

CONTENTS

Chapter 1 ■ Introduction to Oracle 10g		1
Understanding the Oracle 10g Database		2
Features of Oracle 10g		2
Architecture of Oracle 10g		7
Installing the Oracle 10g Database		15
System Requirements		15
Installing Oracle 10g using the Universal Installer		16
Upgrading to Oracle 10g Database		27
Manual Upgrade		27
Upgrading to Oracle 10g using DBUA		28
Tools for Administration of Oracle 10g Database		33
Server Manager		33
Oracle Enterprise Manager		35
Summary		35
Chapter 2 ■ Working with Oracle 10g Database		37
Creating the Database		38
Creating Database with DBCA		38
Configuring a Database		46
Configuring a Database using DBCA		46
Configuring a Database using OEM		52
Dropping the Database		64
Deleting the Database		65
Working with Parameter files		66
Starting and Stopping the Database		67
Starting and Stopping the Database Using Enterprise Manager		67
Starting and Stopping the Database Using SQLPLUS		67
Defining the Alert Files		68
Summary		69
Chapter 3 ■ Administering Tablespaces and Schemas		71
Administering Tablespaces		72
Creating Tablespaces		72
Deleting a Tablespace		77
Editing a Tablespace		77
Retrieving the Tablespace Information		78
Space Management with Tablespaces		78
Administering Schema Objects		81
Creating a New Schema Object		82

Working with Existing Schema Objects.....	90
Summary	94
Chapter 4 ■ Securing the Oracle 10g Database	95
Privileges in Oracle 10g.....	96
Managing Database with Users and Privileges.....	96
Creating Users.....	97
Creating Roles.....	100
Granting and Revoking Database Privileges.....	103
Controlling the Resources Access.....	107
Working with the Default User Account.....	108
Implementing Password Policy.....	109
Inspecting the Database	110
Summary	111
Chapter 5 ■ Database Management with PL/SQL	113
Implementing the Database Interface	114
Using the INSERT, DELETE, and UPDATE Statement	115
INSERT Statement.....	116
DELETE Statement	117
UPDATE Statement	117
Triggers.....	118
Types of Triggers	118
Creating Triggers	119
Summary	123
Chapter 6 ■ Oracle Net Services	125
Oracle Net Services	126
Features of Oracle Net Services.....	126
Naming Methods	127
Enhanced Performance	128
Using The Oracle Enterprise Manager.....	128
The Dispatcher.....	129
The Oracle Connection Manager	129
Configuring the Net Services	129
Configuring the Client Connection.....	129
Summary	140
Chapter 7 ■ Monitoring and Tuning the Oracle 10g Database	141
Monitoring the Database Aspects	142
Tuning the Database Areas.....	142

Monitoring using the ADDM	143
Running ADDM using OEM	143
Running ADDM using Command Prompt	153
Using the UTLBSTAT.SQL and UTLESTAT.SQL files	155
Using the Statspack	156
Creating the perstat Tablespace	156
Running the spcreate Script	156
Testing the Statspack installation	157
Working of Statspack	157
Implementing the OEM-Tuning Pack	158
Using SQL Tuning Advisor	159
Running SQL Access Advisor	163
Managing AWR	168
Accessing AWR through OEM	169
Managing AWR using DBMS_WORKLOAD_REPOSITORY package	171
Using OEM to View AWR Report	172
Using SQL Scripts to Generate AWR Report	174
Summary	177
Chapter 8 ■ Database Consistency and Concurrency 179	
Undo Management	180
Configuring Undo Management	180
Monitoring Undo Management	187
Working with Undo Tablespaces	189
Working with Lock Conflicts	199
Locks and Transactions	199
Various Modes of Locking	199
Resolving Lock Conflicts	200
Deadlock Management	200
Summary	201
Chapter 9 ■ Backup and Recovery in Oracle 10g 203	
Types of Database Failure	204
Media Failure	204
Statement Failure	204
Process Failure	204
Instance Failure	205
User Error	205
Types of Database Backups	205
Data that need to be backed up	206
Datafiles	206
Control Files	207
Archived Redo log	208

Archivelog Mode.....	208
Noarchivelog Mode	209
Backing up the data	209
Monitoring the Flash Recovery area	209
Creating Full Backup.....	215
Creating Incremental Backup.....	220
Recovery of the Data.....	222
Recovery Strategies	222
Crash Recovery	222
Instance Recovery	223
Using the Recovery Manager (RMAN).....	223
Recovery using SQL commands.....	228
Summary	230
