

Computer Programming
for Kids and Other Beginners

Warren and Carter Sande

 MANNING

Contents

Preface xiii
Acknowledgments xix
About this book xxi

1 Getting Started 1

Installing Python 1 ▪ Starting Python with IDLE 2 ▪ Instructions, please 3 ▪ Interacting with Python 5 ▪ Time to program 7
Running your first program 8 ▪ If something goes wrong 9
Your second program 11

2 Remember This—Memory and Variables 14

Input, processing, output 14 ▪ Names 16 ▪ What’s in a name? 20
Numbers and strings 21 ▪ How “variable” are they? 22 ▪ The new me 23

3 Basic Math 26

The four basic operations 27 ▪ Operators 28 ▪ Order of operations 29 ▪ Two more operators 30 ▪ Really big and really small 33

4 Types of Data 38

Changing types 38 ▪ Getting more information: `type()` 41
Type-conversion errors 42 ▪ Using type conversions 42

5 Input 44

`raw_input()` 45 ▪ The `print` command and the comma 45
Inputting numbers 47 ▪ Input from the Web 49

6 GUIs—Graphical User Interfaces 52

What’s a GUI? 52 ▪ Our first GUI 53 ▪ GUI input 54
Pick your flavor 55 ▪ The number-guessing game . . . again 59
Other GUI pieces 60

7 Decisions, Decisions 62

Testing, testing 62 ▪ Indenting 65 ▪ Am I seeing double? 65
Other kinds of tests 66 ▪ What happens if the test is false? 67
Testing for more than one condition 69 ▪ Using “and” 69
Using “or” 70 ▪ Using “not” 70

8 Loop the Loop 74

Counting loops 75 ▪ Using a counting loop 77 ▪ A shortcut—
`range()` 78 ▪ A matter of style—loop variable names 80
Counting by steps 82 ▪ Counting without numbers 84
While we’re on the subject . . . 84 ▪ Bailing out of a loop—`break` and
`continue` 85

9 Just for You—Comments 89

Adding comments 89 ▪ Single-line comments 90 ▪ End-of-line
comments 90 ▪ Multiline comments 90 ▪ Commenting style 91
Commenting out 92

10 Game Time 94

Skier 94

11 Nested and Variable Loops 99

Nested loops 99 ▪ Variable loops 101 ▪ Variable nested loops 102
Even more variable nested loops 103 ▪ Using nested loops 105

12 Collecting Things Together—Lists 112

What's a list? 112 ▪ Creating a list 113 ▪ Adding things to a list 113 ▪ What's the dot? 114 ▪ Lists can hold anything 114
Getting items from a list 115 ▪ "Slicing" a list 116 ▪ Modifying items 118 ▪ Other ways of adding to a list 118 ▪ Deleting from a list 120 ▪ Searching a list 121 ▪ Looping through a list 122
Sorting lists 123 ▪ Mutable and immutable 126 ▪ Lists of lists: tables of data 126

13 Functions 131

Functions—the building blocks 131 ▪ Calling a function 133
Passing arguments to a function 134 ▪ Functions with more than one argument 137 ▪ Functions that return a value 139 ▪ Variable scope 140 ▪ Forcing a global 143 ▪ A bit of advice on naming variables 144

14 Objects 146

Objects in the real world 147 ▪ Objects in Python 147
Object = attributes + methods 148 ▪ What's the dot? 149
Creating objects 149 ▪ An example class—HotDog 154
Hiding the data 159 ▪ Polymorphism and inheritance 159
Thinking ahead 162

15 Modules 164

What's a module? 164 ▪ Why use modules? 164 ▪ Buckets of blocks 165 ▪ How do we create modules? 165 ▪ How do we use modules? 166 ▪ Namespaces 167 ▪ Standard modules 170

16 Graphics 174

Getting some help—Pygame 174 ▪ A Pygame window 175
Drawing in the window 178 ▪ Individual pixels 186
Images 190 ▪ Let's get moving! 192 ▪ Animation 193
Smoother animation 194 ▪ Bouncing the ball 196
Wrapping the ball 198

17 Sprites and Collision Detection 202

Sprites 202 ▪ Bump! Collision detection 208
Counting time 212

18 A New Kind of Input—Events 217

Events 217 ▪ Keyboard events 219 ▪ Mouse events 223
Timer events 225 ▪ Time for another game—PyPong 227

19 Sound 239

More help from Pygame—`mixer` 239 ▪ Making sounds versus playing sounds 240 ▪ Playing sounds 240 ▪ Controlling volume 243
Repeating music 245 ▪ Adding sounds to PyPong 245 ▪ More wacky sounds 246 ▪ Adding music to PyPong 250

20 More GUIs 254

Working with PythonCard 254 ▪ Components 255 ▪ Making our GUI do something 258 ▪ The return of event handlers 259 ▪ Moving the button 260 ▪ More useful GUIs 260 ▪ TempGUI 261 ▪ What’s on the menu? 266

21 Print Formatting and Strings 273

New lines 274 ▪ Horizontal spacing—`tabs` 275 ▪ Inserting variables in strings 277 ▪ Number formatting 278 ▪ Strings ‘n’ things 282

22 File Input and Output 290

What’s a file? 291 ▪ Filenames 291 ▪ File locations 292
Opening a file 296 ▪ Reading a file 297 ▪ Text files and binary files 299 ▪ Writing to a file 300 ▪ Saving your stuff in files: `pickle` 303 ▪ Game time again—Hangman 305

23 Take a Chance—Randomness 313

What’s randomness? 313 ▪ Rolling the dice 314 ▪ Creating a deck of cards 319 ▪ Crazy Eights 323

24 Computer Simulations 336

Modeling the real world 336 ▪ Lunar Lander 337 ▪ Keeping time 342 ▪ Time objects 343 ▪ Saving time to a file 347
Virtual Pet 349

25 What's Next? 358

General programming 358 ▪ Python 359 ▪ Game programming and Pygame 359 ▪ Other Python stuff 360 ▪ Look around 362

Appendix A Variable Naming Rules 363

Answers to Self-Test Questions 365

Chapter 1: Getting Started 365 ▪ Chapter 2: Remember This—Memory and Variables 366 ▪ Chapter 3: Basic Math 367
Chapter 4: Types of Data 368 ▪ Chapter 5: Input 369
Chapter 6: GUIs—Graphical User Interfaces 371 ▪ Chapter 7: Decisions, Decisions 372 ▪ Chapter 8: Loop the Loop 374
Chapter 9: Just for You—Comments 375 ▪ Chapter 10: Game Time 376 ▪ Chapter 11: Nested and Variable Loops 376
Chapter 12: Collecting Things Together—Lists 377 ▪ Chapter 13: Functions 379 ▪ Chapter 14: Objects 380 ▪ Chapter 15: Modules 382 ▪ Chapter 16: Graphics 383 ▪ Chapter 17: Sprites and Collision Detection 385 ▪ Chapter 18: A New Kind of Input—Events 385 ▪ Chapter 19: Sound 386 ▪ Chapter 20: More GUIs 386 ▪ Chapter 21: Print Formatting and Strings 387
Chapter 22: File Input and Output 388 ▪ Chapter 23: Take a Chance—Randomness 390 ▪ Chapter 24: Computer Simulations 391
