

Table of Contents

Introduction	xxv
Chapter 1: Java EE 5: An Overview	1
Section A: Introduction to Java	3
Evolution of Java.....	3
Starting with Java.....	4
Section B: Enterprise Architecture	7
Enterprise Architecture Types.....	7
Single-Tier Architecture.....	7
2-Tier Architecture.....	7
3-Tier Architecture.....	9
The n-Tier Architecture.....	10
Aim of Enterprise Applications.....	12
Section C: Introducing the Java EE Platform	14
Features of the Java EE 5 Platform.....	14
Platform Independence.....	15
Managed Objects.....	15
Reusability.....	15
Modularity.....	15
Easier Development.....	15
Simplified EJB.....	15
Enhanced Web Services.....	15
Support for Web 2.0.....	16
Exploring the Java EE 5 Platform.....	16
The Runtime Infrastructure.....	16
The Java EE 5 APIs.....	16
Exploring Architecture of Java EE 5.....	19
Describing Java EE 5 Containers.....	20
Container Types.....	21
Java EE 5 Container Architecture.....	21
Developing Java EE 5 Applications.....	23

Table of Contents

Exploring Probable Java EE Application Architectures	24
Application Development and Deployment Roles	26
Exploring the Application Development Process	26
Compatible Products for the Java EE Platform	28
Section D: Snapshot of Java EE Related Technologies	30
Java Database Connectivity	30
Servlet	30
JavaServer Pages	31
Java Server Faces	31
JavaMail	31
Enterprise JavaBeans	31
Hibernate	31
Seam	32
Java EE Connector Architecture	32
Web Services	32
Struts	32
Spring	33
JAAS	33
AJAX	33
Summary	33
Quick Revise	33
Chapter 2: Web Applications and Java EE 5	35
Exploring the HTTP Protocol	37
How Does HTTP Work?	37
Describing HTTP Requests	39
Describing the HTTP Responses	42
Introducing Web Applications	43
Describing Components of a Web Application	44
Describing Structure /Modules of Web Applications	47
Describing Web Containers	48
Exploring Web Architecture Models	49
Describing the Model-1 Architecture	49
Describing the Model-2 Architecture	50
Exploring the MVC Architecture	51
Describing the Model Component	52
Describing the View Component	53
Describing the Controller Component	53
Summary	53
Quick Revise	53
Chapter 3: Java Database Programming (JDBC)	57
Introduction to JDBC	59

Components of JDBC.....	59
JDBC Specification	60
JDBC Architecture.....	60
JDBC Drivers.....	61
Describing the Type-1 Driver	62
Describing the Type-2 Driver(Java to native API)	63
Describing the Type-3 Driver (Java to Network Protocol/ All Java Driver).....	64
Describing the Type-4 Driver (Java to Database protocol)	65
Features of JDBC.....	66
New Features in JDBC 4.0.....	68
Describing the JDBC API's	69
The java.sql Package	69
The javax.sql Package	73
Describing the Major Classes and Interfaces.....	75
Understanding the DriverManager Class.....	75
Understanding the Driver Interface.....	76
Understanding Connection Interface	77
Understanding the Statement Interface.....	80
Implementing JDBC Processes with java.sql Package	84
Basic JDBC Steps	84
Creating a Simple JDBC Application.....	88
Working with the PreparedStatement Interface	92
Working with the CallableStatement Interface	98
Working with ResultSets.....	107
Working with Batch Updates	119
Describing SQL 99 Data Types	124
Implementing JDBC Processes with the javax.sql Package.....	142
Using DataSource to Make a Connection.....	143
Describing Connection Pooling.....	143
Using RowSet Objects.....	148
Working with Transactions.....	164
Describing ACID Properties	164
Types of Transactions	165
Performing Transaction Management.....	165
Summary.....	168
Quick Revise.....	169
Chapter 4: Understanding Servlet Programming.....	171
What's New in Servlet 2.5?.....	173
Features of Java Servlets	174
Servlet - A Request and Response Model.....	174
Servlet and Environment State	175
Security Features	177

Table of Contents

HTML-Aware Servlets.....	178
HTTP-Specific Servlets	178
Performance Features	179
3-Tier Applications.....	180
Web Publishing System.....	181
Servlet API.....	181
The javax.servlet Package.....	182
The javax.servlet.http Package	184
Servlet Life-Cycle.....	186
The init() Method	186
The service() Method	187
The destroy() Method	188
Servlet Configuration.....	188
Servlet Configuration in web.xml	189
Working with ServletConfig and ServletContext.....	190
Creating a Sample Servlet.....	191
Directory Structure.....	192
Configuring the Servlet	193
Packaging, Deploying and Running the Web Application.....	193
Working with HttpServletRequest and HttpServletResponse	195
HttpServletRequest	195
HttpServletResponse	206
Request Delegation and Request Scope.....	213
Servlet Collaboration.....	217
Collaboration through the System Properties List.....	217
Collaboration through a Shared Object.....	218
Collaboration through Inheritance	227
Summary.....	229
Quick Revise.....	229
Chapter 5: Handling Sessions in Servlets	233
What is a Session?.....	235
Introducing Session Tracking	235
Session Tracking Mechanisms	236
Cookies	236
Hidden Form Fields.....	241
URL Rewriting.....	241
Session using Secure Socket Layer (SSL).....	244
Session Tracking and Java Servlet API	245
History of Session Tracking.....	245
Session Creation and Tracking.....	245
Login Application using Session Tracking.....	255
Directory Structure of Login Application	255

Building the Front-End.....	256
Creating and Managing Session.....	257
Configuring the Login Application	260
Running the Login Application.....	260
Summary.....	262
Quick Revise.....	262
Chapter 6: Event Handling in Servlets	265
What are Events?	267
What is Event Handling?.....	267
Types of Servlet Events.....	268
Servlet Context Level Events	268
Servlet Session Level Events.....	278
Online Store Application	286
Creating CartContextListener for an Online Store	291
Building Front-end of Online Store	293
Summary.....	300
Quick Revise.....	300
Chapter 7: Understanding Java Server Pages (JSP)	303
Overview of JSP Technology.....	305
Architecture of JSP page	305
JSP Model I architecture	306
JSP Model II architecture.....	306
Understanding the JSP Page Lifecycle.....	307
Page Translation.....	307
Page Compilation.....	307
Loading & Initialization Stage.....	307
Request Handling Stage	308
Destroying Stage	308
JSP Elements.....	309
Directives.....	309
Scripting Elements	315
Actions elements	316
Implicit Objects.....	334
Comments	335
The JSP Expression Language.....	336
Syntax of Expressions in JSP Pages – \${} vs. #{}	336
Accessing Variables	338
EL OPERATORS.....	339
Functions	341
Implicit Objects Available in the EL	343
Disabling Scripting Elements.....	344

Table of Contents

Invalid EL Expressions and Deactivating EL Evaluation	344
Warnings, Errors	344
Resolution of Variables and Their Properties.....	345
Automatic Type Conversion.....	345
Default Values	345
Handling Errors.....	346
Debugging with JspDebug	347
Performance	347
Buffering.....	347
Precompiling.....	348
Using JSP Best Practices	349
Elimination of Scriptlets	349
Use the MVC Pattern and Frameworks	349
Place Business Logic in JavaBeans	350
Use Existing Custom Tag Libraries.....	350
Use Custom Actions	350
Use of Template.....	350
Use the Correct Inclusion Mechanism.....	351
Use Common Configuration Settings.....	351
Be User-Friendly and Use JSP Exception Mechanism.....	351
Be Page Designer-Friendly, and Use JSP Comments.....	351
Take Advantage of Validation.....	352
Make Your Pages Readable.....	352
Summary.....	352
Quick Revise.....	352
Chapter 8: Implementing JSP Tag Extensions.....	355
Overview of Tag Extensions	357
Elements of Tag Extensions.....	358
The TLD File	358
The taglib Directive.....	358
The Tag Handler.....	359
Tag Extension API	359
The Tag Interface.....	360
JspTag Interface	361
IterationTag Interface	361
TagSupport Class	362
BodyTag Interface	363
BodyContent Class.....	364
BodyTagSupport Class	364
DynamicAttributes Interface	365
SimpleTag Interface	366
SimpleTagSupport Class	367

TagAdapter Class	368
TagLibraryInfo Class	368
TagInfo Class	370
TagFileInfo Class.....	371
TagAttributeInfo Class	372
TagExtraInfo Class	373
PageData Class	373
VariableInfo Class	374
TagData Class	375
TagLibraryValidator Class.....	376
ValidationMessage Class.....	377
Classic Tag Handlers.....	377
Life-Cycle of Classic Tag Handlers	377
Implementing Classic Tags	378
Simple Tag Handlers.....	382
Life Cycle of Simple Tag Handlers	383
Implementing Simple Tag Handler	383
JSP Fragments	386
Creation of a JSP Fragment	386
Invocation of a JSP Fragment.....	386
JspFragment Class.....	387
Understanding Tag Files.....	387
Handling Dynamic Attributes in Tag Files	388
Exporting Variables from a Tag File to a JSP Page	388
Using Attributes to Provide Names for Variables	388
Invoking JSP Fragments from Tag Files	389
Summary.....	390
Quick Revise.....	390

Chapter 9: Implementing JavaServer Pages Standard Tag Library (JSTL) 393

Introducing JSTL.....	395
Features of JSTL.....	395
Tag Libraries in JSTL	396
Working with the Core Tag Library.....	396
Tags in the Core Tag Library	396
Implementing the Core Tag Library	400
Working with the XML Tag Library	404
Tags of the XML Tag Library.....	405
Implementing the XML Tag Library.....	413
Working with the Internationalization Tag Library.....	416
Tags of the Internationalization Tag Library.....	416
Implementing Internationalization Tag Library	425
Working with the SQL Tag Library.....	433

Table of Contents

Tags of the SQL Tag Library	433
Implementing the SQL Tag Library	440
Working with the Functions Tag Library	443
Functions Available in the Functions Tag Library	443
Implementing the JSTL Functions	444
Summary	446
Quick Revise	447
Chapter 10: Implementing Filters	449
Why Filters?	451
When to Use Filters?	451
How do Filters Work?	452
Filter API	452
The Filter Interface	452
The FilterConfig Interface	454
The FilterChain Interface	454
Setting up the Development Environment	455
Creating and Configuring Filters	455
Writing a Generic Filter	455
Configuring Filters	457
Creating a Filter Application	459
Writing Your First Filter	460
Creating Home Page	461
Creating a Servlet to Test the Filter	461
Configuring the Filter	462
Build Simple Filter Using Initializing Parameter	464
Creating the MsgFilter Filter	464
Creating a JSP Page to Test the Filter	465
Configuring the Filter	465
Testing Your Filter	466
Manipulating Responses	466
Creating the FilterServletOutputStream class	467
Creating the GenericResponseWrapper class	469
Creating the Filter	471
Creating the Servlet to Test the Filter	472
Configuring the Filter	473
Testing the Filter	474
Threading Issues with Filters	474
Summary	475
Quick Revise	476
Chapter 11: Working with JavaServer Faces (JSF)	477
Overview of JSF	479

Features of JSF	480
JSF Architecture	481
Elements of JavaServer Faces	482
UI Component	482
Renderer	483
Validators	484
Backing Beans	485
Converters	485
Events and Listeners	486
Message	489
Navigation.....	489
JSF Request Processing Life-cycle.....	490
The Restore View Phase	491
The Apply Request Values Phase	491
The Process Validations Phase	492
The Update Model Values Phase	492
The Invoke Application Phase.....	492
The Render Response Phase	493
JSF Tag Libraries	493
JSF HTML Tags.....	494
JSF Core Tags	515
JSF Standard UI Components	528
Command Components	531
Data Component	531
Form Component	532
Image Component.....	532
Input Component.....	532
Message and Messages Component	532
Output Component.....	532
Parameter Component.....	532
Checkbox Component	532
SelectItem and SelectItems Component	532
SelectMany and SelectOne Component	533
ViewRoot Component	533
Working with Backing Beans	533
Using Backing Bean Method as Event Handler	535
Using Backing Bean Method as Validator	536
Managing Backing Beans	537
JSF Input Validation.....	538
Using Validator Method.....	538
Using Validators.....	539
JSF Type Conversion	541

Table of Contents

Standard JSF Converters	541
Creating Custom Converters	542
Handling Page Navigation in JSF	543
Internationalization Support in JSF	544
Configuring Supported Locales	544
Creating Resource Bundles	545
Accessing Localized Messages from Resource Bundle	546
Configuring JSF Applications	548
Setting web.xml	548
Setting faces-config.xml	549
Developing a JSF Application	551
Setting Development Environment	551
Creating JSF Pages	552
Creating Backing Bean - Employee.....	563
String getEmployees()	567
String addNew()	567
String update()	567
String deleteEmployee()	567
String getDetail()	567
void getEmployee(ActionEvent)	567
Managing Employee Bean	568
Creating the EmployeeDB Class.....	568
Creating the EmailValidator Class	571
Configuring a JSF Application.....	573
Enabling JSF Servlet in web.xml.....	573
Defining Navigation rules in faces-config.xml.....	573
Supporting Internationalization.....	575
Running the KogentPro Application.....	577
Displaying all Employees.....	577
Getting Employee Detail	578
Adding New Employee.....	579
Editing Employee Detail	580
Deleting Employee.....	581
Summary	581
Quick Revise.....	582
Chapter 12: Understanding JavaMail	585
Introducing JavaMail	587
Mail Protocols.....	588
JavaMail Architecture	590
JavaMail API	590
The Session class.....	591
The Authenticator class	593

The Message class	593
The MimeMessage class	594
The Part interface	596
The MultiPart class.....	598
The.....	599
The MimeBodyPart class.....	599
The PreencodedMimeBodyPart class	599
The MimeUtility class.....	600
The InternetHeader class	601
The ParameterList class.....	601
The QuotaAwareStore interface.....	602
The Resource class.....	602
The Quota class.....	602
The SharedFileInputStream class	602
The SharedByteArrayInputStream class	603
The ByteArrayDataSource class	604
The Flags.Flag class.....	604
The Address class.....	605
The Store class	606
The Folder class	607
The Transport class	614
Working with JavaMail.....	615
Sending Mail.....	615
Reading Mail.....	617
Summary.....	618
Quick Revise.....	618
Chapter 13: Understanding EJB 3.0	621
EJB 3.0 Fundamentals.....	623
Why EJB 3.0?	623
EJB 3.0 – Architecture and Concepts	624
Features of EJB 3.0.....	627
Classifying EJBs	630
Understanding Session Bean.....	631
Conversational State	631
State Management of a Bean.....	631
Stateless Session Beans	632
Stateful Session Beans.....	633
Stateless versus Stateful Session Beans.....	635
Implementing Session Beans.....	635
Business Interface.....	635
Bean Class	635
Developing a Stateless Session Bean.....	636

Table of Contents

Running the Application.....	642
Developing a Stateful Session Bean	643
Understanding Message-Driven Bean	647
Characteristics of Message-Driven Bean.....	647
Structure of Message-Driven Bean.....	647
Life-cycle of Message-Driven Bean.....	648
Implementing Message-Driven Bean.....	650
Implementation of MessageDrivenBean and MessageListener	650
Implementation of Business Logic inside the onMessage().....	650
A Sample MDB Application	650
Packaging, Deploying, and Running the Application.....	655
Managing Transactions in Java EE Application	661
Transaction Properties.....	662
Transaction Model	663
Distributed Transactions.....	665
Implementing Transaction Management in EJB 3.0	667
Bean-Managed Transactions.....	667
Container-Managed Transactions.....	669
Understanding EJB 3.0 Timer Services	671
Different Types of Timers	671
Strengths and Limitations of EJB Timer Services.....	672
Timer Service API	672
The TimerService Interface	672
The Timer Interface.....	674
The TimedObject Interface.....	675
The TimerHandle Interface.....	675
Implementing EJB 3.0 Timer Service.....	676
Creating Timer Objects.....	677
Canceling a Timer Object.....	678
Expiration of Timer Object.....	678
Understanding EJB 3.0 Interceptors	679
Specifying Interceptors.....	679
Life-cycle of Interceptors.....	680
Interceptor class.....	680
Applying Interceptors through XML	681
Disabling Interceptors	682
Using Annotations for Interceptors	682
Programming by using the Business Methods.....	683
Programming by using the Life-cycle Call Back Methods.....	683
Specifying Default Interceptor Methods.....	684
Life-cycle Call Back Methods in an Interceptor Class.....	685
@PreDestroy Annotation.....	685

@PostConstruct Annotation.....	686
@PostActivate Annotation.....	686
@PrePassivate Annotation.....	686
Life-cycle Call-back Interceptor Methods in a MDB.....	687
Life-cycle Callback Interceptor Methods in a session bean.....	689
Summary.....	690
Quick Revise.....	691
Chapter 14: Implementing Entities and Java Persistence API.....	693
Understanding Object-Relational Mapping (ORM).....	695
Understanding Java Persistence API.....	695
Entity Manager API.....	695
Introducing Entities.....	696
Specifying the @ENTITY.....	702
Specifying the @Table.....	703
Specifying the @Columns.....	704
Specifying the @Enumerated.....	704
Specifying the @Lob.....	705
Specifying the @Temporal.....	705
Entity and Session Beans.....	705
When To Use Entity Bean.....	706
Entity class.....	706
Life Cycle of Entity.....	707
Entity Listeners and Callbacks.....	708
Packaging a Persistence Unit.....	709
Obtaining an Entity Manager.....	710
Interacting with an Entity Manager.....	712
Entity Relationship Types.....	713
One-to-One.....	714
One-to-Many.....	720
Many-to-One.....	725
Many-to-Many.....	730
Mapping Collection-Based Relationships.....	735
Entity Inheritance.....	736
Single table per class hierarchy.....	740
Separate table per subclass.....	743
Single table per concrete entity class.....	744
Understanding Java Persistence Query Language (JPQL).....	745
JPQL Functions.....	746
JPQL statements.....	748
SELECT clause.....	749
From clause.....	750
WHERE clause.....	751

Table of Contents

ORDER BY clause.....	751
CONDITIONAL EXPRESSION.....	751
Query API	755
Creating Sample Application.....	761
Directory Structure.....	761
Creating Web Module	762
Configuring Connection Pool and JDBC Resource.....	771
Summary.....	775
Quick Revise.....	775
Chapter 15: Implementing Java Persistence Using Hibernate.....	777
Introduction to Hibernate.....	779
Why Hibernate	779
Architecture of Hibernate.....	780
The Hibernate Cache Architecture.....	781
Downloading Hibernate	784
Hibernate Query Language.....	784
Why to use HQL?.....	784
Understanding HQL Syntax	785
Understanding Hibernate O/R Mapping.....	788
Mapping a Collection	795
An Example on Hibernate	796
Setting up the Development Environment	797
Creating Database Table.....	797
Writing Hibernate Configuration File, JavaBean, and Hibernate Mapping File	797
Implementing O/R Mapping with Hibernate	801
Developing a JavaBean.....	801
Developing Hibernate Configuration File	802
Developing Hibernate Mapping File.....	802
Creating EmployeeData	803
Developing Controller Component	807
Developing View Components	810
Web configuration.....	813
Directory Structure.....	814
Running the Application.....	815
Summary.....	818
Quick Revise.....	818
Chapter 16: Implementing JBoss Seam.....	821
Features of the Seam Framework	823
Working with the Seam Framework	824
Understanding Contexts	824
Working with Seam Components.....	825

Annotations.....	833
Understanding Lifecycle Callback Methods.....	835
Conditional Installation.....	835
Logging.....	836
BPM and Page Flow in Seam	836
Stateless Navigation Model	837
Stateful Navigation Model.....	838
Using jPDL Pageflows	839
Configuring JBoss Seam.....	840
Configuring JSF inSeam	841
Configuring EJB components in Seam	842
Creating a Jboss Seam Application.....	843
Creating EJB Component	843
Creating Views	847
Creating Resources.....	853
Packaging and Deploying the Seam Application	859
Running the Application.....	861
Summary.....	864
Quick Revise.....	864
Chapter 17: Java EE Connector Architecture.....	867
Key Concepts.....	869
Enterprise Information System.....	869
Resource Manager.....	870
Resource Adaptors.....	870
Managed Environment.....	871
Non-Managed Environment.....	871
Connection	871
System Contracts.....	871
Resource Adaptor Contracts.....	872
Common Client Interface (CCI)	873
Lifecycle Management	874
Lifecycle Management Model	874
Workflow Management	880
Advantages	880
Work Management Model.....	880
Work Interface	881
ExecutionContext Class.....	882
WorkListener Interface.....	882
WorkEvent Class.....	883
WorkAdapter Class.....	883
JDBC vs. Java EE Connector Architecture.....	884
Inbound Communication Model.....	884

Table of Contents

Inbound Communication Scenario	885
Message Inflow	885
EJB Invocation	890
EJB Invocation Model	891
Understanding CCI API.....	893
CCI Interfaces and Classes.....	893
ConnectionFactory Interface.....	894
ConnectionSpec Interface.....	895
Connection	895
InteractionSpec	896
LocalTransaction	896
JCA Exceptions.....	897
Application Exception	897
System Exception	897
CommException.....	898
Packaging and Deploying a Resource-Adapter.....	898
Packaging Directory Structure	898
Packaging Consideration	899
Packaging a Resource Adapter.....	899
Deployment of Resource Adapter.....	900
Deployment Descriptor	900
Deployer	901
Application Server Vendor	902
Application Component Provider	902
Summary.....	902
Quick Revise.....	902
Chapter 18: Java EE Design Patterns	905
Java EE Application Architecture.....	907
What is a Design Pattern?.....	908
Advantages of Design Patterns	908
Types of Patterns	908
Front Controller Pattern	911
Composite View Pattern	914
Session Facade Pattern	918
Service Locator Pattern.....	921
Value Object Pattern	924
Business Delegate Pattern	927
Data Access Object Pattern	930
View Helper Pattern	933
Dispatcher View Pattern	935
Service to Worker Pattern	937
ValueListHandler Pattern	939

Fast Lane Reader Pattern.....	942
Summary.....	944
Quick Revise.....	944
Chapter 19: Implementing SOA using Java Web Services	947
Section A: Exploring SOA and Java Web Services	949
Overview of SOA.....	949
Describing the SOA Environment.....	950
Overview of Java Web Services	953
Role of WSDL, SOAP, and Java/XML Mapping in SOA	954
Role of WSDL in SOA.....	954
Role of SOAP in SOA.....	956
Role of Java/XML Mapping in SOA.....	958
Section B: Understanding Web Service Specifications to Implement SOA	963
Exploring the JAX-WS 2.0 Specification	963
Exploring the JAXB 2.0 Specification	968
Mapping Annotations.....	969
Binding Runtime Framework.....	970
Validation.....	971
Marshal Event Callbacks.....	971
Partial Binding.....	971
Binary Data Encoding.....	972
JAXB 2.0 Binding Language.....	972
Portability.....	973
Exploring the WSEE 1.2 Specification.....	973
Port Component	974
Servlet Endpoints	974
EJB Endpoints	974
Simplified Packaging.....	974
Handler Programming Model.....	974
Exploring the WS-Metadata 2.0 Specification.....	974
WSDL Mapping Annotations.....	975
SOAP Binding Annotations	975
Handler Annotations	976
Service Implementation Bean	976
Start From WSDL and Java.....	976
Automatic Deployment.....	976
Describing the SAAJ 1.3 Specification.....	976
Working with SAAJ and DOM APIs	976
Describing the JAXR Specification	981
JAXR Architecture.....	981
Exploring the StAX 1.0 Specification.....	983
StAX APIs.....	983

Table of Contents

StAX Factory Classes	985
Section C: Using the Web Service Specifications	986
Using the JAX-WS 2.0 Specification	986
Invoking Web Services by using JAX-WS Proxies	986
Implementing JAX-WS WSDL to Java Mapping.....	987
Marshalling and Unmarshalling Method Calls to SEI	989
Invoking a Web Service using a Proxy	991
Using the JAXB 2.0 Specification	992
Binding between XML Schema and Java Classes	992
JAXB Binding Customization	993
An Example of JAXB 2.0 Java/XML Binding	997
Implementing Type Mappings with JAXB 2.0	1004
Implementing Type Mappings with JAXB 2.0 Annotations.....	1008
Using the WSEE and WS-Metadata Specifications.....	1013
Deployment using a Servlet Endpoint	1014
Deployment using EJB Endpoint	1014
Deployment without deployment descriptors	1016
Deployment with Deployment Descriptor	1023
Implementing the SAAJ Specification.....	1030
Implementing the JAXR Specification	1034
Setting up a Connection	1035
Querying a Registry	1037
Manipulating Registry Objects	1039
Implementing the StAX Specification	1042
Reading XML Streams	1042
Writing XML Streams	1044
Reading an XML file using the Cursor API	1045
Reading an XML File using the Event Iterator API	1049
Writing an XML File using the Cursor API	1051
Summary	1053
Quick Revise.....	1053
Chapter 20: Working with Struts 2	1057
Getting Started with Struts 2.....	1059
MVC 2 Design Pattern for Struts 2.....	1059
Why Struts 2?	1060
Request Processing in Struts 2.....	1061
Relation between WebWork 2 and Struts 2	1062
Struts 2 Architecture	1063
Struts 2 Configuration Files	1064
Zero Configuration Applications.....	1068
Java EE 5 Annotations	1068
Understanding Actions in Struts 2	1068

Action Classes.....	1069
POJO as Action.....	1079
Implementing Actions in Struts 2	1079
Dependency Injection and Inversion of Control.....	1098
The ApplicationAware Interface.....	1099
The ParameterAware Interface.....	1099
The ServletRequestAware Interface.....	1100
The ServletResponseAware Interface.....	1101
The SessionAware Interface.....	1101
Preprocessing with Interceptors	1102
What are Interceptors?.....	1102
Interceptors as RequestProcessor.....	1103
How to Configure Interceptors?.....	1103
Stacking of Interceptors.....	1104
Bundled Interceptors	1104
Writing Interceptors.....	1105
OGNL Support in Struts 2.....	1107
Syntax of OGNL	1108
Using OGNL in Struts 2	1108
Implementing Struts 2 Tags	1110
Generic Tags	1110
UI Tags.....	1112
Controlling Results in Struts 2.....	1113
What is Result?	1114
Types of Results.....	1114
Configuring Results.....	1115
Configuring Result Types	1116
Performing Validation in Struts 2.....	1117
XWork Validation framework.....	1117
Bundled Validators	1117
Registering Validators	1119
Defining Validation Rules.....	1120
Custom Validators	1121
Short-circuiting Validators.....	1122
Annotation Validation.....	1123
ConversionErrorFieldValidator Annotation.....	1123
Validating Stuts2App Application.....	1133
Internationalizing Struts 2 Applications.....	1138
Describing Internationalization and Localization.....	1138
Global Resource Bundle	1140
Implementing Plugins in Struts 2.....	1141
Struts 2 Bundled Plugins.....	1141

Table of Contents

Tiles Plugin	1142
Integrating Struts 2 with Hibernate.....	1157
Setting the MySQL Database and Table.....	1158
Configuring Hibernate	1159
Developing Struts Hibernate Plugin.....	1162
Summary.....	1163
Quick Revise.....	1163
Chapter 21: Working with Spring 2.5	1165
Features of Spring Framework.....	1167
Understanding the Spring Framework Architecture.....	1168
Spring Core	1168
Spring AOP	1169
Spring ORM	1169
Spring Web MVC	1169
Spring Web Flow.....	1169
Spring DAO	1170
Spring Application Context	1170
Dependency Injection and Inversion of Control.....	1170
Inversion of Control (IoC) Container.....	1170
Aspect Oriented Programming with Spring	1171
AOP Concepts	1171
Types of Advices	1172
Spring AOP Capabilities and Goals.....	1172
Managing Transactions.....	1173
Need of Transaction Management Support.....	1173
Spring Transaction Abstraction.....	1173
Resource Synchronization with Transactions.....	1176
Declarative Transaction Management.....	1176
Programmatic Transaction Management.....	1177
Choosing between Programmatic or Declarative Transaction Management.....	1179
Application Server-Specific Integration	1179
Spring Form Tag Library	1180
Types of Tags	1180
Understanding Spring's Web MVC Framework	1189
Key Features of Spring Web MVC	1189
The DispatcherServlet Class	1190
Controllers.....	1191
Handler Mappings.....	1193
Views and View Resolvers.....	1194
Implementing Spring Web MVC Framework.....	1196
Creating the Controller.....	1196
Creating the Views.....	1197

Creating the Spring Configuration File	1197
Creating the Web Configuration File	1198
Directory Structure	1199
Running the Application	1199
Testing Spring Applications	1200
Unit Testing With Spring	1200
Integration Testing	1200
Integrating Spring with Hibernate	1204
Integrating Struts 2 with Spring	1204
Configuring Spring in a Struts 2 Application	1204
Summary	1206
Quick Revise	1207
Chapter 22: Securing Java EE 5 Applications	1209
Understanding Security in Java EE 5	1211
Authentication	1211
Protection Domain	1212
Understanding Security Mechanisms	1213
Application Layer Security	1214
Transport Layer Security	1214
Message Layer Security	1215
Implementing Security on Application Server	1215
Working with Realms, Users, Groups, and Roles	1216
Securing Enterprise Beans	1217
Securing Application Clients	1217
Security in Web Applications	1218
Exploring JAAS	1218
Exploring HTTP Authentication Mechanisms	1220
Implementing Security	1222
Describing Declarative Security	1222
Describing Programmatic Security	1234
Summary	1247
Quick Revise	1247
Chapter 23: Packaging and Deploying on the Java Application Server ..	1249
Need of Packaging and Deploying	1251
What Can Be Packaged?	1251
Java EE Runtime Containers	1252
Packaging and Deploying Java EE 5 Applications	1252
Using the NetBeans IDE	1252
Using the asant Utility	1255
Using the Admin Console	1258
Using the Development Directory	1261

Summary.....	1262
Quick Revise.....	1262
Chapter 24: Project: The Human Resource Management System	1265
Software Requirements.....	1267
SDLC of the Project.....	1267
Requirement Analysis	1267
Project Design.....	1268
Database Design.....	1268
Development.....	1273
Testing	1273
Implementation and Maintenance.....	1273
Summary.....	1273
Section A: Developing the Login Module	1275
<i>Section B: Developing the Profile Management Module.....</i>	<i>1295</i>
<i>Section C: Developing the Recruitment Module</i>	<i>1315</i>
<i>Section D: Developing the Attendance Management Module.....</i>	<i>1365</i>
<i>Section E: Developing the Leave Management Module</i>	<i>1385</i>
<i>Section F: Developing the Payroll Module</i>	<i>1409</i>
Appendix A: Java Remote Method Invocation— Internet Inter-ORB Protocol (RMI-IIOP)	1445
Appendix B: Understanding Directory Services and JNDI.....	1487
Appendix C: Extensible Markup Language (XML)	1507
Appendix D: Asynchronous JavaScript and XML (AJAX).....	1591
Appendix E: Unified Modeling Language (UML)	1607
Appendix F: Installing Java EE 5 SDK Update 3	1635
Appendix G: Working with NetBeans 6.....	1643
Appendix H: Implementing Internationalization.....	1663
Glossary	1677
Index	1695
What's on CD.....	1713
