

CONTENTS

Chapter 1 ■ Introducing NetBeans IDE 6	1
Features of NetBeans IDE 6	2
Installing NetBeans IDE 6	3
System Requirements	3
Procedure to Install NetBeans IDE	3
Starting NetBeans IDE 6	6
Exploring the NetBeans IDE	7
The Navigate Menu	8
The Source Menu	8
The Refactor Menu	8
The Build Menu	9
The Run Menu	9
The Profile Menu	10
The Versioning Menu	10
The Tools Menu	11
The Window Menu	11
The Start Page	12
The Projects Window	14
The Files Window	15
The Services Window	16
The Navigator Window	17
The Source Editor	17
The Output Window	18
The Properties Window	19
The Palette Window	19
Summary	20
Chapter 2 ■ Developing a Sample Project in NetBeans	21
Introduction	22
Creating a Java Project	22
Creating a Java Application using Java Application Template	23
Adding New File to the Project	26
Setting a Layout to Form	28
Adding Controls to the Form	30
Specifying Properties to Controls	32
Adding Code to the Event Handlers of Controls	35
Previewing a Form	36
Working in Source Editor	37
Compiling and Building the Project	44
Set the Compilation Classpath	45

Build the Project	46
Correct Compilation Errors	47
Clean and Build the Project	48
Examining the Build Output	48
Running the Project.....	49
Configuring Project's Runtime Properties.....	49
Running an Individual Project	50
Running a Single File.....	50
Profiling the Project.....	51
Summary	54

Chapter 3 ■ Developing Web Applications in NetBeans 55

Creating a Web Application Using JSF.....	56
Configuring the Code welcomeJSF.jsp	59
Creating a Web application Using Struts	61
Adding Files and Libraries to the Web application.....	62
Navigating Web Pages	64
Configuring the Web application.....	67
Configuring Project Contents and Classpath	67
Configuring Deployment Descriptors.....	72
Building the Web Application	72
Deploying the Web application.....	73
Summary	74

Chapter 4 ■ Developing Enterprise Projects in NetBeans 75

Introduction	76
Creating an Enterprise Application	76
Creating an EJB Module	79
Creating an Enterprise Application Client	80
Configuring the Enterprise Project	82
Developing EJB Module	82
Developing Web Modules.....	97
Building the Enterprise Project	103
Verifying the Enterprise Project	103
Deploying the Enterprise Project	104
Summary	106

Chapter 5 ■ Developing Web Services in NetBeans 107

Introduction	108
Creating a Web Service.....	108
Creating Web Service from New Web Service wizard	108

Creating a Web Service from a WSDL File.....	110
Developing the Web Service.....	112
Adding a Web Service Operation	112
Creating a Handler	114
Building the Web Service.....	117
Deploying the Web Service.....	118
Testing the Web Service.....	118
Consuming the Web Service	120
Creating a Web Service Client.....	120
Calling the Web Service.....	122
Summary	125

Chapter 6 ■ Developing NetBeans Plug-In Modules 127

Introducing NetBeans Modules	128
Extending the NetBeans IDE.....	128
Building the Rich-Client Applications.....	129
Working with NetBeans Modules	129
Setting up the Module	130
Developing the Module.....	135
Building the Module.....	145
Trying out the Module.....	146
Distributing the Module	147
Summary	153

Chapter 7 ■ Refactoring Source Code 155

Introducing Variables, Constants, Fields, and Methods	156
Using the Find Usages Feature	159
Renaming a Code.....	161
Using the Safe Delete Command.....	163
Changing Method Parameters	165
Encapsulating Fields.....	167
Using the Pull Up and Push Down Commands.....	169
The Push Up Command	169
The Push Down Command	171
Extracting Interface.....	173
Extracting Superclasses.....	175
Using Supertypes	177
Using the Move Inner to Outer Command.....	178
Separating Anonymous Inner Class.....	180
Summary	182

Chapter 8 ■ Debugging the Applications	185
Preparing to Debug.....	186
Attaching the Source Code.....	186
Setting Breakpoints.....	188
Setting Watches	190
Beginning a Debugging Session.....	191
Monitoring the Source Code	193
Stepping Through Code.....	193
Viewing Debugging Information.....	193
Fixing the Errors During Debugging Session	194
Completing the Debugging Session	195
Summary	195
Chapter 9 ■ Performing JUnit Testing	197
Creating a Test.....	198
Creating an Empty Test.....	198
Creating Test for Existing Class	201
Modifying a Test	207
Running a Test.....	209
Run Test For Entire Project	209
Run Test For a Single Class.....	210
Debugging a Test	211
Summary	212
Chapter 10 ■ Generating and Accessing Javadocs	213
Elements of Javadoc	214
Class or Interface doc comment	214
Field doc comment	215
Constructor doc comment.....	216
Method doc comment.....	216
Creating a Javadoc	217
Generating the Project Javadoc	227
Accessing Javadoc.....	231
Adding Libraries.....	231
Adding Javadoc for Platforms	232
Viewing a Javadoc using Code Completion technique.....	233
Searching a Javadoc using Javadoc Search Tool.....	234
Summary	235

Chapter 11 ■ Implementing Ant Script	237
Working with Ant Script.....	238
Configuring Ant Script Setting.....	238
Editing an Ant Script.....	240
Running an Ant Script	240
Debugging an Ant Script	242
Installing Ant Documentation.....	243
Summary	246
