Table of Contents

Preface xi

Chapter 1: Language Processors 1

1.1 Introduction 1
1.2 Language Processors 2
1.3 Language Processing Activities 5
Program Generation Activities 5
Program Execution Activities 6
1.4 Phases and Passes of a Language Processor 9
Analysis Phase 9
Synthesis Phase 9
Language Processor Pass 10
1.5 Fundamental of Language Specification 11
Alphabets, Strings, and Their Operations 11
Grammar and Language 12
Classification of Grammar 13
Simple Grammar and Operator Grammars 15
Derivation Tree 16
Left and Right Derivations 19
Ambiguity of a Grammar 20
Removing Ambiguity 22
1.6 Attribute Binding 23
Summary 23
Review Questions 25
Multiple Choice Questions 27

Chapter 2: Scanning and Parsing 29

2.1 Introduction 29
2.2 Regular Grammar and Regular Expressions 30
Regular Expression 30
Arden's Rule 31

2.3 Transition Diagrams....32
2.4 Finite-State Automata....34
Construction of Transition Diagrams---NFA from Regular Expressions....36
Converting NFA to DFA....39
Building DFAs....42
Minimization of DFA....42
2.5 The Scanning Process....46
Tokens, Patterns, and Lexemes....47
Input Buffering....49
Recognition of Tokens....50
2.6 An Elementary Scanner Design and Its Implementation....51
Recognizer for Identifiers....52
Pattern Matching Using NFA....53
2.7 The Role of Parser....54
2.8 Parsing Types....55
2.9 Top-Down Parsing Naive Approach....56
2.10 Top-Down Parsing Based on Prediction and Backtracking....57
2.11 Recursive Productions....59
2.12 Left Factoring....60
2.13 Recursive Descent and Predictive Parser....61
2.14 LL Parsers....63
LL(1) Parsers....64
2.15 Bottom-Up Parsing-Naïve Approach....68
Shift-Reduce Parsers....68
2.16 Precedence Parsers....70
Simple Precedence Grammar and Parsing....71
Operator Precedence Parsing....77
2.17 Precedence Functions....84
Computing Precedence Function--Method-I....85
Computing Precedence Functions--Method-II....87
Parsing Using Precedence Functions....87
2.18 Predictive LR Parsers....91
Summary....93
Review Questions....94
Multiple Choice Questions....98

Chapter 3: Assemblers 99

3.1 Introduction 99
3.2 Basic Functions of Assemblers 100
3.3 Elements of Assembly Language Programming 101
General Format of an Assembly Language Statement 102
Types of Assembly Language Statements 105
Advantages of Assembly Language Programming 109
Disadvantages of Using Assembly Language 109
3.4 Assembly Scheme 110
Analysis and Synthesis 110
Task Performed by the Analysis and Synthesis Phases of Assembly Process 111
Pass Organization of Assemblers 112
3.5 Design of Two-Pass Assembler 112
Pass I of Assembler 112
Pass II of Assembler 119
3.6 Comparison of Single-Pass and Two-Pass Assemblers 121
3.7 Output Interface of Assembler 121
3.8 Assembly for Intel Processors 123
Intel 8086 Architecture 123
Addressing Modes and Instruction Formats 125
Instruction Decoding during Assembly 126
Assembler Directives 128
Writing Segment-Based Program 129
Advanced Intel Assemblers 130
Summary 132
Review Questions 133
Multiple Choice Questions 134

Chapter 4: Macro Processors 135

4.1 Introduction 135
4.2 Macro and Macro Processors 136
4.3 Differences between Macro and Subroutines 137
4.4 Macro Definition and Call 138
4.5 Macro Expansion 139
Handling Macro Calls 140

Lexical Expansion and Parameter Substitution 141
Flow of Control during Expansion 144
4.6 Nested Macro Facility 145
Nested Macro definitions 145
Nested Macro Expansions 146
Recursive Macro Calls 147
4.7 Advanced Assembler Facilities 148
SET Directive and Symbols 148
Facilities to Alter Flow of Control 149
Facilities to Generate Expansion Time Variables 150
Attributes of Macro Arguments 151
Some More Advanced Directives 153
The REMOVE Directive 153
4.8 Design of Macro Processors 155
Functions of Macro Preprocessor 155
Databases for Macro Processing 155
Operation and Design of Macro Preprocessing Phase (Pass-0) 156
Operation and Design of Nested Macro Expansion (Pass-0) 158
4.9 Design of Macro Assemblers 159
Summary 159
Review Questions 161
Multiple Choice Questions 162

Chapter 5: Loaders and Linkers 163

5.1 Introduction 163
5.2 Basic Linker and Loader function 164
5.3 Relocation and Linking Concepts 165
Types of Program Address 165
Performing Relocation 166
Program Linking 167
Object Files 169
5.4 Design of Linker 171
Relocation of Object Module 171
Linking of Object Modules 172
Relocating Programs 173
5.5 Linker for MS DOS 174

Two-Pass Linking 175
5.6 Linking for Overlays 177
5.7 Design of Absolute Loaders 178
5.8 Design of Direct-Linking Loaders 179
Passes Structure of Direct-Linking Loaders 180
Linker Command Languages 182
Summary 183
Review Questions 184
Multiple Choice Questions 186

Chapter 6: Introduction to Compilers 187

6.1 Introduction 187
6.2 Aspects of Compilations 188
Bootstrapping and Cross Compilers 189
The Analysis-Synthesis Model of Compilation 190
The Pass Structure of a Compiler 191
6.3 Phases of Compiler 193
Lexical Analysis 194
Syntax Analysis 194
Semantic Analysis 195
Intermediate Code (IC) Generation 196
Code Optimization 197
Code Generation 197
Symbol Table Management 198
Error Handling (Detection and Reporting) 199
6.4 Memory Allocation 199
Static and Dynamic Memory Allocations 200
Memory Organization for Simple Data Types 201
Memory Allocation for Arrays 202
Allocation for Block-Structured Languages 202
Management of Variable-Length Blocks 205
Garbage Collection and Memory Compaction 207
Storage Allocation Strategies 211
6.5 Intermediate Representations 213
Compilation of Expressions 213
Abstract Syntax Trees 214

Direct Acyclic Graphs 215
Postfix Code 217
Three-Address Code 218
Implementation of Three-Address Statements 220
Three-Address Code Generation 222
6.6 Compilation of Control Structure 229
Conditional and Iterative Control Flow 229
Code Generation for Function Calls 232
6.7 Code Generator 232
Major Tasks in Code Generation 233
Code Production Tables for Code Generation 233
The Code Generation Algorithm 234
Code Generation Algorithm 235
Machines Implementation of Conditional Jumps 236
6.8 Code Optimization 237
Classification of Compiler Optimization 237
Optimizing Transformations 238
6.9 Interpreters 244
Comparison of Compiler and Interpreters 245
Comparing Performance of Compiler and Interpreters 246
Summary 247
Review Questions 250
Multiple Choice Questions 252

Index 253
