer Variables	60
Declaring Floating-Point Variables	61
Declaring Character Variables	61
Declaring Boolean Variables	62
Initializing Variables.....	63
Dynamic Initialisation.....	64
Conversion between Data Types	65
Automatic Conversions	65
Casting to New Data Types.....	66
Declaring One-Dimensional Arrays.....	67
Creating One-Dimensional Arrays.....	68
Initializing One-Dimensional Arrays.....	69
Declaring Multi-Dimensional Arrays	69
Creating Multi-Dimensional Arrays	70
Initializing Multi-Dimensional Arrays	71
Creating Irregular Multi-Dimensional Arrays	72
Getting an Array's Length	73
General Form of Static Import.....	74
Importing Static Members	74
The String Class.....	75
Creating Strings	80
Getting String Length.....	82
Concatenating Strings.....	82
Getting Characters and Substrings.....	83
Searching For and Replacing Strings	84
Changing Case in Strings.....	85

Table of Contents

Checking for Empty String	86
Formatting Numbers in Strings	86
The StringBuffer Class	86
Creating StringBuffers	89
Getting and Setting StringBuffer Lengths and Capacities	90
Setting Characters in String Buffers	91
Appending and Inserting Using String Buffers	91
Deleting Text in String Buffers	92
Replacing Text in StringBuffers	92
Wrapper Class	93
Autoboxing and Unboxing of Primitive Types	94
Varargs Fundamentals	97
Overloading Varargs Methods	99
Ambiguity in Varargs	101
Chapter 3: Operators, Conditionals, and Loops	103
<i>In Depth</i>	105
Operators	105
Conditionals	106
Loops	107
<i>Immediate Solutions</i>	109
Operator Precedence	109
Incrementing and Decrementing (++ and --)	110
Unary Not (~ And !)	111
Multiplication and Division (* and /)	112
Modulus (%)	113
Addition and Subtraction (+ and -)	113
Shift Operators (>>, >>>, and <<)	113
Relational Operators (>, >=, <, <=, ==, and !=)	114
Bitwise and Bitwise Logical And, Xor, and Or (&, ^, and /)	115
Logical (&& and)	117
The if-then-else Operator (?)	119
Assignment Operators (= and [operator]=)	119
Using the Math Class	121
Changes in the Math Class	122
Class StrictMath	123
Comparing Strings	123
The if Statement	124
The else Statement	125

Nested if Statement	126
The if-else Ladders	126
The switch Statement.....	127
The while Loop	129
The do-while Loop	131
The for Loop.....	132
The for-each Loop	134
Supporting for-each in Your Own Class	137
A (Poor) Solution	138
Significance of for-each	138
Nested Loops	139
Using the break Statement.....	140
Using the continue Statement	141
Chapter 4: Object-Oriented Programming.....	143
<i>In Depth</i>.....	145
Classes	146
Objects	146
Data Members.....	146
Methods	147
Inheritance.....	148
Exception Handling	148
Debugging.....	149
<i>Immediate Solutions</i>.....	150
Declaring and Creating Objects.....	150
Declaring and Defining Classes.....	152
Creating Instance Variables.....	154
Setting Variable Access	155
Creating Class Variables	156
Creating Methods.....	157
Setting Method Access	158
Passing Parameters to Methods.....	159
Command-Line Arguments Passed to main method.....	160
Returning Values from Methods	161
Creating Class Methods	162
Creating Data Access Methods	163
Creating Constructors	164
Passing Parameters to Constructors.....	165
A Full Class Example.....	165

Table of Contents

Understanding Variable Scope	166
Using Recursion.....	167
Garbage Collection and Memory Management	168
Avoiding Circular References.....	169
Garbage Collection and the finalize Method.....	170
Overloading Methods.....	170
Overloading Constructors	171
Passing Objects to Methods.....	172
Passing Arrays to Methods.....	174
Using this Keyword	175
Returning Objects from Methods	175
Returning Arrays from Methods	176
New Classes Added to Java Lang	177
The ProcessBuilder Class.....	177
The StringBuilder Class	178
Catching an Exception.....	180
Nesting try Statements	186
Using finally Clause.....	187
Throwing Exceptions.....	188
Creating a Custom Exception.....	189
Debugging Java Programs.....	190
Chapter 5: Inheritance, Inner Classes, and Interfaces.....	195
<i>In Depth</i>.....	197
Why Inheritance?	197
Why Interfaces?	198
Why Inner Classes?.....	199
<i>Immediate Solutions</i>.....	200
Creating a Subclass	200
Access Specifiers and Inheritance.....	201
Calling Superclass Constructors.....	202
Creating Multilevel Inheritance.....	205
Handling Multilevel Constructors	206
Overriding Methods	207
Accessing Overridden Members	208
Using Superclass Variables with Subclassed Objects.....	209
Dynamic Method Dispatch (Runtime Polymorphism).....	211
Creating Abstract Classes	212
Stopping Overriding with final	213

Stopping Inheritance with final	214
Creating Constants with final	215
Is-a vs. Has-a Relationships	215
The Java Object Class	216
Using Interfaces for Multiple Inheritance	218
New Interfaces added to Java Lang	220
The Readable Interface	220
The Appendable Interface	221
The Iterable Interface	222
Creating Iterable Objects	225
Creating Inner Classes	227
Creating Anonymous Inner Classes	227
Chapter 6: AWT—Applets, Applications, and Event Handling	229
<i>In Depth</i>	231
The Abstract Windowing Toolkit	231
Applets	232
Applications	233
Handling Events	234
<i>Immediate Solutions</i>	235
Using the Abstract Windowing Toolkit	235
Creating Applets	250
Using the <APPLET> HTML Tag	252
Handling Non-Java Browsers	254
Embedding <APPLET> Tags in Code	255
Using the init, start, stop, destroy, paint, and update Methods	255
Drawing Graphics in Applets	256
Reading Parameters in Applets	257
Using Java Consoles in Browsers	258
Adding Controls to Applets: Text Fields	259
Adding Controls to Applets: Buttons	260
Handling Events	260
Standard Event Handling	261
Using Delegated Classes	264
Using Action Commands	266
Handling Events the Old Way	267
Extending Components	267
Using Adapter Classes	268
Using Anonymous Inner Adapter Classes	270

Table of Contents

Creating Windowed Applications.....271

Exiting an Application When its Window is closed.....276

Applications You Can Run as Applets277

Setting Applet Security Policies.....277

Whats New in java.awt Package.....280

 System Tray.....280

 Splash Screen283

 Dialog Modality285

 Gif Writer.....286

 Text Antialiasing287

Chapter 7: AWT—Text Fields, Buttons, Checkboxes, Radio Buttons, and Layouts.....289

***In Depth*..... 291**

Text Fields.....291

Buttons291

Checkboxes.....291

Radio Buttons.....291

Layouts.....292

***Immediate Solutions* 293**

Using Text Fields293

Using Labels.....296

Using Buttons.....298

Using Checkboxes302

Using Radio Buttons306

Layout Managers.....308

Flow Layouts.....308

Grid Layouts311

Using Panels.....314

Border Layouts316

Card Layouts.....319

Grid Bag Layouts.....322

Using Insets and Padding.....328

Creating Your Own Layout Manager329

Chapter 8: AWT—Lists, Choices, Text Areas, Scrollbars, and Scroll Panes.....331

***In Depth*..... 333**

Lists.....333

Choices.....333

Text Areas.....333

Scrollbars	334
Scroll Panes.....	334
Immediate Solutions	335
Using Text Areas	335
Replacing Text in Text Areas.....	339
Searching for and Selecting Text in Text Areas.....	340
Using Lists.....	342
Using Multiple-Selection Lists	347
Using Choice Controls.....	351
Using Scrollbars.....	357
Scrollbars and Border Layouts.....	363
Using Scroll Panes.....	366
Chapter 9: AWT—Graphics, Images, Text, and Fonts	371
In Depth.....	373
Graphics.....	373
Images	373
Text and Fonts.....	373
The Keyboard and Mouse.....	373
Immediate Solutions	374
Using the Mouse.....	374
Using the Keyboard	377
Using Fonts.....	383
Using Images.....	391
Resizing Images.....	394
Drawing Graphics.....	396
Drawing Lines	402
Drawing Ovals.....	403
Drawing Rectangles.....	403
Drawing Rounded Rectangles	404
Drawing Freehand	404
Drawing Arcs.....	405
Drawing Polygons	405
Setting Drawing Modes	405
Selecting Colors.....	406
Using Canvases.....	409
Using the ImageObserver Interface.....	411
Using the MediaTracker Class	413
Working Pixel by Pixel: The PixelGrabber and MemoryImageSource Classes	416

Table of Contents

Brightening Images 420

Converting Images to Grayscale..... 421

Embossing Images..... 422

Chapter 10: AWT—Windows, Menus, and Dialog Boxes.....425

***In Depth*..... 427**

Windows..... 427

Menus 427

Dialog Boxes..... 428

***Immediate Solutions* 429**

Creating Frame Windows 429

Showing and Hiding Windows 430

Handling Window Events 432

Automatically Hiding Windows upon Closing 435

Using the Windows Class 436

Creating Menus 442

Creating a MenuBar Object 444

Creating Menu Objects..... 446

Creating MenuItem Objects..... 448

Handling Menu Events 450

More Menu Options..... 452

Adding Menu Separators..... 454

Disabling Menu Items 455

Adding Checkboxes to Menus 456

Creating Submenus..... 459

Pop-Up Menus..... 461

Dialog Boxes..... 463

File Dialog Boxes 467

Chapter 11: Working with Streams—File and I/O Handling.....471

***In Depth*..... 473**

Streams, Readers, and Writers 473

***Immediate Solutions* 474**

Using the File Class..... 474

Working with InputStream..... 479

Working with OutputStream 480

Working with FileInputStream 481

Working with FileOutputStream..... 483

Working with ByteArrayInputStream	485
Working with ByteArrayOutputStream	487
Working with BufferedInputStream	489
Working with BufferedOutputStream	491
Working with RandomAccessFile	492
Working with Reader	494
Working with Writer	495
Keyboard Input: Working with InputStreamReader	496
Working with OutputStreamWriter	498
Working with FileReader	499
Working with FileWriter	500
Working with CharArrayReader	501
Working with CharArrayWriter	503
Working with BufferedReader	505
Working with BufferedWriter	507
Working with PushbackReader	508
Working with PrintWriter	509
Working with StreamTokenizer	512
Working with Serialization	514
Console Class	519
Working with the Clipboard	520
Working with the Printer	521
Printing with Formatter	522
Using System.out.printf	522
Using String.format	522
Dates	523
Using java.util.Formatter	523
Scanning Input with Scanner class	524
Working with NIO	525
Essentials in NIO	526
Buffers	526
Channels	528
Charsets and Selectors	530
Prospects of NIO	530
Chapter 12: Filing and Printing Documents	531
<i>In Depth</i>	533
Serializable	533
Externalizable	533

Table of Contents

Printing in Java	533
Job Control	533
Imaging	534
Printable Jobs	534
Pageable Jobs	534
Immediate Solutions	535
Serializing the Sketch.....	535
Assigning a Document Name	535
Recording the Changes in Sketch.....	536
Creating a Sketch.....	537
Implementing the Serial Interface	546
Serializing the List of Elements	546
Serializing Lines	547
Serializing Rectangles.....	548
Serializing Circles.....	548
Serializing Curves.....	549
Supporting the File Menu	552
Printing in Java	553
Paper Class	554
PageFormat Class.....	555
PrinterJob Class	556
Book Class	558
Pageable Interface	559
PrinterGraphics Interface.....	560
Creating and Using PrinterJob Objects.....	560
Displaying a Print Dialog	561
Getting Started with Printing.....	562
Printing Pages.....	562
To Format a Page	564
Chapter 13: Working with Multiple Threads	567
<i>In Depth</i>.....	569
Using Threads in Java.....	569
Immediate Solutions	572
Getting the Main Thread.....	572
Naming a Thread	572
Pausing a Thread.....	573
Creating a Thread with the Runnable Interface	574
Creating a Thread with the Thread Class	577
Creating Multiple Threads	581

Waiting for (Joining) Threads	584
Checking Whether a Thread Is Alive.....	585
Setting Thread Priority and Stopping Threads	586
Why Use Synchronization?.....	588
Synchronizing Code Blocks	589
Synchronizing Methods	590
Synchronizing Classes	592
Semaphores.....	592
CyclicBarrier.....	597
Using CountdownLatch.....	599
Exchanger.....	600
Communicating between Threads	602
Suspending and Resuming Threads	603
Creating Graphics Animation with Threads	607
Eliminating Flicker in Graphics Animation.....	610
Suspending and Resuming Graphics Animation	611
Double Buffering	612
Simplifying Producer-Consumer with Queue Interface.....	615
Concurrent Programming.....	618
Limitations of Synchronization Previous to J2SE 5	618
Simplifying Servers using the Concurrency Utilities.....	619
Overview of the Concurrency Utilities.....	619
java.util.concurrent Package.....	620
java.util.concurrent.locks Package	623
Reader/Writer Locks.....	623
java.util.concurrent.atomic Package.....	624
Chapter 14: Networking and Security with Java	627
<i>In Depth</i>	629
Basics of Networking.....	629
Sockets in Java.....	630
Client-Server in Networking.....	630
Proxy Servers	631
Internet Addressing	631
Domain Naming Service (DNS).....	632
Inet4Addresses and Inet6Addresses	632
The URL Class	633
The URI Class.....	633
URI Syntax and Components.....	634

Table of Contents

TCP/IP and Datagram	635
What is Bart?	635
Immediate Solutions	637
Java Net API's	637
The Networking Interfaces and Classes	637
InetAddresses	640
IP Address Scope	640
Host Name Resolution	640
InetAddress Caching	641
Factory Methods	644
Instance Method	645
Creating and Using Sockets	645
Creating TCP Clients and Servers	650
TCP/IP Client Sockets	651
A whois Example	653
TCP/IP Server Sockets	654
Submitting an HTML Form from Java	656
Handling URL	658
Using URLConnection Objects	661
Working with Datagrams	666
DatagramPacket	667
Datagrams Server and Client	668
Working with Bart	670
java.security Package	672
Permissions and Security Policy	676
Policy Class	677
Chapter 15: Swing—Applets, Applications, and Pluggable Look and Feel	681
In Depth	683
The Java Foundation Classes	683
Swing	684
What's New in javax.swing Package	686
Heavyweight vs. Lightweight Components	687
Swing Features	688
Graphics Programming Using Panes	689
Model View Controller Architecture	689
Immediate Solutions	691
Working with Swing	691
Preparing to Create a Swing Applet	700

Understanding Root Panes	703
Understanding Layered Panes	706
Understanding Content Panes	709
Working with Content Panes	709
Creating a Swing Applet	711
Painting in Swing vs. AWT	711
Displaying Controls in Swing vs. AWT	712
Using the JPanel Class	712
Creating a Swing Application	714
Closing JFrame Windows	718
Selecting Component Borders	721
<i>Using Insets</i>	723
The Synth Skinnable Look and Feel	725
Setting the Pluggable Look and Feel	729
Setting the Pluggable Look and Feel for Components	734
Chapter 16: Swing—Text Fields, Buttons, Toggle Buttons, Checkboxes, and Radio Buttons	737
<i>In Depth</i>	739
Labels and Text Fields	739
Password Field	740
Text Area	740
Editor Pane	740
Text Pane	740
Text Component Printing	740
Buttons	740
Toggle Buttons	740
Checkboxes and Radio Buttons	741
<i>Immediate Solutions</i>	742
Using Labels	742
Using Image Icons	745
Using Images in Labels	747
Using Text Fields	748
Setting Text Field Alignment	752
Creating Password Field	753
Creating Text Areas	754
Customizing Text Areas	756
Creating Editor Panes	757
Using HTML in Editor Panes	760
Using RTF Files in Editor Panes	761
Creating Text Panes	761

Table of Contents

Inserting Images and Controls into Text Panes	762
Setting Text Pane Text Attributes	763
Working with Sound in Applets	768
Working with Sound in Application	768
Abstract Button: The Foundation of Swing Buttons	769
Using Buttons	775
Displaying Images in Buttons	779
Using Rollover and Disabled Images	781
Default Buttons and Mnemonics	782
Using Toggle Buttons	785
Creating Toggle Button Groups	787
Using Checkboxes	788
Using Radio Buttons	792
Using Checkbox and Radio Button Images	796
Getting and Setting the State of Checkboxes and Radio Buttons	797
Chapter 17: Swing—Viewports, Scrolling, Sliders, Lists, Tables, and Trees	799
<i>In Depth</i>	801
Viewports	801
Scroll Panes	801
Sliders	801
Scrollbars	801
Lists	801
Tables	802
Trees	802
<i>Immediate Solutions</i>	803
Handling Viewports	803
Creating Scroll Panes	808
Creating Scroll Pane Headers and Borders	813
Scrolling Images	814
Creating Sliders	815
Filling a Slider	820
Painting Slider Tick Marks	821
Painting Slider Labels	822
Setting the Slider Extent	822
Creating Scrollbars	823
Creating Lists	827
Handling Multiple List Selections	834
List Selection Modes	834

Displaying Images in Lists.....	835
Creating a Custom List Model.....	836
Creating a Custom List Cell Renderer.....	837
Handling Double Clicks in Lists.....	837
Drag and Drop Support.....	839
Creating a Table.....	842
Table Sorting and Filtering.....	845
Sorting Rows.....	845
Filtering Table Rows.....	847
Adding Rows and Columns to Tables at Runtime.....	849
Creating Trees.....	851
Adding Data to Trees.....	853
Handling Tree Events.....	855
Editing.....	857
Chapter 18: Swing—Combo Boxes, Progress Bars, Tooltips, Separators, and Choosers	859
<i>In Depth</i>.....	861
Combo Boxes.....	861
Progress Bars.....	861
Choosers.....	861
Tooltips.....	861
Separators.....	862
<i>Immediate Solutions</i>.....	863
Creating Combo Boxes.....	863
Handling Combo Box Selection Events.....	870
Creating Editable Combo Boxes.....	871
Adding Images to Combo Boxes.....	873
Creating a Combo Box Model.....	874
Creating a Combo Box Custom Renderer.....	874
Creating Progress Bars.....	875
Updating Progress Bars.....	879
Handling Progress Bar Events.....	880
Creating Tooltips.....	881
Creating Separators.....	883
Resizing Separators Automatically.....	885
Creating Color Choosers.....	887
Creating File Choosers.....	890
Creating File Chooser Filters.....	899

Table of Contents

Chapter 19: Swing—Layered Panes, Tabbed Panes, Split Panes, and Layouts903
***In Depth*..... 905**
Layered Panes..... 905
Tabbed Panes 905
Split Panes 905
Layouts..... 906
***Immediate Solutions*..... 907**
Understanding Swing Components and Z-order 907
Making Swing Components Transparent 908
Using Layered Panes 910
Creating Tabbed Panes..... 913
Specifying Tab Placement in Tabbed Panes..... 920
Using Split Panes..... 923
Making Split Panes One-Touch Expandable 928
Setting Split Pane Orientation 929
Setting Split Pane Divider Size..... 931
Using the Box Layout Manager 932
Using the Box Class..... 934
Using the Overlay Layout Manager..... 938

Chapter 20: Swing—Menus and Toolbars941
***In Depth*..... 943**
Menus 943
Toolbars 943
***Immediate Solutions*..... 944**
Creating a Menu Bar 944
Creating a Menu 946
Creating a Menu Item..... 950
Creating a Basic Menu System..... 954
Adding Images to Menus..... 956
Creating Checkbox Menu Items 958
Creating Radio Button Menus..... 960
Creating Submenus..... 963
Creating Menu Accelerators and Mnemonics 964
Enabling/Disabling Menu Items and Changing Captions at Runtime..... 966
Adding and Removing Menu Items at Runtime..... 968
Adding Buttons and Other Controls to Menus 969
Creating Pop-Up Menus 970

Creating Toolbars.....	975
Adding Combo Boxes and Other Controls to Toolbars.....	979
Chapter 21: Swing—Windows, Desktop Panes, Inner Frames, and Dialog Boxes	981
<i>In Depth</i>.....	983
Windows.....	983
Dialog Boxes.....	983
<i>Immediate Solutions</i>.....	984
Creating a Window.....	984
Creating a Frame Window.....	987
Creating a Desktop Pane.....	989
Creating Internal Frames	991
Using JOptionPane to Create Dialog Boxes	1001
Creating Option Pane Confirmation Dialog Boxes.....	1010
Creating Option Pane Message Dialog Boxes	1012
Creating Option Pane Text Field Input Dialog Boxes.....	1013
Creating Option Pane Combo Box Input Dialog Boxes.....	1014
Creating Option Pane Internal Frame Dialog Boxes	1015
Creating Dialog Boxes with JDialog.....	1016
Getting Input from Dialog Boxes Created with JDialog.....	1021
Chapter 22: Images and Animation	1023
<i>In Depth</i>.....	1025
Using Images.....	1025
Different Formats of Images.....	1025
Using ImageIcon class	1025
Understanding java.awt.geom Package	1026
<i>Immediate Solutions</i>.....	1027
Using Image Class.....	1027
Creating an Image.....	1027
Loading an Image	1027
Displaying an Image.....	1028
Drawing an Image Object.....	1029
Loading an Image Object	1034
ImageObserver	1034
MediaTracker Class	1036
ImageIcon Class.....	1038
Using ImageIcon in an Applet	1038
Getting Images in Java Applets	1039

Table of Contents

Drawing Images	1040
ImageObserver Interface.....	1043
Animation.....	1044
The Classes of geom	1045
Creating a Game using Class	1047
Collecting Your Images.....	1047
Organizing and Loading the Images in Your Applet	1047
Animating the Images.....	1048
Finishing Up	1051
Chapter 23: Inclusion of Sound	1055
<i>In Depth</i>	1057
Simple Sound Output.....	1057
Sound API Basics.....	1058
What Is Sampled Audio?	1058
Understanding MIDI	1059
What Is MIDI?.....	1059
MIDI Configurations	1059
Service Provider Interfaces	1060
<i>Immediate Solutions</i>	1062
Playing Sound.....	1062
Using a Clip.....	1063
Setting up the Clip for Playback.....	1063
Starting and Stopping Playback	1063
Playing Sounds with javax.sound	1064
Using a SourceDataLine	1068
Setting up the SourceDataLine for Playback.....	1068
Starting and Stopping Playback	1069
Monitoring a Line's Status.....	1071
Synchronizing Playback on Multiple Lines.....	1072
Processing the Outgoing Audio.....	1072
Streaming Sounds with javax.sound	1072
Sound Recording.....	1074
Setting up a TargetDataLine	1075
Reading the Data from the TargetDataLine	1076
Monitoring the Line's Status	1077
Processing the Incoming Audio	1077
Sound Events	1077
Introduction to Controls	1077
Getting a Line that has the Desired Controls	1079
Getting the Controls from the Line.....	1080

Using a Control to Change the Audio Signal	1080
Controlling a Line's Mute State	1081
Changing a Line's Volume	1081
Selecting among Various Reverberation Presets	1081
Manipulating the Audio Data Directly.....	1082
Reading Sound Files	1083
Writing Sound Files	1085
Converting File and Data Formats	1090
Converting from One File Format to Another	1090
Converting Audio between Different Data Formats.....	1092
What Conversions are Available?	1094
Working with MIDI	1094
A MIDI Refresher: Wires and Files.....	1096
Streaming Data in the MIDI Wire Protocol.....	1097
Sequenced Data in Standard MIDI Files.....	1098
The Java Sound API's Representation of MIDI Data.....	1098
MIDIMessage.....	1098
MIDIEvent.....	1098
Sequences and Tracks.....	1099
The Java Sound API's Representation of MIDI Devices	1099
The MidiDevice Interface	1099
Transmitters and Receivers.....	1100
Sequencers.....	1100
Synthesizers	1100
Chapter 24: Java and XML—Using the Document Object Model.....	1105
<i>In Depth</i>	1107
Document Object Model	1107
Writing XML Documents.....	1107
Valid and Well-Formed XML Documents	1111
Using XML for Java.....	1113
Java SE 6 and XML.....	1115
Java Architecture for XML-Web Service (JAX-WS) 2.0.....	1115
Java Architecture for XML Binding (JAXB) 2.0.....	1116
Java API for XML Processing (JAXP) 1.4	1116
Streaming API for XML	1116
XML Digital-Signature API.....	1116
<i>Immediate Solutions</i>	1117
DOM Interfaces and DOM Implementations	1117
XML for Java: Creating a DOMParser Object.....	1117

Table of Contents

Parsing an XML Document	1118
Getting the Parsed Document	1132
Displaying an XML Document	1136
Handling Document Nodes	1137
Handling Element Nodes	1138
Handling Attributes	1139
Handling Child Elements	1140
Handling Text Nodes	1141
Handling XML Processing Instruction Nodes	1142
Closing Elements	1143
Running the XML4JParser Application	1143
Navigating in XML Documents	1144
Creating a JAXP Application	1147
Chapter 25: Java and XML—Using the Simple API for XML	1151
<i>In Depth</i>	1153
Using the SAX Parser	1153
Immediate Solutions	1157
Creating a SAX Parser	1157
Registering an Event Handler with a SAX Parser	1172
Handling the Beginning of Documents	1173
Handling the Beginning of Elements	1174
Handling Attributes	1175
Handling Text Content	1177
Ignoring “Ignorable” White Space	1178
Handling the End of Elements	1178
Handling XML Processing Instructions	1179
Handling Errors and Warnings	1179
Running the XML4JSAXParser Application	1180
Creating a JAXP SAX Parser	1181
Chapter 26: Collections	1187
<i>In Depth</i>	1189
The Collection Interfaces	1189
The Collection Classes	1190
The Map Interfaces	1190
The Map Classes	1190

Immediate Solutions	1192
Using the Collection Interface	1192
Using the List Interface	1193
Using the Set Interface	1194
Using the SortedSet Interface	1195
Using the AbstractCollection Class	1196
Using the AbstractList Class	1197
Using the AbstractSequentialList Class	1198
Using the ArrayList Class	1199
Using the ArrayDeque Class	1202
Using the LinkedList Class	1205
Using the Generic Class	1208
Using the HashSet Class	1209
Using the TreeSet Class	1211
Using the Comparator Interface	1213
Using the Iterator Interface	1215
Using the ListIterator Interface	1216
Using the AbstractMap Class	1218
Using the HashMap Class	1219
Using the TreeMap Class	1223
Using the Arrays Class	1225
Enumeration Fundamentals	1231
The values() and valueOf() Methods	1233
Java Enumeration as Class Type	1234
Enumeration Inheriting Enum	1236
Using the Enumeration Interface	1238
Using the Vector Class	1238
Using the Stack Class	1242
Using the Dictionary Class	1243
Using the Hashtable Class	1244
Using the Properties Class	1247
Chapter 27: Creating Packages, Interfaces, JAR Files, and Annotations	1249
In Depth	1251
Creating Packages and Interfaces	1251
JAR Files	1251
The Core Java API Package	1251
New Java.lang Sub Packages	1253
Java.lang.annotation Sub Package	1253

Table of Contents

Java.lang.instrument Sub Package	1254
Java.lang.management Sub Package	1254
Java.lang.reflect Sub Package.....	1254
Annotation Basics.....	1254
Other Built-In Annotations.....	1255
@Retention Annotation	1256
@Documented Annotation	1256
@Target Annotation.....	1256
@Inherited Annotation.....	1257
@Override Annotation	1257
@Deprecated Annotation.....	1257
@SuppressWarnings Annotation	1257
Immediate Solutions.....	1258
Creating a Package.....	1258
Creating Packages that have Subpackages	1259
Creating an Interface.....	1260
Partially Implementing an Interface	1260
Extending Interface.....	1262
Using Interfaces for Callbacks.....	1262
Creating a JAR File.....	1263
Getting the Contents of a JAR File.....	1264
Extracting Files from a JAR File.....	1265
Updating JAR Files	1265
Reading from JAR Files in Code.....	1265
Using javac to Get Classes from JAR Files	1269
Letting Applets Get Classes from JAR Files	1270
Marker Annotations.....	1271
Single Member Annotations.....	1272
Chapter 28: Working with Java Beans	1273
In Depth.....	1275
What is Java Bean?	1277
Advantage of Java Beans	1278
Introspection	1278
Customizers.....	1278
Immediate Solutions.....	1279
Understanding Java Beans.....	1279
Designing Programs using Java Beans	1279
Creating Applets that use Java Beans	1281

Creating a Java Bean	1283
Creating a Bean Manifest File.....	1284
Creating a Bean JAR File.....	1284
Using a New Bean.....	1285
Adding Controls to Beans.....	1285
Giving a Bean Properties.....	1286
Design Patterns for Properties	1294
Simple Properties	1294
Adding a Color Property to SimpleBean	1294
Indexed Properties.....	1296
Design Patterns for Events.....	1296
Methods and Design Patterns	1296
Using the BeanInfo Interface.....	1296
Feature Descriptors.....	1297
Creating Bound Properties	1297
Giving a Bean Methods	1298
Giving a Bean an Icon.....	1300
Creating a BeanInfo Class	1300
Bound and Constrained Properties.....	1301
Persistence.....	1304
The Java Beans API.....	1304
Events Basics	1307
Using Java Beans Conventions	1308
Remote Notification and Distributed Notification	1308
Using Beans with JSP pages	1308
Chapter 29: Talking to Database	1309
<i>In Depth</i>	1311
What does JDBC Do?	1311
JDBC vs. ODBC and other APIs.....	1312
Two-tier and Three-tier Models.....	1313
Introducing SQL.....	1314
<i>Immediate Solutions</i>	1316
The JDBC Package.....	1316
Relating JDBC to ODBC.....	1316
Types of JDBC Drivers	1317
JavaSoft Framework.....	1318
Driver Interface and DriverManager Class.....	1319
Connection Interface.....	1320

Table of Contents

Statement Interface	1320
PreparedStatement Interface	1321
ResultSet	1321
ResultSetMetaData Interface	1334
DatabaseMetaData Interface	1334
The Essential JDBC program	1334
Import the java.sql package.....	1335
Load a JDBC Driver	1335
Establishing a Connection	1336
Create a Statement	1337
Execute the Statement	1337
Process the ResultSet	1337
Close the Statement	1338
Close the Connection.....	1338
Using a PreparedStatement Object.....	1339
When to use a PreparedStatement Object.....	1339
Creating a PreparedStatement Object.....	1339
Supplying Values for PreparedStatement Parameters	1339
Using a Loop to Set Values.....	1341
Return Values for the Method executeUpdate.....	1341
The Interactive SQL Tool	1343
Using Tables.....	1343
Understanding the TableModel Interface	1344
Defining a TableModel.....	1344
Chapter 30: JDBC in Action	1349
<i>In Depth</i>.....	1351
Data Types and JDBC	1351
Scrollable ResultSets	1352
Batch Updates	1353
Programmatic Updates	1353
Mapping Relational Data onto Java Objects	1354
Mapping SQL Types to Java Types.....	1354
Basic JDBC Data Types.....	1355
CHAR, VARCHAR, and LONGVARCHAR	1355
BINARY, VARBINARY, and LONGVARBINARY	1356
BIT	1356
TINYINT	1357
SMALLINT.....	1357
INTEGER.....	1357
BIGINT.....	1357
REAL.....	1357

DOUBLE	1358
FLOAT	1358
DECIMAL and NUMERIC	1358
DATE, TIME, and TIMESTAMP	1359
National Character Set Support	1360
Advanced JDBC Data Types	1361
BLOB Data Type	1361
CLOB Data Type	1361
ARRAY Data Type	1361
DISTINCT Data Type	1362
STRUCT Data Type	1362
REF Data Type	1362
JAVA_OBJECT Data Type	1362
Examples of Mapping	1363
Simple SQL Statement	1363
SQL Statement with IN Parameters	1363
SQL Statement with INOUT Parameters	1364
Custom Mapping	1365
New Features Introduced in JDBC 4.0	1366
Auto-Loading of JDBC Driver Class	1366
Enhancements in Connection Management	1366
Supporting for RowId SQL Type	1366
DataSet Implementation of SQL using Annotations	1366
Enhancements in SQLExceptions Handling	1367
Support for SQL XML	1368
Immediate Solutions	1369
The Statement and PreparedStatement Interface	1369
Modifying Data	1373
Database Queries	1374
The ResultSet	1378
Retrieving Column Data for Specified Data Types	1380
Working with Null Values	1380
Working with Special Data Types	1380
Date Type	1381
Time Type	1381
Timestamp Type	1381
Big Numbers Type	1381
Working with Streams	1382
Calling Procedure	1382
Handling Errors	1384
SQLWarning	1384
PreparedStatement Object	1386

Table of Contents

Batch Updates	1388
BLOBs and CLOBs	1390
Browsing a Database.....	1390
Load Driver	1390
Create Connection.....	1390
Create Statement () Method	1391
Execute SQL Statement and Return ResultSet	1391
Iterate ResultSet.....	1391
A Dynamic SQL Select Program.....	1392
Chapter 31: Understanding RMI	1397
<i>In Depth</i>.....	1399
Remote Method Invocation (RMI).....	1399
Client/Server Architecture.....	1400
Implementing RMI.....	1401
Limitation of RMI.....	1403
<i>Immediate Solutions</i>.....	1404
A Model RMI Transaction	1404
Writing an RMI Server	1404
Designing a Remote Interface	1407
Implementing a Remote Interface	1409
Declaring the Remote Interfaces.....	1410
Defining the Constructor	1410
Providing Implementations for Each Remote Method.....	1411
Passing Objects in RMI.....	1411
Implementing the Server's main Method.....	1412
Creating and Installing a Security Manager	1412
Making the Remote Object Available to Clients	1412
Creating a Client Program.....	1414
Compiling and Running the Example	1417
Compiling the Example Programs.....	1417
Building a JAR File of Interface Classes	1417
Building the Server Classes	1418
Building the Client Classes.....	1419
Running the Example Programs.....	1420
A Note about Security	1420
Starting the Server.....	1420
Starting the Client	1422
Exporting with UnicastRemote Object	1423
Exporting Activatable Objects.....	1424

Chapter 32: Understanding Servlet Programming.....	1429
<i>In Depth</i>.....	1431
What's New in Servlet 2.4?	1431
Upgraded Support for HTTP, J2SE, and J2EE	1432
New ServletRequest Methods.....	1432
RequestDispatcher Changes.....	1432
Listeners.....	1433
Session Changes	1433
Miscellaneous Clarifications	1434
Deprecations	1434
Schema	1434
What You Don't See?.....	1435
Overview of Servlets.....	1435
Using Servlets	1437
Servlet API.....	1437
Features of API.....	1437
What do Servlets Look Like?.....	1438
Servlet and Environment State	1438
Usage Modes.....	1438
Servlet Life-Cycle	1439
When Are Servlets Loaded?.....	1439
Primary Servlet Methods	1440
Servlet Security Features.....	1440
HTML-Aware Servlets	1441
HTTP-Specific Servlets	1442
Performance Features	1443
Three-Tier Applications	1444
Web Publishing System.....	1444
Package javax.servlet Description	1445
Generic Servlet Interfaces and Classes	1445
The javax.servlet Package	1446
The javax.servlet Interfaces	1446
The javax.servlet Exception Classes.....	1447
Servlet Configuration	1448
Creating an HTML File	1449
Creating a Servlet.....	1449
Creating a Web Application.....	1450
Deploying the Web Application.....	1451
Running the Web Application	1451
How the Application Works	1452
Client/Server Servlet Programming.....	1452

Table of Contents

HttpServletRequest and HttpServletResponse	1452
HttpServletResponse	1453
Immediate Solutions	1455
Servlet Life-Cycle	1455
The init() Method	1456
The service() Method	1457
The doGet(), doPost(), and doXxx() Methods	1458
The SingleThreadModel Interface	1458
The destroy() Method	1459
Understanding Response and Request	1459
The Role of Form Data	1459
Reading Form Data from Servlets	1460
Response Headers	1463
Response Redirection	1464
Response Redirection Translation Issues	1467
Auto-Refresh/Wait Pages	1468
HttpServletRequest	1469
Headers	1469
Form Data and Parameters	1471
File Uploading	1475
Using a File Upload API	1483
Request Delegation and Request Scope	1484
Chapter 33: Programming Concepts in C# 2005	1489
In Depth	1491
Java SE 6 and Scripting	1491
Java Scripting API	1491
Script Execution	1492
Binding	1492
Compilation	1492
Invocation	1492
Script Engine Discovery and Metadata	1492
Immediate Solutions	1492
Working with Script Engines	1494
Class ScriptEngineManager	1494
Interface ScriptEngineFactory	1495
Running Script	1498
Interface ScriptEngine	1498
Reading Script File	1500
Script Variables	1501
Using Bindings Interface	1503

Working with Invocable Interface	1504
Working with Compilable Interface.....	1507
Communicating from JavaScript to Java	1508
Working with Java Packages and Class	1508
Working with Java Arrays.....	1510
Implementing Java Interfaces	1511
Overload Resolution.....	1513
jrscript Tool.....	1514
Listing Installed Script Engines	1515
Selecting Script Engine.....	1515
Executing a Script File.....	1516
Executing Script in Interactive Mode	1516
Chapter 34: Introduction to Groovy	1517
<i>In Depth</i>.....	1519
Groovy	1519
Why Use Groovy?	1519
Features of Groovy	1520
Difference from Java	1521
<i>Immediate Solutions</i>.....	1522
Working with Groovy	1522
Installing Groovy	1522
Running Groovy.....	1522
Learning Groovy Syntax	1527
Groovy Statement	1528
Defining Variables	1528
Operators and Operator Overloading	1529
Control Structures.....	1531
Groovy Strings.....	1536
Regular Expression.....	1538
Groovy Collections.....	1542
Groovy Lists.....	1542
Groovy Maps.....	1543
Groovy Ranges	1544
Closures	1545
Semantics of Closure	1546
Fixing Closure Arguments	1547
Groovy Functions.....	1547
Advance Groovy	1549
GroovyBeans.....	1549
File I/O	1550

Table of Contents

Groovy Markup.....	1551
Groovlets	1553
Chapter 35: MXBeans and JMX	1555
<i>In Depth</i>.....	1557
Java Management Extensions (JMX).....	1557
Why Use JMX Technology?.....	1558
The JMX API	1558
JMX Architecture.....	1559
Instrumentation Level.....	1560
Agent Level.....	1561
Distributed Services Level.....	1561
MBean Instrumentation	1562
Standard MBean.....	1563
DynamicMBean.....	1564
Generic Operation Invoker.....	1570
Running the DynamicMBean Example	1571
Comparison with the Standard MBean.....	1572
DynamicMBean Execution Time	1572
MXBeans.....	1573
JMX in J2SE 5 and Java SE 6	1573
<i>Immediate Solutions</i>.....	1574
Working with MBeans.....	1574
Running the Standard MBean Example.....	1574
Running MXBean Example	1578
Using @DescriptorKey	1581
And That's It!	1583
What's on the CD-ROM.....	1584
