Preface	xiii

BLOCK 1 :: Introduction to Database Management System

Chapter 1: Introduction to DBMS.....	3
1.1 Data versus Information	3
1.2 Record	5
1.3 The File System.....	5
Limitations of File-Based System	6
1.4 The Evolution of Database	6
1.5 Defining a Database.....	8
1.6 Entities and Relationships	9
1.7 Data Models	10
1.8 Database Design	10
1.9 Types of Databases	11
Distributed Database	11
Object-Oriented Database.....	12
Temporal Database	12
Multimedia Database	13
Deductive Database	13
Semantic Database	14
Mobile Database.....	14
1.10 Transaction Management.....	15
1.11 Database Recovery and Security	16
Summary.....	16
Exercise	17
Multiple Choice Questions	17
Subjective Type Questions.....	18
Chapter 2: Database System Architecture	19
2.1 Data Abstraction	19
Physical or Internal Data Abstraction	20
Logical or Conceptual Data Abstraction	20
View or External Data Abstraction	21

2.2	Schemas, Sub-Schemas, and Instances	21
2.3	The Logical Database Architecture.....	22
	Data Independence	22
	Mapping	23
2.4	Physical DBMS Architecture	23
	DML Precompiler	24
	DDL Compiler	24
	File Manager	24
	Database Manager.....	25
	Components of a Database Manager	25
	Query Processor	26
	Data File, Indices, and Data Dictionary	27
	Database Administrator: Function and Responsibility.....	29
2.5	Data Models	29
	Object-Based Model.....	30
	Record-Based Logical Model.....	33
	Summary.....	36
	Exercise	36
	Multiple Choice Questions	36
	Subjective Type questions	38

BLOCK 2 :: Database Design and Implementation

Chapter 3: Relational Database Design.....	41
3.1 Guidelines to Database Design	42
3.2 Data Models	42
3.3 Generalization Hierarchy – Subtypes and Supertypes	42
Subclasses and Superclasses	43
3.4 Extended ER Features	44
Specialization	44
Generalization	45
Constraints on Specialization and Generalization	47
EER Diagrams	50
Attribute Inheritance	50
Example of Categories (UNION TYPES)	52
3.5 Functional Dependency Theory and Normalization	53
Objectives of Functional Dependency and Normalization	53
Designing a Database Schema	53
Functional Dependencies	55
Normal Forms	56
3.6 Multivalued Dependency	62
Formal Definition	63

	Example of Multivalued Dependency	63
	The Fourth Normal Form.....	64
	Decomposition of a Relation to 4NF	64
3.7	Join Dependency and 5NF.....	66
	Example of Join Dependency and 5NF.....	66
3.8	Domain/Key Normal Form	69
3.9	Inclusion Dependencies.....	70
	Inference Rules for INDs.....	70
	Keys, BCNF, and Key-Based INDs.....	71
	Circular and Noncircular Sets of INDs	71
	Inclusion Dependency Normal Form	71
3.10	Template Dependencies	71
	Tuple Generating Templates	72
	Constraint Generating Templates.....	72
3.11	Modeling Temporal Data	72
	Using a Standard Database.....	72
3.12	Sixth Normal Form	75
	Summary	76
	Exercise	76
	Multiple Choice Questions	76
	Subjective Type Questions.....	78
Chapter 4:	Introduction to Query Languages	81
4.1	An Introduction to Relational Algebra	81
	Basic Operations in Relational Algebra	82
	Extended Relational Algebra.....	89
4.2	Relational Calculus	96
	Introduction to Predicate Calculus	97
	Types of Relational Calculus	97
4.3	Introduction to SQL.....	100
	Defining SQL	100
	SQL Dates	123
	SQL Working with NULL Values	124
	SQL Functions	125
	The GROUP BY Statement.....	130
	The HAVING Clause	132
	SQL Special Functions	133
	SQL Alias	138
	SQL Join	139
	The SQL UNION Operator	149
	Sub-Queries	151
	Data Control Language.....	151

4.4	Comparison on Relation Algebra and SQL.....	154
	Summary	156
	Exercise	156
	Multiple Choice Questions	156
	Subjective Type Questions	158
Chapter 5:	Advanced SQL and PL/SQL.....	163
5.1	Views and Assertion	164
	Views	164
	Assertion	165
5.2	Introduction to Materialized Views	166
5.3	Summary Management	166
5.4	Components of Summary Management.....	167
	Schema Requirements	167
	Dimensions	167
	Materialized Views.....	169
	Query Rewrite	170
5.5	SQL Access Advisor	171
5.6	PL/SQL – A Basic Introduction.....	172
	Need for PL/SQL	172
	PL/SQL Code Structure.....	173
	Cursor	174
	Triggers.....	179
5.7	Functions and Procedures.....	181
	Statements in Procedures	182
	Procedures.....	182
	Executing a Stored Procedure.....	183
	PL/SQL Compilation Errors	184
	PL/SQL Compilation Errors Executing SHOW ERRORS.....	184
	Dependencies andProcedures	184
	Uses of Procedures	185
	Functions.....	185
5.8	Packages	186
	Public and Private Package Constructs	186
	Storing Packages in Database.....	187
	Creating a Package Specification and Body	187
	Verifying Procedure Validity and Executing It.....	189
	Benefit of Using Packages	189
5.9	Synonyms	189
5.10	Sequences	191
	Creating a Sequence	192
	Dropping a Sequence	192

Using a Sequence	192
5.11 Database Links	193
5.12 Embedded SQL and Dynamic SQL	193
The JAVA Way to Access RDBMS: JDBC	196
JDBC Drivers and Connections	196
Creating JDBC Statements	197
Creating JDBC PreparedStatement	197
JDBC Query and Retrieving Answers	198
JDBC Update	198
Transaction and Connections	199
5.13 SQLJ	200
SQLJ and Java	200
Embedded SQLJ	200
SQLJ Translator	200
SQLJ Runtime Environment	201
SQLJ Profiles	201
Developing Applications Using SQLJ	201
Benefits of SQLJ	201
Codes	201
5.14 Case Study: Bus Ticket Booking System	205
The Problem	205
Objectives	205
Preliminary Ideas	205
The Feasibility Study	206
Requirement Analysis and Specification	206
Entity Relationship Diagram	207
Database Design	208
Data Flow Diagram	209
Codes	211
Code Snippets	212
Code Snippets	213
Code Snippets	214
Code Snippets	215
Summary	216
Exercise	217
Multiple Choice Questions	217
Subjective Type Questions	219
Chapter 6: Database Implementation and Tools	221
6.1 Information System and Organization	221
6.2 Data Design and Implementation in an Organization	222

6.3	Unified Modeling Language	223
	Use of UML and Its Support for Database Design Specifications	224
	Object Modeling Notations and Basic Concepts.....	224
6.4	Structural Diagrams	229
	Class Diagram	229
	Object Diagram	229
	Component Diagram	229
	Deployment Diagram	230
6.5	Behavioral Diagrams.....	230
	Use-Case Diagram	231
	Interaction Diagram	231
	Activity Diagram.....	233
	Statechart Diagram.....	234
6.6	Object-Oriented Analysis	234
	Requirements Analysis.....	235
	Case Study – Hotel Management System.....	236
6.7	Class Diagram and Relationships between Classes.....	244
	Relationships between Classes Revisited	245
	UML to Schema Conversion.....	246
6.8	UML-Based Design Tools	247
6.9	Automated Database Design Tools	248
	Summary.....	248
	Exercise	248
	Multiple Choice Questions	248
	Subjective Type Questions.....	251

BLOCK 3 :: DBMS Advanced Features and Distributed Database

Chapter 7: Database System Catalogs.....	257
7.1 Relational DBMS Catalog.....	258
7.2 System Catalog in Oracle	258
7.3 Data Dictionary and Data Repository System.....	262
7.4 Catalog management in Distributed Systems.....	262
Content of Catalogs	263
Distribution of Catalogs	263
7.5 Role of System Catalog in Administration.....	264
Summary.....	264
Exercise	265
Multiple Choice Questions	265
Subjective Type Questions.....	266

Chapter 8: Query Compiler	267
8.1 Query Compiler	267
8.2 Parsing	268
8.3 Generating Logical Query Plan from Parse Tree	272
Preprocessor Activity	273
Logical Query Plan Generator	274
8.4 Modifying the Logical Plan with Algebraic Transformation Rules	278
8.5 Generation of Physical Query Plan from Logical Query Plan	278
8.6 Coping with System Failures	279
8.7 Undo Logging, Redo Logging, and Undo/Redo Logging	279
8.8 Protecting Against Media Failure	280
Summary	280
Exercise	280
Multiple Choice Questions	280
Subjective Type Questions	283
Chapter 9: Query Processing and Evaluation	285
9.1 Introduction to Physical-Query-Plan Operators	286
9.2 Measures of Query Cost	289
9.3 Selection Operation	290
Selection Algorithms for Simple Search	290
Selection Operation for Complex Search	292
9.4 Sorting Operation	293
9.5 Join Operation	295
Nested Loop Join	296
Block Nested Loop Join	297
Single Loop Join	298
Merge Join	298
Hash Join	299
Hybrid Hash Join	301
Computation of Cost for Joining Operations Using Examples	301
9.6 Other Operations	303
Complex Join	303
Project Operation	303
Set Operation	304
9.7 Evaluation of Query	304
Materialization-Based Approach	305
Pipeline-Based Approach	305
9.8 Transformation of Relational Expressions in Query Optimization	306
Transforming Relational Algebra Expression into Query Tree	306
Transforming Relational Calculus Expression into Query Graph	307
9.9 Heuristic Optimization	308

9.10	Estimating Statistics of Expression	310
	Catalog Information Required for Cost Estimation	310
	Cost Estimation for Selection Operation	311
	Cost Estimation for Join Operation	312
	Cost Estimation for Other Operations	313
9.11	Transformation Rule.....	313
	Example of Transformation Rule.....	315
9.12	Choice of Evaluation Plans	316
	Cost-Based Optimization	317
	Heuristic Optimization	317
9.13	Views and Query Processing	318
9.14	Storage and Query Optimization	319
	Summary	319
	Exercise	319
	Multiple Choice Questions	319
	Subjective Type Questions.....	321
Chapter 10:	Transaction Management and Recovery	323
10.1	Defining a Transaction in DBMS	324
	ACID Property	325
	State of Transaction.....	325
10.2	Defining a Concurrent Transaction in DBMS	326
	Schedule in Transaction	327
	Problems in Concurrent Transaction	329
10.3	Serializability and Recoverability	331
	Defining Serializability	331
	Conflict Serializability	333
	View Serializability	334
	Precedence Graph and Serializability	335
	Defining Recoverability.....	337
	Cascading Rollback	337
10.4	Enhanced Lock-Based and Timestamp-Based Protocols	338
	Lock-Based Protocol	338
	Two-Phase Locking Protocol	342
	Timestamp-Based Protocol	344
	Defining Timestamp.....	344
10.5	Multiple Granularity.....	346
	Multiple-Granularity Locking Protocol	347
10.6	Multi-Version Schemes	349
	Multi-Version Timestamp-Based Protocol.....	349
	Multi-Version 2PL Protocol	350
10.7	Optimistic Concurrency Control Techniques	351

10.8	Deadlock Handling	353
	Causes of Deadlock.....	354
	Deadlock Prevention	354
	Deadlock Detection.....	356
10.9	Recovery in DBMS.....	357
	Recoverability.....	357
	Types of Failure	358
	Methods to Control Failures	359
	Different Techniques of Recoverability.....	359
10.10	Write-Ahead Logging Protocol.....	364
10.11	Advanced Recovery Techniques	364
	Shadow Paging.....	364
	Fuzzy Checkpoints.....	365
	ARIES	365
10.12	Use of SQL in Recovery	367
10.13	RAID	368
	RAID 0.....	369
	RAID 1.....	369
	RAID 3.....	370
	RAID 4.....	371
	RAID 5.....	371
	RAID 6.....	372
	Summary	373
	Exercise	373
	Multiple Choice Questions	373
	Subjective Type Questions.....	375
Chapter 11: Database Security and Authorization	377	
11.1	Discretionary Access Control.....	377
	Request Modification	379
11.2	Mandatory Access Control	380
	Bell-La Padula Model	380
	Multilevel Secure Database Management Systems.....	381
11.3	Audit Trails in Databases	382
	Database Audit Trail Contents	383
11.4	Statistical Databases	384
	Security in Statistical Databases	384
11.5	Data Encryption	385
	Substitution Ciphers	385
	Transposition Ciphers	386
	Symmetric – Key Algorithms	386
	The Advanced Encryption Standard	388

Public-Key Algorithms.....	390
RSA Algorithm	390
Summary.....	391
Exercise	392
Multiple Choice Questions	392
Subjective Type Questions.....	393
Chapter 12: Distributed Database	395
12.1 Differences between Centralized DBMS and Distributed DBMS	396
12.2 Functionality of DDBMS	397
12.3 Advantages and Disadvantages of DDBMS	397
12.4 Centralized versus Non-Centralized Databases.....	398
12.5 Homogeneous and Heterogeneous DDBMS and Their Comparison.....	399
12.6 Architecture of DDBMS.....	400
Client-Server DDBMS Architecture	400
Peer-to-Peer Architecture.....	401
12.7 Distributed Data Storage	402
Replication of Data	403
Fragmentation of Data	403
Hybridization (Combination of Both Replication and Fragmentation) of Data	406
12.8 Transparency Issue in DDBMS.....	406
Network Transparency	407
Replication Transparency	407
Fragmentation Transparency	407
12.9 Distributed Database Design and Query Processing in DDBMS	407
12.10 Distributed Transaction Management	410
12.11 Distributed Commit Protocols: 2PC and 3PC	411
Two-Phase Commit Protocol	411
Three-Phase Commit Protocol	412
Difference between 2PC and 3PC	413
12.12 Distributed Concurrency Control.....	414
Single-Lock Manager Approach.....	414
Distributed Lock Manager Approach	415
12.13 Distributed Deadlock Management	416
Distributed Deadlock Detection	416
Distributed Deadlock Prevention.....	418
12.14 Concepts of Replication Servers.....	419
Summary.....	420
Exercise	420
Multiple Choice Questions	420
Subjective Type Questions.....	422

BLOCK 4 :: Enhanced Database Models

Chapter 13: Object-Oriented Database.....	425
13.1 Limitations of Relational Database.....	425
13.2 Need for Complex Datatype.....	428
Collection and Large Object Types	428
13.3 Collection Types and Structured Types.....	430
13.4 Data Definition	431
Objects	431
Object Classes	431
Abstraction	431
Inheritance.....	431
Object Identity and Reference Types	435
Defining a Schema	437
13.5 Persistent Programming Languages	437
Persistence of Objects.....	438
13.6 Object-Oriented versus Object-Relational Databases.....	438
Summary.....	439
Exercise	440
Multiple Choice Questions	440
Subjective Type Questions.....	441
Chapter 14: Database and XML.....	443
14.1 XML Background	443
14.2 Structured, Semi-Structured, and Unstructured Data	446
14.3 XML Hierarchical Model.....	446
Hierarchical Data Model	447
XML Hierarchical Tree Data Model	447
14.4 DTD and XML Schema	448
Internal DTD and External DTD.....	449
Building Blocks of XML.....	449
Declaring Attributes.....	450
Complete Example of Internal DTD and External DTD.....	454
14.5 XML Schema.....	457
XML DTD versus XML Schema	457
XSD	457
14.6 XML Namespace	458
14.7 XML Query and Transformation.....	459
XPath	459
XSLT	460
XQuery	462
14.8 Storage of XML data.....	463

14.9 XML Database Applications.....	465
Retrieving Data from XML.....	466
Create an XML Document.....	466
To Add a New Element in the XML File	466
To Update Data in the XML File.....	467
Summary.....	467
Exercise	468
Multiple Choice Questions	468
Subjective Type Questions.....	469

BLOCK 5 :: Emerging Trends and Example DBMS Architectures

Chapter 15: Emerging Database Models, Technologies, and Applications-I.....	473
15.1 Introduction.....	473
15.2 The Emergence of Multimedia Database	474
The First Boom of Emergence	474
The Second Boom of Emergence	474
15.3 Multimedia Data.....	475
15.4 Differentiating Multimedia Data from Other Types of Data.....	475
15.5 Types of Multimedia Database.....	476
Linked Multimedia Databases	476
Embedded Multimedia Databases	476
15.6 Multimedia Databases	476
15.7 Structure of Multimedia Database	477
Data Analysis	477
Data Modeling.....	477
Data Storage	477
Data Retrieval.....	477
Query Language	478
Learning How to Save Image Data from a File to a Database.....	478
Multimedia Communication	480
15.8 Deductive Databases	481
15.9 GIS and Spatial Database	481
15.10 Knowledge Database	481
Knowledge-Based Systems.....	482
Knowledge Engineering	483
Semantic Database	483
Semantic Database and Relational Database	483
Benefit of Semantic Database	484
Semantic Data Model.....	485
Categorization of Objects	485
Binary Relations	486

Non-Binary Relation.....	487
Attributes	487
SBM Schema	487
SBM Query.....	488
Semantic Web	488
15.11 Information Visualization	489
15.12 Information Visualization versus Graphical Presentation.....	489
Advantage of Information Visualization	490
Aspects of Information Visualization	490
15.13 Gnome Database	493
SQLite.....	493
Libgda	494
Summery.....	494
Exerice	495
Multiple Choice Questions	495
Subjective Type Questions.....	496
Chapter 16: Emerging Database Models, Technologies, and Applications-II.....	497
16.1 Wireless Networks and Databases	497
Mobile Database.....	498
16.3 Personal Database.....	502
16.4 Digital Libraries.....	504
16.5 Web Databases	505
16.6 Case Study on Web Databases.....	507
Introduction to J2EE – An Overview of Technology.....	507
Introduction to Java Servlets	512
Creating Java Servlet Applications Using Eclipse IDE.....	521
Creating Java Servlet Applications Using Ant Deployer and JBOSS Server	530
16.7 Case Study 1	537
Objectives for the Library Automation System	537
Preliminary Ideas of the Library Automation System	537
The Feasibility Study of the Library Automation System	538
Requirement Analysis and Specification of the Library Automation System	538
Design of the Library Automation System – High Level and Low Level.....	538
Entity Relationship Diagram of the Library Automation System	539
Data Flow Diagram of the Library Automation System.....	542
16.8 Case Study 2.....	552
Objectives of the Hotel Reservation System.....	552
Preliminary Ideas of the Hotel Reservation System.....	552
The Feasibility Study of the Hotel Reservation System	553
Requirement Analysis and Specification of the Hotel Reservation System.....	553
Design of the Hotel Reservation System – High Level and Low level – ER DIAGRAM	553

Database Design for the Hotel Reservation System	555
Context Diagram of the Hotel Reservation System	556
Data Flow Diagram of the Hotel Reservation System	556
Codes	557
16.9 Case Study 3.....	567
Statement of Project Scope and Objectives	567
The Problem	567
Objectives	568
Scope	568
Initial Ideas	568
Design of the Case Study	568
Entity Relationship Diagram of the Case Study	570
Relational Database Design from ERD	572
Coding	573
Steps to Create a New Project Using Visual Studio 2008	574
Using Oracle as a Database with ASP.NET 3.5	586
Using Oracle Client Object to Connect to an Oracle Database	588
Oracle Date Format.....	590
Points to Note.....	592
Updating an Employee Details	592
Points to Remark	594
Deleting an Employee Record Using SQL Query.....	594
Using Oracle Stored Procedure	597
Summary.....	600
Exercise	601
Multiple Choice Questions	601
Subjective Type Questions.....	602
Appendix A: Data Warehousing	603
Appendix B: Data Mining.....	613
Appendix C: Data Grid and Its Application	623
Appendix D: Hashing and Lookup Table	639
Bibliography	642
Index	649
What's on the CD ROM	660
