about this book xx

1 *Introducing Silverlight* 1

- 1.1 Silverlight up your life 2
 - Productivity* 2 ■ *Performance* 3 ■ *Portability* 3
- 1.2 Why can't we be friends? 6
 - The developer experience* 7 ■ *The designer experience* 8
- 1.3 XAML 8
 - Code behind* 9 ■ *Namespaces* 10 ■ *Compound properties* 12 ■ *Attached properties* 12
- 1.4 Blending it together 13
- 1.5 Summary 21

2 *Harmony with the web* 22

- 2.1 The relationship between Silverlight and the HTML DOM 23
 - The HTML Document Object Model* 24 ■ *The Silverlight plug-in* 25 ■ *The Silverlight Object Model* 25

- 2.2 Creating a Silverlight plug-in 26
 - The Silverlight utility file: Silverlight.js* 27
 - *Creating an instance of the Silverlight plug-in* 28
- 2.3 Integrating a Silverlight plug-in 29
 - Relating the Silverlight application to the HTML DOM* 30
 - *Clarifying the initial experience* 32
 - Handling plug-in events* 36
 - *Sending initialization parameters* 38
- 2.4 The Silverlight Application Model 39
 - The manifest file* 40
 - *The Silverlight application* 41
 - *Application dependencies* 44
- 2.5 Interacting with the HTML DOM 44
 - Managing the web page from managed code* 44
 - Working with the user's browser window* 48
 - Bridging the scripting and managed code worlds* 51
- 2.6 Summary 55

3 *Back to the basics: Layout and text* 56

- 3.1 A Canvas for your imagination 57
 - Arranging content of a Canvas* 58
 - *The Canvas: packing a punch* 60
- 3.2 The StackPanel: Stack 'em deep 61
- 3.3 The power Grid 62
 - Arranging Grid content* 63
 - *Sizing it up* 65
 - Working with the Grid programmatically* 68
 - Customizing cell boundaries* 69
- 3.4 Displaying text 72
 - Font properties* 72
 - *Flow control* 76
 - *Text properties* 76
 - *Spacing* 78
- 3.5 The UIElement and FrameworkElement 80
 - Properties* 80
 - *Methods* 85
- 3.6 Summary 86

4 *Handling user interaction* 88

- 4.1 Understanding device support 89
 - Capturing the keyboard* 89
 - *Trapping the mouse* 92

- 4.2 Delivering text controls 96
 - Handling basic text* 96
 - *Collecting sensitive data* 98
- 4.3 Button controls 99
 - The Button* 100
 - *The HyperlinkButton* 101
 - The RadioButton* 102
 - *The CheckBox* 104
- 4.4 The ItemsControl 105
 - The ListBox* 105
 - *The ComboBox* 107
 - The TabControl* 108
- 4.5 Date controls 110
 - Calendar* 110
 - *DatePicker* 113
- 4.6 Choosing from a numeric range 114
 - Using the ProgressBar* 115
 - *Implementing a Slider* 115
- 4.7 Displaying visual prompts 116
 - Popping up a dialog box* 116
 - *Prompting for a file* 118
- 4.8 Miscellaneous controls 121
 - Creating a border* 121
 - *Collecting drawings* 121
- 4.9 Summary 124

5 Getting down with data binding 126

- 5.1 Binding with your data 127
 - Mastering the binding syntax* 127
 - *Choosing a binding mode* 129
- 5.2 Understanding your data source 131
 - Binding to a property* 131
 - *Binding to an object* 133
 - *Binding to a collection* 134
- 5.3 Customizing the display 136
 - Converting values during binding* 136
 - *Creating data templates* 139
- 5.4 The DataGrid 141
 - Displaying your data* 142
 - *Editing grid data* 147
 - Sorting items* 148
- 5.5 Language Integrated Query (LINQ) 149
 - Introducing LINQ* 149
 - *LINQ to Objects* 153
 - LINQ to XML* 154
 - *LINQ-ing it together* 156
- 5.6 Summary 158

6 *Networking and communications* 159

- 6.1 Trust, security, and browser limitations 160
 - It's all a matter of trust* 160
 - *Making your application secure* 163
 - *Limitations of the browser* 164
- 6.2 Connecting to data sources 165
 - Using SOAP services* 165
 - *Time for a REST* 170
- 6.3 Making the data usable 173
 - Reading POX* 173
 - *Converting JSON* 177
 - *Reading syndicated feeds* 179
- 6.4 Using advanced services 185
 - WCF service enhancements* 185
 - *WCF duplex services* 186
 - *Connecting to sockets* 191
- 6.5 Summary 193

7 *Managing digital media* 194

- 7.1 Stunning audio and video 195
 - Getting to the source* 195
 - *Common properties* 199
 - Audio specifics* 201
 - *Video specifics* 203
 - *The lifecycle of a media file* 203
- 7.2 Playlists: for that web-based mixtape 205
 - Understanding client-side playlists* 205
 - *Using server-side playlists* 207
- 7.3 Interactive playback 209
 - Controlling the play state* 209
 - *Timely interaction* 210
 - *Going full screen* 212
- 7.4 Using protected content 213
 - Requesting protected content* 214
 - *Retrieving the PlayReady components* 214
 - *Unlocking protected content* 215
- 7.5 Using images in your application 215
 - Basic imaging* 216
 - *Deep Zoom* 216
- 7.6 The 7th inning stretch: Dealing with dead space 222
 - I'll have none of this stretching business* 222
 - *Uniform sizing* 223
 - *Fill the area* 224
 - *UniformToFill* 225
- 7.7 Summary 225

8 *Getting a grip on graphics* 226

- 8.1 Getting in shape 227
 - A Line in the sand* 228
 - *Rectangle* 229
 - *The ellipse* 230
 - *Polyline* 230
 - *Polygon* 231

- 8.2 Geometry 231
 - Simple geometries* 232 ▪ *Path geometries* 233
 - Composite geometries* 235
- 8.3 Brushes 235
 - SolidColorBrush* 236 ▪ *LinearGradientBrush* 237
 - RadialGradientBrush* 239 ▪ *ImageBrush* 240
 - VideoBrush* 241
- 8.4 Transforms 242
 - RotateTransform* 242 ▪ *ScaleTransform* 243
 - SkewTransform* 243 ▪ *TranslateTransform* 244
 - TransformGroup* 244
- 8.5 Blending it together 245
- 8.6 Summary 251

9 *Bringing it to life: Animation* 253

- 9.1 Animation: It's about time 254
- 9.2 Mastering the timeline 256
 - What type of property are you animating?* 256 ▪ *Where are you starting from and where are you going?* 258
 - How long should the animation run?* 261
- 9.3 Storyboarding 264
 - Understanding the storyboard* 264 ▪ *Hitting the target* 265 ▪ *Controlling the Storyboard* 267 ▪ *Being resourceful* 269
- 9.4 Key framing 271
 - Interpolation: It's about acceleration* 273 ▪ *Timing is everything* 276
- 9.5 Summary 277

10 *Giving it style* 278

- 10.1 Being resourceful 279
 - Declarative resources* 279 ▪ *Accessing loose resources* 282 ▪ *Bundling resources* 284
- 10.2 Giving your elements style 286
 - Defining the look* 287 ▪ *Targeting style definitions* 289
- 10.3 Creating templates 290
 - Building a control template* 291 ▪ *Creating reusable templates* 295
- 10.4 Dealing with visual states 295
 - Understanding the components* 296

- 10.5 Leveraging the VisualStateManager 298
- 10.6 Sharing your effects 301
- 10.7 Summary 303

11 *Enhancing the experience* 305

- 11.1 Storing data in isolated storage 306
 - IsolatedStorageFile: The virtual filesystem* 306
 - *Reading and writing files: The isolated storage way* 311
 - *Administering the isolated storage* 314
- 11.2 Using XAML at runtime 314
- 11.3 BackgroundWorker 316
 - Doing the work* 316
 - *Updating the UI* 317
- 11.4 Retrieving content on demand 321
 - Requesting content* 322
 - *Managing larger download requests* 323
 - *Loading the content* 325
- 11.5 The Dynamic Language Runtime (DLR) 332
 - Dynamic typing* 332
 - *Metaprogramming* 335
- 11.6 Summary 337

12 *Share the light: Distribution and deployment* 338

- 12.1 Creating a user control 339
 - Defining the appearance* 339
 - *Defining the behavior* 340
 - *Calling the control* 344
- 12.2 Architecting navigation in Silverlight 344
 - Setting up the architecture* 345
 - *Implementing a navigator* 346
 - *Navigating between pages (a.k.a. UserControl)* 347
- 12.3 Using a custom splash screen 348
 - Creating the appearance* 348
 - *Integrating the custom splash screen* 350
 - *Monitoring the load progress* 351
- 12.4 Hosting with Silverlight Streaming 351
 - Preparing to stream!* 352
 - *Pack it up!* 352
 - *Ship it!* 354
 - *Use it!* 354
- 12.5 Summary 355
 - index* 357
