TABLE OF CONTENTS

Introduction ..... **xxxvii**

Part I **EXAM: 70–640**

Chapter 1: Working with Active Directory **3**

Working with Active Directory Infrastructure 4
Exploring Active Directory Domain Services 5
Identity and Access 5
Elements of Active Directory 5
Domain Controller 6
Domain 6
Tree 6
Forest 7
Trust Relationship 8
Organizational Unit 8
Site 9
Exploring the Functional Levels 9
The Domain Functional Levels 10
The Forest Functional Levels 11
Installing Windows Server 2008 11
Configuring Post-Installation Settings 16
Installing a Server Core DC 18
Lab 1.1: Installing Server Core 19
Configuring Initial Server Settings 20
Adding AD DS through the Command-Line 22
Creating a Forest in Windows Server 2008 22
Preparing to Create a Forest 23
Adding the AD DS Role 23
Lab 1.2: Adding AD DS by using the Windows Interface 24
Lab 1.3: Creating a Domain Controller 24
Creating a Child Domain 26
Lab 1.4: Creating the content.dreamtechpress.net Child Domain 26
Removing a DC 28
Working with Active Directory Administration Tools 28
Exploring the Microsoft Management Console 28
Managing a Custom Console by using AD Snap-ins 29
Lab 1.5: Creating and Managing a Custom Console 30
Exploring the Objects in Active Directory 32
User Objects 33
Group Objects 33

Computer Objects ... 33
Summary ... 33
Questions and Answers ... 34

Chapter 2: Configuring Domain Name System for Active Directory ... 41

Working with DNS ... 42
Overview of the DNS Name Resolution Process ... 43
Exploring DNS Terms and Concepts ... 44
Exploring Features of Windows Server DNS ... 45
Integrating DNS with AD DS ... 46
Installing the DNS Service ... 46
Lab 2.1: Installing a Primary DNS Server ... 47
Lab 2.2: Installing AD DS and Creating the dreamtechpress.net Domain ... 48
Lab 2.3: Creating the Manual Zone Delegation ... 50
Lab 2.4: Creating the kogent.com Domain Tree ... 51
Configuring the DNS Service ... 53
Configuring the DNS Server Scavenging Settings ... 53
Configuring the Forward Lookup Zone Settings ... 55
Creating and Configuring the Responsible Person Record ... 56
Configuring the Reverse Lookup Zone Settings ... 57
Using DNS ... 59
Using Forwarders and Root Hints ... 59
Managing Single-Label Names ... 60
Linking DNS with WINS ... 61
Integrating DNS and DHCP ... 62
Creating and Assigning a Custom Application Directory Partition ... 62
Administrating DNS Using DNS Tools ... 63
Summary ... 64
Questions and Answers ... 64

Chapter 3: Working with AD Objects ... 71

Working with User Accounts ... 72
Creating User Accounts ... 73
Using Templates ... 75
Using AD Command-line Tools ... 76
The Dsadd Command ... 76
Lab 3.1: Using the Dsadd Command ... 77
The CSVDE Command ... 77
The LDIFDE Command ... 77
Lab 3.2: Using the LDIFDE Command ... 78
Using Windows PowerShell ... 79
Lab 3.3: Using Windows PowerShell ... 80
Using VBScript ... 81

Lab 3.4: Using VBScript to Create a New User 81
Managing User Attributes 82
Using Active Directory Users and Computers 82
Using the Dsmod and Dsget Commands 82
Using Windows PowerShell and VBScript 83
Maintaining User Accounts 83
Changing a User Account's Password 84
Disabling and Enabling a User Account 84
Lab 3.5: Using the Dsmod Command 85
Removing a User Account 86
Moving and Renaming a User Account 86
Working with Groups 88
Creating a Group 89
Creating and Managing the Groups using Commands 90
Using the Dsadd Command 90
Using the CSVDE Command 91
Lab 3.6: Using the CSVDE Command 91
Using the LDIFDE Command 91
Using the Dsmod and Dsget Command 92
Using the Dsmove and Dsrm Command 92
Administrating Groups 93
Protecting Groups 93
Delegating Group Membership Management 94
Using the Managed By Tab 94
Using Advanced Security Settings 95
Working with Computer 95
Creating Computers 96
Exploring Workgroups, Domains, and Trusts 96
Creating an Organizational Unit 96
Delegating Permissions 97
Prestaging a Computer Account 97
Lab 3.7: Creating an OU 97
Creating Computer Objects 98
Using the CSVDE Command 98
Lab 3.8: Using the CSVDE Command 99
Using the LDIFDE Command 99
Using the Dsadd and Netdom Commands 99
Using Windows PowerShell 100
Using VBScript 100
Adding Computers to the Domain 101
Managing Computer Objects 102
Recognizing Problems Related to Computer Accounts 102
Configuring Properties of Computer Objects 103

Using the Dsmod Command ... 103
Using Windows PowerShell or VBScript ... 103
Shifting a Computer ... 103
Resetting a Computer Account ... 104
Renaming a Computer Account ... 105
Disabling a Computer Account ... 106
Removing a Computer Account ... 106
Summary ... 106
Questions and Answers ... 107

Chapter 4: Implementing Group Policies and Authentication ... 113

Working with Group Policies ... 114
Exploring Group Policy Objects ... 115
The Local GPOs ... 115
The Domain-Based GPOs ... 115
Lab 4.1: Creating, Editing, and Linking GPOs ... 116
Configuring Group Policy Settings ... 118
The Computer Configuration and User Configuration Nodes ... 118
The Software Settings Node ... 118
The Windows Settings Node ... 118
The Administrative Templates Node ... 119
The Preferences Node ... 120
Administrating Group Policy Scope ... 120
Linking GPOs to Sites, Domains and OUs ... 120
Exploring GPO Inheritance and Precedence ... 121
Blocking Inheritance of GPOs ... 122
Enforcing a GPO Link ... 122
Filtering Group Policies ... 122
Applying GPO to Specific Groups ... 122
Excluding GPO from a Specific Group ... 123
Implementing WMI Filters ... 124
Lab 4.2: Implementing WMI Filters ... 125
Enabling and Disabling GPOs ... 126
Targeting Preference Items ... 126
Examining Group Policies Processing ... 126
Using Loopback Policy Processing ... 127
Lab 4.3: Configuring Loopback Policy Processing ... 128
Managing Group Policy Settings ... 130
Using Restricted Group Policies with Members Setting ... 130
Using Restricted Group Policies with Member Of Setting ... 130
Lab 4.4: Using Restricted Group Policies with the Member Of Setting ... 130
Working with Software Deployment Group Policy ... 132
Creating Software Deployment Group Policy ... 132

Lab: 4.5: Creating Software Deployment Group Policy 133
Managing the Scope of Software Deployment Group Policy 135
Maintaining Deployed Software using Group Policy 135
Working with Audit Policies 136
Configuring Audit Settings on Files or Folders 137
Auditing Changes in Directory Service 138
Lab 4.6: Auditing Changes in Directory Service 138
Implementing Authentication 140
Configuring Security Settings 141
The Local Security Policy 141
Using Security Templates 142
The Security Template Snap-In 142
Lab: 4.7: Creating and Using Security Template for Security Configuration 142
The Group Policy Objects 144
Working with Security Configuration Wizard 145
Creating, Editing and Applying a Security Policy 145
Lab: 4.8: Creating, Editing and Applying a Security Policy 145
Modifying and Rolling Back the Applied Security Policy 150
Deploying a Security Policy 150
Working with Password and Lockout Policies 151
Configuring the Domain Password Policy 152
Configuring the Account Lockout Policy 152
Configuring the Fine-Grained Policy 153
Implementing Auditing Authentication 155
Configuring Authentication Audit Policies 155
Scoping Authentication Audit Policies 156
Configuring RODC 156
Installing RODC 157
Lab: 4.9: Installing RODC 157
Configuring Password Replication Policy 159
Managing the RODC Credentials Caching 160
Configuring Administrative Role Separation 162
Summary 163
Questions and Answers 163

Chapter 5: Implementing Active Directory Replication and Operation Master 171

Working with Active Directory Sites 172
Managing Active Directory Sites 172
Creating, Renaming, and Deleting a Site 173
Adding Subnets to Sites 174
Configuring Site Properties 175
Creating Site Links 176
Lab 5.1: Creating Site Links Between Sites 176

Implementing Replication ... 179
Exploring Intrasite Replication ... 179
The Site Link Bridges ... 180
The Site Link Cost ... 180
Configuring Intersite Replication ... 180
Selecting Replication Transfer Protocols ... 181
Bridging the Site Links ... 181
Configuring Bridgehead Servers ... 182
Lab 5.2: Configuring Bridgehead Server Manually ... 182
Configuring the Global Catalog ... 183
Configuring the Universal Group Membership Caching ... 185
Adding an Attribute to the Global Catalog ... 186
Working with Operation Masters ... 187
Exploring Single Master Operations ... 188
The Forest-Wide Operation Master ... 188
The Domain-Wide Operation Master ... 188
Placing Operation Master Roles ... 189
Locating the Replication Partners ... 189
Selecting Domain Controllers ... 190
Determining the Per-Domain Role Placement ... 190
Determining the Per-Forest Role Placement ... 190
Transferring Operation Master Roles ... 190
Seizing Operation Master Roles ... 191
Summary ... 193
Questions and Answers ... 194

Chapter 6: Configuring AD Server Roles ... 201

Working with AD LDS ... 202
Installing the AD LDS Role ... 203
Lab 6.1: Installing AD LDS on Windows Server 2008 Full Server Installation ... 203
Installing AD LDS on Server Core ... 205
Exploring the AD LDS Role Configuration ... 206
Creating a New AD LDS Instance ... 206
Using the Active Directory Lightweight Directory Services Setup Wizard ... 206
Performing an Unattended Creation of AD LDS Instance ... 209
Working with AD LDS Instances ... 210
Using the ADSI Edit Tool ... 210
Using the LDP.exe Console ... 213
Using the Active Directory Schema Snap-in ... 214
Using the Active Directory Sites and Services Snap-In ... 215
Migrating Instances to AD LDS ... 216
Working with AD RMS ... 216
Exploring AD RMS Certificates ... 217

Lab 6.2: Installing AD RMS ... 218
Configuring the AD RMS Role ... 222
Working with AD FS ... 225
Lab 6.3: Installing and Configuring AD FS ... 226
Adding Cross-DNS References ... 227
Installing the Federation Servers ... 227
Installing the Federation Service Proxies ... 229
Configuring IIS to Require SSL ... 230
Exporting and Importing Certificates ... 231
Exporting the SSL Server and Client Authentication Certificates ... 232
Importing an SSL Authentication Certificate into a Server ... 234
Configuring the Web Server ... 234
Configuring the Federation Servers ... 235
Configuring Trust Policies ... 235
Creating User Claims ... 236
Configuring the Federation Trust ... 239
Summary ... 241
Questions and Answers ... 241

Chapter 7: Configuring the AD Environment ... 249

Implementing Backup and Restore ... 250
Using Windows Server Backup Feature ... 250
Backing up System State Data by using Windows Server Backup ... 253
Lab 7.1: Performing Full Server Backup by using the wbadmin Command ... 255
Backing up Data to the Removable Media ... 256
Scheduling Backup by using Backup Schedule Wizard ... 257
Backing Up GPOs ... 259
Performing Restores ... 260
Using DSRM ... 261
Performing Authoritative Restore ... 262
Performing Non-authoritative Restore ... 264
Restoring GPOs ... 264
Performing Offline Maintenance ... 265
Monitoring AD ... 266
Using System Tools ... 267
The Task Manager Tool ... 267
The Event Viewer Tool ... 268
The Reliability Monitor Tool ... 270
The Performance Monitor Tool ... 270
Using the Windows System Resource Manager Feature ... 272
Summary ... 272
Questions and Answers ... 272

Chapter 8: Configuring AD Certificates 279

Working with AD Certificate Services 280
Installing AD CS 280
Lab 8.1: Installation of AD CS 281
Managing Certificate Templates 284
Lab 8.2: Configuring Certificate Templates 285
Managing Certificate Revocations 286
The Online Responders 287
The Certificate Revocation List 287
Lab 8.3: Configuring Online Responder and Certificate Revocation 288
The CRL Distribution Point 293
The Authority Information Access 293
Summary 294
Questions and Answers 294

Part II EXAM: 70—642

Chapter 1: Working with IP Addressing and Services 303

Exploring the Layers of TCP/IP Model 304
The Network Interface Layer 304
The Internet Layer 305
The Transport Layer 305
The Application Layer 306
Exploring IPv4 Addressing 307
Exploring Structure of IPv4 Addresses 307
The Network ID and Host ID 307
The Subnet Masks 307
Exploring Routing and Default Gateways 309
Exploring IPv4 Address Ranges 309
Exploring Subnetting and Supernetting 310
Exploring IPv6 Addressing 312
Exploring Structure of IPv6 Addresses 313
Receiving IPv6 Addresses on Computer 313
Exploring IPv6 Address Types 313
Global Addresses 314
Link-Local Addresses 314
Unique Local Addresses 314
Setting Network Properties for a Windows Vista or Windows Server 2008 Client 315
Using Network and Sharing Center 315
Using Network Connections 316
Displaying Advanced Connection Settings 316
Bridging Network Connections 317

Configuring IPv4 Address Manually 318
Using the Internet Protocol Version 4 (TCP/IPv4) Properties Dialog Box 318
Lab 1.1: Configuring IPv4 Address Manually using the Internet Protocol Version 4 (TCP/IPv4) Properties Dialog Box 318
Using Command Prompt 319
Configuring IPv6 Manually 320
Using the Internet Protocol Version 6 (TCP/IPv6) Properties Dialog Box 320
Lab 1.2: Configuring IPv6 Address Manually using the Internet Protocol Version 6 (TCP/IPv6) Properties Dialog Box 320
Using Command Prompt 322
Configuring IPv4 Connection 322
The DHCP-assigned Addresses 322
The Alternate Configuration 322
APIPA 322
Summary 323
Questions and Answers 323

Chapter 2: Working with Name Resolution and DNS Zone Infrastructure 331

Using Name Resolution Methods in Windows 332
The Link Local Multicast Name Resolution Protocol 332
The NetBIOS Protocol 333
Setting NetBIOS 333
Configuring NetBIOS Node Types 334
The DNS Service 334
Exploring DNS Components 335
Exploring DNS Client and Server Caches 336
Working with a DNS Query 336
Hosting the DNS Server 337
Hosting on the Active Directory Domain Controller 337
Hosting on the Stand-alone Server 338
Lab 2.1: Installing a Primary DNS Server 338
Lab 2.2: Installing AD DS and Creating the dreamtechpress.net Domain 340
Lab 2.3: Creating the Manual Zone Delegation 342
Lab 2.4: Creating the kogent.com Domain Tree 343
Hosting on Server Core Installation 344
Configuring the DNS Server 345
The Caching-only DNS Server 345
The Properties Dialog Box of the DNS Server 345
Configuring DNS Client Settings 346
Configuring DNS Server Address for Client 346
Setting Computer Name and DNS Suffixes 347
Configuring DNS Domain Suffix Search List 348
Configuring Dynamic Updates 349

Clearing the DNS Client Cache ... 350
Configuring the DNS Zone Infrastructure ... 350
Creating DNS Zones ... 351
Selecting Zone Type ... 352
Selecting Active Directory Zone Replication Scope ... 353
Selecting Forward or Reverse Lookup Zone ... 353
Specifying Zone Name ... 354
Specifying Dynamic Update Settings ... 355
Examining Records of a New Zone ... 355
The Start of Authority (SOA) Zone ... 355
The Name Server Records ... 357
The Host Resource Records ... 357
The Alias Resource Records ... 358
The MX Resource Records ... 358
The PTR Resource Records ... 359
The SRV Resource Records ... 359
Setting DNS to Use WINS Resolution ... 361
Enabling Aging and Scavenging ... 362
Deploying a GlobalNames Zone ... 364
Lab 2.5: Deploying the GlobalNames Zone ... 364
Implementing Zone Replication for Active Directory-Integrated Zones ... 366
Exploring Replication and Application Directory Partitions ... 367
Selecting Zone Replication Scope ... 367
Creating New Application Directory Partitions ... 368
Working with Zone Transfers ... 369
Enabling Zone Transfers ... 369
Updating the Secondary Zone Manually ... 371
Working with Stub Zones ... 371
Lab 2.6: Configuring a Stub Zone ... 372
Summary ... 373
Questions and Answers ... 373

Chapter 3: Working with DHCP ... 383

Overview of DHCP ... 384
The DHCP Address Assignment Process ... 384
The Address Leases ... 385
The DHCP Scopes ... 385
The DHCP Options ... 385
Installing the DHCP Server ... 386
Configuring the DHCP Server ... 393
Creating Address Exclusion Range ... 393
Creating Address Reservation ... 393
Modifying Lease Durations ... 394

Setting Additional DHCP Options ... 395
Lab 3.1: Installing and Configuring DHCP on Server Core ... 396
Summary ... 397
Questions and Answers ... 397

Chapter 4: Working with IP Routing and Network Connections ... 405

Working with IP Routing ... 406
Exploring Network Routes ... 407
Explaining Routing Internet Protocol ... 408
Lab 4.1: Installing RRAS and Configuring RIP ... 409
Configuring the Static Routing ... 411
Using the Route Command ... 412
Using Routing and Remote Access ... 412
Working with Networks ... 413
Configuring NAT ... 413
Using Internet Connection Sharing ... 414
Lab 4.2: Configuring NAT by using ICS ... 414
Using RRAS ... 415
Configuring Wireless Network Access ... 417
Exploring Wireless Network and Security Standards ... 417
Comparing the Ad Hoc and Infrastructure Wireless Networks ... 419
Configuring the RADIUS Server ... 419
Lab 4.3: Configuring the RADIUS Server in a Network ... 419
Configuring the RADIUS Proxies ... 421
Configuring Remote Access ... 423
The Dial-Up Connections ... 423
Configuring the Server ... 424
Lab 4.4: Configuring the Dial-Up Server ... 425
Configuring the RADIUS Server ... 427
The Virtual Private Network ... 429
Configuring the VPN Server ... 430
Lab 4.5: Configuring the VPN Server in the Network ... 430
Configuring the VPN Packet Filters ... 432
Summary ... 433
Questions and Answers ... 434

Chapter 5: Configuring Security Settings and Authentication ... 443

Working with IPsec ... 444
Exploring IPsec Policies ... 444
Establishing IPsec Connections ... 445
Exploring Authentication Methods for IPsec ... 445
Exploring the Protocol Types of IPsec ... 445
Creating IPsec Policy ... 446

Working with Connection Security Rule ... 452
Creating the Connection Security Rule ... 453
Configuring the Connection Security Rule ... 454
Configuring Network Access Protection Settings ... 455
Installing and Configuring NAP ... 455
Enabling the NAP Enforcement ... 458
The IPsec Enforcement ... 458
Lab 5.1: Installing and Configuring the NAP Using IPsec Enforcement ... 458
The 802.1X Enforcement ... 460
The DHCP Enforcement ... 460
The VPN Enforcement ... 463
Setting NAP Components ... 463
The NAP Clients ... 464
The Health Requirement Policy ... 465
Configuring SHVs ... 465
Configuring Remediation ... 465
Configuring Network Policies ... 466
Lab 5.2: Configuring the Health Requirement Policy ... 466
Configuring Windows Firewall Settings ... 469
Filtering Network Traffic ... 470
The Inbound Traffic ... 470
The Outbound Traffic ... 472
Lab 5.3: Configuring Inbound and Outbound Traffic ... 473
Configuring Firewall Using Group Policy ... 475
Lab 5.4: Using Group Policy ... 476
Configuring Firewall Using Isolation Policy ... 477
Identifying Ports and Protocols ... 478
Summary ... 478
Questions and Answers ... 479

Chapter 6: Monitoring System Performance and Software Updates ... 487

Monitoring Performance and Reliability ... 488
Using the Performance Monitor ... 488
Using the Reliability Monitor ... 490
Using the Data Collector Sets ... 491
Creating a Data Collector Set ... 492
Customizing a Data Collector Set ... 493
Displaying the Performance Data in a Report ... 495
Using the Event Viewer Tool ... 496
Lab 6.1: Configuring Computers to Collect and Forward Events ... 498
Using the Microsoft Baseline Security Analyzer Utility ... 499
Using the SNMP Service ... 501
Working with the Network Monitor Tool ... 502

Installing the Network Monitor Tool 502
Capturing, Analyzing, and Filtering Network Data 503
Lab 6.2: Capturing Network Data using Command Line 506
Working with Software Updates 506
Exploring Windows Update Client 507
Installing the WSUS Service 507
Working with WSUS 508
Configuring the WSUS Options 509
Configuring the Computer Groups 510
The Server-side Targeting 510
The Client-Side Targeting 511
Configuring the Client Computers 512
Approving Updates 513
Declining Updates 514
Viewing Reports 515
Summary 515
Questions and Answers 516

Chapter 7: Working with Files, Folders, and Printers 523

Working with Files and Folders 524
Working with Folders 524
Installing the File Services Server Role 525
Exploring the File Server Resource Manager Role Service 526
Lab 7.1: Installing the File Server Resource Manager Role Service 526
Configuring Disk Quotas 528
Using the Quota Management Console 528
Lab 7.2: Creating a new template using the Quota Management Console 529
Using the Command Prompt or Script 530
Using Windows Explorer 531
Using Group Policy 532
Sharing Folders across Networks 532
Using Windows Explorer 533
Using Provision a Shared Folder Wizard 533
Using Command Prompt or Script 535
Accessing a Shared Folder 536
Controlling Access to Files and Folders 536
The NTFS File Permissions 537
The Encrypting File System 538
Protecting Files and Folders using EFS 539
Sharing an EFS-Protected File 540
Configuring EFS Using Group Policy Settings 540
Configuring a Data Recovery Agent 541
Working with Distributed File System 542

Creating a DFS Namespace 544
Adding Folders to the DFS Namespace 546
Configuring DFS using Command Prompt or Script 547
Working with Offline Files 547
Configuring Shadow Copy Services 549
Using Windows Explorer 549
Using Command Prompt 550
Recovering Files 551
Performing Backup Manually 552
Configuring Backup Schedules 554
Performing Backup Using Command Prompt 555
Restoring Files or Volumes 555
Working with Printers 556
Installing Print Services Server Role 557
Installing Printers 558
Using Control Panel 558
Using the Print Management Snap-in 559
Adding Drivers for Printers 561
Sharing Printers 562
Setting up Printer Permissions 563
Setting up Printer Pooling 564
Setting Printer Priorities 565
Deploying Printers using Group Policies 566
Exporting and Importing Printers 567
Managing Printers Using Command Prompt or Script 570
Monitoring Printers using the Performance Monitor Snap-in 571
Summary 572
Questions and Answers 573

Part III EXAM: 70—643

Chapter 1: Configuring Windows Deployment Infrastructure 583

Exploring Server Roles 584
The File Services Role 585
The Terminal Services Role 586
The Web Server Role 586
The Application Server Role 587
The Print Services Role 587
The Fax Server Role 588
The Streaming Media Services Role 588
Deploying Server by using WDS 588
Installing the WDS Role 589

Configuring WDS 590
Configuring Initial Server Settings 590
Using Windows Deployment Services Configuration Wizard 591
Using the wdsutil Command Line Tool 592
Adding the Default Boot Image (The Boot.wim File) 593
Adding the Default Install Image (The Install.wim File) 594
Configuring the Boot Menu 596
Capturing Images by using WDS 597
Creating the Capture Image 597
Creating the Discover Image 598
Deploying Images by using WDS 599
Implementing Windows Activation 601
Using Multiple Activation Key 601
Using the Key Management Service Key 601
Lab 1.1: Installing and Configuring the KMS Host 602
Configuring Storage in Windows Server 2008 602
Exploring Server Storage Technologies 603
The Direct-attached Storage 603
The Network-attached Storage 603
The Storage-attached Network 603
Exploring Disk Types 604
Working with Volumes 604
Creating a Volume 604
The Simple or Basic Volume 605
The Spanned Volume 606
The Mirrored Volume 607
The Striped Volume 607
The RAID-5 Volume 608
Extending or Shrinking the Volume 608
Configuring a Mount Point in a Volume 609
Summary 610
Questions and Answers 610

Chapter 2: Working with Web Applications and Web Server Security 617

Working with Internet Information Services 618
Installing the IIS Role 619
Lab 2.1: Installing the IIS Role by using the ServerManagerCmd Tool 622
Verifying IIS Installation 622
Using the Server Manager Console 622
Using Internet Explorer 623
Using the WSRM Feature 624
Working with Web Sites 625
Managing the Default Web Site 626

Adding a New Web Site ... 627
Configuring the Web Site Limits Settings ... 628
Configuring the Web Site Logging Settings ... 629
Working with Web Applications ... 630
Creating and Configuring Application Pools ... 632
Creating Virtual Directories ... 634
Managing the Web Server by Using XML Configuration Files ... 635
Restoring the applicationHost.config File ... 635
Migrating Web Sites and Web Applications by using Web.config ... 636
Backing up and Restoring Configuration Data ... 636
Working with Web Server Security ... 637
Managing IIS Security ... 638
Setting File System Permissions ... 638
Configuring Administrative Features for IIS ... 639
Enabling the Remote Management Functionality ... 639
Creating IIS Manager Users ... 640
Defining IIS Management Permissions for Remote Access ... 641
Delegating Features ... 642
Connecting to a Remote Server ... 642
Configuring Handler Mappings by using IIS ... 643
Managing Web Services Access ... 644
Implementing Authentication Modes ... 644
Anonymous Authentication ... 645
Forms Authentication ... 645
Challenge-based Authentication ... 646
ASP.NET Impersonation Authentication ... 646
Client Certificate Authentication ... 647
Creating and Managing URL Authorization Rules ... 648
Working with Server Certificates ... 649
Creating and Submitting a Certificate Request ... 649
Creating a Self-signed Certificate ... 650
Importing and Exporting Certificates by using the IIS Manager ... 650
Enabling Connections Using SSL ... 651
Summary ... 651
Questions and Answers ... 652

Chapter 3: Working with the FTP and SMTP Services ... 661

Working with FTP Services ... 662
Installing FTP Publishing Service Role Service ... 662
Lab 3.1: Creating a New FTP Site by using IIS 6.0 Manager ... 664
Configuring the Properties of the FTP Site ... 668
The FTP Site Tab ... 669
The Security Accounts Tab ... 670

The Messages Tab 670
The Home Directory Tab 671
The Directory Security Tab 672
Creating and Managing FTP Sites by using FTP 7.5 673
Lab 3.2: Installing FTP 7.5 673
Lab 3.3: Creating and Managing FTP Sites by using IIS 7.0 Manager 675
Configuring FTP User Security 678
Authentication Options 679
FTP Authorization Rules 679
FTP User Isolation Options 680
IIS Manager Permissions 681
Setting FTP Network Security 681
FTP SSL Settings 682
FTP Firewall Options 683
Monitoring FTP Site Settings 685
FTP Current Sessions 685
FTP Messages 685
FTP Logging 686
FTP Directory Browsing 688
Working with SMTP 690
Installing the SMTP Server Feature 690
Creating an SMTP Virtual Server 692
Configuring an SMTP Virtual Server 694
Configuring Properties in the General tab 695
Configuring the Properties in the Access Tab 695
Configuring Properties in the Messages Tab 698
Configuring Properties in the Delivery Tab 699
Configuring Properties in the LDAP Routing Tab 700
Configuring Properties in the Security Tab 700
Accessing the SMTP Virtual Server 701
Using Telnet 701
Using a Client Messaging Application 701
Summary 702
Questions and Answers 702

Chapter 4: Working with Terminal Services Infrastructure 709

Deploying and Configuring Terminal Services 710
Comparing Terminal Services with Remote Desktop 711
Enabling the Remote Desktop Feature 711
Enabling a Remote Desktop on a Server Core Installation 712
Similarities between Remote Desktop and Terminal Services 713
Features of Terminal Services over Remote Desktop 713
Exploring the Components of Terminal Services 714

Terminal Server 714
Remote Desktop Connection (RDC) 714
RDP 715
Deploying Terminal Services 715
Exploring the Available Role Services in Terminal Services 715
Adding the Terminal Services Role 715
Installing Applications 719
Adding Features to the Terminal Server 720
Configuring Terminal Services 721
Using the RDP-Tcp Properties Dialog Box 721
The General Tab 723
The Log on Settings Tab 723
The Sessions Tab 724
The Environment Tab 724
The Remote Control Tab 725
The Client Settings Tab 725
The Network Adaptor Tab 726
The Security Tab 726
Using the Terminal Server Edit Setting Section 727
Using Group Policy 728
Configuring and Using RemoteApp 729
Lab 4.1: Configuring RemoteApp 730
Lab 4.2: Packaging a RemoteApp Program 732
Lab 4.3: Deploying RemoteApp Programs Using MSI Package 735
Deploying and Configuring Terminal Services Clients 736
Connecting to the Terminal Server by using RDC 737
Configuring RDC Options 738
Creating an RDP file 740
Using Group Policy 740
Configuring User Profiles and Home Folders 740
Managing Terminal Services User Connections 741
Deploying and Configuring Terminal Services Licensing 743
Lab 4.4: Installing TS Licensing Role Service 743
Lab 4.5: Activating a Terminal Services License Server 744
Lab 4.6: Installing Terminal Services Client Access Licenses 748
Lab 4.7: Configuring License Settings on a Terminal Server 749
Deploying and Configuring Terminal Services Web Access 750
Installing TS Web Access Role Service 750
Configuring a Terminal Server to use TS Web Access 751
Configuring TS Web Access to use an External Terminal Server 751
Publishing Terminal Server Resources on the Web 752
Publishing RemoteApp Applications 752
Publishing a Terminal Server Desktop 752

Deploying and Configuring Terminal Services Gateway 753
Installing the TS Gateway Role Service 754
Creating a Self-signed Certificate for the TS Gateway Server 756
Importing and Mapping a Certificate on the TS Gateway Server 758
Importing a Certificate on the TS Gateway Server 758
Mapping the TS Gateway Server Certificate 760
Creating a TS CAP 761
Creating a TS RAP 763
Configuring Remote Desktop Connection Settings 766
Importing a Certificate 767
Monitoring Terminal Services Resources 767
Using Reliability and Performance Monitor 767
Installing and Using WSRM 768
Monitoring Active Connections through a TS Gateway Server 770
Configuring Terminal Services Load Balancing 771
Installing the TS Session Broker Role Service 771
Adding Terminal Servers to the Session Directory Computers Local Group 772
Configuring TS Session Broker Settings 773
Configuring DNS 774
Summary 775
Questions and Answers 776

Chapter 5: Working with Windows Media and SharePoint Services 785

Installing and Configuring Windows Media Services 786
Exploring the Deployment Requirements of Streaming Media Services 788
Difference between Downloading and Streaming the Content 788
Deployment factors for Windows Media Services 788
Types of Transmission 789
Types of Streaming 790
Types of Data Transfer Protocols 790
Installing Streaming Media Services Role 791
Creating a Publishing Point 793
Creating Announcements for a Publishing Point 797
Configuring Windows Media Services 801
Installing and Configuring Windows SharePoint Services 804
Adding Prerequisites of WSS 804
Installing WSS 805
Verifying IIS Websites of WSS 807
SharePoint-80 807
SharePoint Central Administration v3 807
Adding Users 809
Configuring Antivirus Settings 811
Managing Security Settings 812

Protecting Data by Performing Database Backups ... 813
Configuring E-Mail Settings ... 815
Lab 5.1: Installing SMTP Server ... 816
Lab 5.2: Configuring Outgoing E-Mails ... 817
Lab 5.3: Configuring Incoming E-Mails ... 818
Configuring Digital Rights Management ... 820
Using Windows Media Rights Manager ... 820
Using Active Directory Rights Management Services ... 821
Summary ... 826
Questions and Answers ... 826

Chapter 6: Implementing High Availability Technologies ... 835

Exploring the RAID Technology ... 836
Exploring and Implementing a Storage Area Network ... 837
Exploring Fibre Channel ... 838
Exploring iSCSI ... 838
Lab 6. 1: Installing the iSNS Server ... 840
Lab 6.2: Using iSCSI Target and Initiator ... 841
Lab 6.3: Using the Storage Manager Snap-in ... 842
Lab 6.4: Using the Storage Explorer Snap-in ... 843
Configuring Clusters ... 844
Exploring Server Clusters Concepts ... 844
The Round-Robin Distribution ... 845
The Network Load Balancing ... 845
The Failover Clustering ... 846
Installing and Configuring NLB ... 847
Working with Failover Clusters ... 850
Preparing a List of Hardware Requirements for a Cluster ... 851
Adding the Failover Clustering Feature ... 851
Validating Hardware Configuration for a Failover Cluster ... 852
Creating a Failover Cluster ... 855
Configuring a Failover Service ... 856
Testing a Cluster ... 857
Implementing Virtualization ... 857
The Virtual PC 2007 ... 858
The Virtual Server 2005 R2 SP1 ... 860
The Hyper-V ... 861
Installing the Hyper-V Role ... 862
Exploring Virtual Disk Types ... 864
Exploring Virtual Network Types ... 865
Creating a Virtual Network ... 865
Creating a Virtual Machine in Hyper-V ... 866
Modifying the Settings of Virtual Machine ... 867

Summary ... 868
Questions and Answers ... 869

Part IV EXAM: 70—620

Chapter 1: Installing and Upgrading Windows Vista ... 879

Preparing to Install Windows Vista ... 880
Windows Vista Editions ... 880
Windows Vista Editions Matrix ... 881
User Interface Features ... 882
Digital Media and Entertainment Features ... 882
Internet and E-mail Features ... 883
Security and Reliability Features ... 883
Performance Features ... 884
Networking Features ... 885
Mobility Features ... 885
Other Windows Vista Features ... 886
Hardware Requirements ... 886
Windows Vista Upgrade Advisor ... 887
Lab 1.1: Running Upgrade Advisor ... 887
Installing Windows Vista ... 893
Upgrading Windows Vista ... 901
Upgrading from Windows XP to Windows Vista ... 901
Upgrading from One Edition of Windows Vista to Another ... 903
Troubleshooting Windows Vista Installation Problems ... 906
Identifying Common Installation Issues ... 906
Troubleshooting Installation Errors by using Installation Log Files ... 907
Installing and Configuring Windows Vista Device Drivers ... 907
Installing Device Drivers ... 907
Lab 1.2: Installing Windows Vista Device Drivers ... 908
Signing Drivers ... 910
Updating Drivers ... 911
Implementing Dual Booting ... 914
Lab 1.3: Implementing Dual Booting ... 915
Summary ... 922
Questions and Answers ... 922

Chapter 2: Post-Installation Troubleshooting ... 933

Troubleshooting Post-Installation Configuration Problems ... 934
Troubleshooting using the Device Manager ... 934
Opening the Device Manager ... 934
Viewing Properties of a Hardware Device ... 935

Enabling and Disabling a Hardware Device ... 937
Troubleshooting using the Reliability Monitor ... 938
Reporting and Solving Problems ... 939
Changing Display Settings ... 940
Lab 2.1: Changing the Display Settings of a Computer ... 941
Changing Visual Appearance Settings ... 943
Changing Window Color and Appearance ... 943
Setting Desktop Background ... 943
Setting a Screen Saver ... 944
Changing Theme ... 945
Configuring and Troubleshooting Windows Aero ... 946
Configuring and Troubleshooting Parental Controls ... 947
Controlling Access to Websites ... 948
Setting Time Limits ... 949
Lab 2.2: Setting Time Limits on the Usage of the computer ... 950
Controlling Access to Games ... 950
Controlling Access to Specific Programs ... 952
Lab 2.3: Setting Restrictions on Access to Games ... 952
Configuring Internet Explorer ... 953
Configuring Instant Search ... 953
Configuring RSS Feeds ... 956
Lab 2.4: Subscribing to an RSS Feed ... 956
Configuring Printing Options ... 959
Specifying Page Setup Options ... 959
Specifying Print Preview Options ... 960
Summary ... 962
Questions and Answers ... 962

Chapter 3: Configuring Security in Windows Vista ... 971

Configuring and Troubleshooting UAC ... 972
Creating a New User Account ... 972
Lab 3.1: Creating a New User Account in Windows Vista ... 972
Elevating Privileges of a User ... 976
Configuring UAC using Local Security Policies ... 978
Lab 3.2: Configuring UAC ... 978
Disabling UAC ... 980
Configuring Windows Defender ... 981
Windows Defender Real-Time Protection ... 981
Configuring and Running Custom Scans ... 982
Windows Defender Definitions ... 983
Automatically Updating Definitions ... 984
Automatically Checking for Definitions before Scanning ... 985
Using Software Explorer to Manage Applications ... 986

Configuring Security in IE7 ... 987
Using the Pop-Up Blocker ... 987
Enabling and Disabling the Pop-Up Blocker ... 987
Allowing Specific Websites to Display Pop-Ups ... 988
Lab 3.3: Allowing Websites to Display Pop-Ups ... 988
Using the Phishing Filter ... 989
Managing Add-Ons ... 991
Working with Security Zones ... 993
Adding a Website to the Trusted Sites Zone ... 993
Adding a Website to the Restricted Sites Zone ... 994
Enabling the Protected Mode ... 995
Configuring Privacy Settings ... 996
Allowing and Blocking Cookies for Specific Websites ... 996
Deleting Browsing History ... 997
Lab 3.4: Removing Browsing History ... 997
Configuring Windows Firewall ... 998
Enabling Windows Firewall ... 999
Enabling a Firewall Exception ... 1000
Lab 3.5: Enabling Exceptions ... 1000
Setting Advanced Security Options for Windows Firewall ... 1001
Opening the Windows Firewall with Advanced Security Console ... 1002
Creating Firewall Rules ... 1003
Summary ... 1007
Questions and Answers ... 1007

Chapter 4: Configuring and Troubleshooting Network Connectivity ... 1017

Creating a Network Connection ... 1018
Managing Network Connections ... 1020
Lab 4.1: How to Manage Network Connections ... 1021
Sharing Files and Folders ... 1024
Lab 4.2: Sharing Files and Folders ... 1025
Troubleshooting Connectivity Problems ... 1026
Troubleshooting Basic Networking Problems ... 1026
Troubleshooting IP Configurations ... 1027
Troubleshooting Wireless Networks ... 1029
Using the Diagnose Internet Connection Tool ... 1029
Implementing Remote Access ... 1031
Using Remote Assistance ... 1031
Lab 4.3: Creating a Remote Assistance Invitation File and Providing Remote Assistance ... 1036
Using Remote Desktop ... 1040
Lab 4.4: Establishing a Remote Desktop Connection ... 1041
Summary ... 1044
Questions and Answers ... 1044

Chapter 5: Managing Windows Vista Applications 1053

Managing Media Applications 1054
Configuring Windows Media Center 1054
Configuring Windows Media Player 1057
Playing an Audio or Video File 1057
Creating a Playlist 1059
Lab 5.1: Creating a Playlist in Windows Media Player 1059
Sharing Media Files 1060
Configuring Windows Mail 1061
Creating a New E-Mail Account 1061
Creating a New Newsgroup Account 1065
Creating a New Contact 1069
Lab 5.2: Creating a Contact by using Windows Mail 1069
Customizing Windows Mail 1071
Creating a Message Rule 1075
Lab 5.3: Creating a Message Rule for Incoming E-mail Messages 1075
Filtering Junk E-Mails 1078
Using Windows Meeting Space 1080
Using Windows Calendar 1086
Scheduling an Appointment 1086
Publishing a Calendar 1087
Lab 5.4: Publishing a Calendar Created in Windows Calendar 1088
Subscribing to a Calendar 1090
Configuring Windows Fax and Scan 1091
Creating a New Fax Account 1091
Starting the Fax Service 1093
Configuring a Scanner 1095
Configuring Windows Sidebar 1095
Adding Gadgets to Windows Sidebar 1096
Lab 5.5: Adding a Calendar Gadget to the Windows Sidebar 1096
Setting Windows Sidebar Properties 1098
Summary 1099
Questions and Answers 1099

Chapter 6: Managing Systems Running Windows Vista 1109

Troubleshooting Performance Problems 1110
Using the ReadyBoost Feature 1110
Configuring the Flash Memory Device 1111
Lab 6.1: Configuring a Flash Memory Device for ReadyBoost 1111
Considering the Precautions for ReadyBoost 1113
Improving the System's Performance 1113
Using the Performance Information and Tools Feature 1114

Manage Startup Programs 1114
Adjust Visual Effects 1115
Adjust Indexing Options 1116
Adjust Power Settings 1116
Open Disk Cleanup 1117
Advanced Tools 1118
Troubleshooting Startup, Shutdown, and Hanging Problems 1119
Troubleshooting Reliability Problems 1119
Using the Windows Experience Index Tool 1119
Using the Event Viewer 1121
Using the Problem Reports and Solutions Tool 1123
Using Advanced Tools 1126
Reliability and Performance Monitor 1126
Task Manager 1128
Configuring Windows Update 1130
Configuring Windows Update Settings 1130
Hiding and Restoring Updates 1132
Viewing Update History 1134
Configuring Data Protection 1135
Backing Up and Restoring Files and Folders 1135
Lab 6.2: How to Backup and Restore Files and Folders 1135
Using System Restore 1140
Using Windows Complete PC Backup 1142
Restoring Damaged and Deleted Files and Folders by Using Previous Versions 1143
Summary 1144
Questions and Answers 1144

Chapter 7: Configuring and Troubleshooting Mobile Devices 1153

Configuring Display Settings of a Mobile Device 1154
Using the Windows Mobility Center 1154
Configuring Multiple Monitors 1156
Connecting to a Network Projector 1158
Configuring Mobile Devices 1160
Synchronizing Data using the Sync Center 1160
Synchronizing Files with a Mobile Device 1161
Synchronizing Network Files 1165
Lab 7.1: Synchronizing Files Stored on a Network 1165
Using the Windows Mobile Device Center 1168
Using Windows SideShow 1169
Configuring Tablet PC Features 1170
Configuring Pens and Input Devices 1170
Using and Configuring the Tablet PC Input Panel 1173
Personalizing Handwriting Recognition 1175

Lab 7.2: Personalizing Handwriting Recognition in Windows Vista ... 1175
Configuring Power Options ... 1180
Selecting and Customizing a Power Plan ... 1180
Configuring Button Behavior ... 1182
Creating a Custom Power Plan ... 1184
Lab 7.3: Creating Custom Power Plans ... 1184
Summary ... 1185
Questions and Answers ... 1186

Part V EXAM: 70—647

Chapter 1: Planning IP Addressing and Name Resolution in Windows Server 2008 ... 1197

Planning for IP Addressing ... 1198
Exploring IP Addressing Techniques ... 1198
Exploring IP Addressing Ranges ... 1199
Exploring IPv6 Addressing ... 1199
The IPv6 Shorthand Notation ... 1200
The IPv6 Anatomy ... 1200
The IPv6 Address Types ... 1200
The IPv6 Unicast Address ... 1201
The Advantages of IPv6 Addresses ... 1201
Exploring IPv4 to IPv6 Transitional Techniques ... 1202
The Dual Stacking Technique ... 1202
The Tunneling Technique ... 1202
Planning Name Resolution ... 1203
Planning for DNS in Windows Server 2008 ... 1203
Using New Features of DNS ... 1205
Configuring DNS in Windows Server 2008 ... 1205
Lab1.1: Installing and Configuring DNS in Windows Server 2008 ... 1205
Planning for DNS Infrastructure ... 1209
The Domain Namespaces ... 1209
The Split Zones DNS ... 1210
The DNS Forwarding ... 1211
The Zone Types ... 1212
The Root Hints ... 1213
The AD DS with Existing DNS Infrastructure ... 1214
The GlobalNames Zones ... 1215
Planning Name Resolution Support for Legacy Clients ... 1216
Using WINS ... 1216
Using GlobalNames DNS Zones ... 1219

Summary 1219
Questions and Answers 1220

Chapter 2: Planning and Designing AD Domain Services and Physical Topology 1227

Designing an AD Forest Structure 1228
Exploring AD Functional Levels 1229
Exploring Forest Design Elements 1231
Exploring Forest Design Models 1231
Designing an AD Domain Structure 1233
Exploring Domain Design Models 1233
Creating a Domain Structure 1235
Upgrading an Existing Domain or Deploying New Domain 1236
Designing the Forest and Domain Trust Models 1236
The Forest Trusts 1237
The Domain Trust 1237
Designing the AD DS Schema 1238
Designing the Schema Modification 1239
Upgrading the AD DS Schema 1239
Lab 2.1: Designing the Forest Structure 1240
Lab 2.2: Designing the Domain Structure 1240
Lab 2.3: Designing the Functional Levels 1241
Lab 2.4: Designing the Shortcut Trusts 1241
Designing Physical Topology of AD DS 1242
Designing AD DS Site Structure 1242
Gathering Requirements 1242
Designing the AD DS Site Model 1243
Designing the AD DS Replication 1243
The AD DS Replication Topology 1243
The AD DS Site Links and Site Link Properties 1245
The AD DS Site Link Bridging 1245
Designing the Placement of Domain Controllers 1246
The Placement of Forest Root Domain Controllers 1246
The Placement of Regional Domain Controllers 1246
The Placement of RODCs 1246
Designing the Placement of Global Catalog Servers 1247
Designing the Placement of Operation Master Roles 1247
Designing the Placement of Printers 1248
Lab 2.5: Designing the Site Structure 1249
Lab 2.6: Designing Replication 1250
Lab 2.7: Designing the Placement of Domain Controllers 1251
Summary 1251
Questions and Answers 1252

Chapter 3: Planning Migration of Forests and Domains and Cross-Platform Interoperability 1263

Planning for Migration of Forests and Domains 1264
Exploring the Migration Paths 1264
The Domain Upgrade Migration Path 1265
The Domain Restructure Migration Path 1265
The Upgrade-Then-Restructure Migration Path 1265
Exploring the Active Directory Migration Tool 1266
Planning for Migrating an Existing Domain to Windows Server 2008 1266
Lab 3.1: Planning for Migrating an Existing Forest to Windows Server 2008 1267
Exploring the Migration of Network Objects 1268
Exploring the Consolidation of Network Objects 1268
Exploring Cross-forest Authentication 1269
Planning for Interoperability of Disparate Technologies 1270
Planning for Active Directory Federation Services 1270
Exploring Microsoft ILM 2007 FP1 1271
Planning for Cross-Platform Interoperability 1272
Managing User Identity 1272
Understanding Password Synchronization 1272
Exploring Server for NIS 1273
Exploring Services for NFS 1274
Summary 1275
Questions and Answers 1275

Chapter 4: Planning and Designing AD 1285

Planning for Delegation of AD Administration and Administrative Model 1286
Planning the Classification of Organizations 1287
Planning Delegation of Principles and Benefits 1287
Planning AD Management through Delegation 1288
The Service Management 1288
The Data Management 1288
Planning for AD Administrative Model 1289
The Centralized Administrative Model 1289
The Decentralized Administrative Model 1289
The Hybrid Administrative Model 1290
Planning Group Strategy to Delegate AD Management Tasks 1291
Planning for Management Roles 1291
Planning Trusts 1292
The Forest-Level Trusts 1292
The Trust Type and Direction 1293
Planning for AD DS Audit and Group Policy Compliance 1294
Planning the Organizational Structure 1295

Planning and Designing Group Policy Strategies 1297
Planning the Group Policy Hierarchy 1297
Planning the GPO Structure 1297
Planning the AD Structure 1298
Planning the AD Schema 1298
Planning the Group Policy Scope Filtering 1298
Planning the Group Policies to Control Device Installation 1299
Planning Group Policy Settings 1300
Planning for Hardware IDs, Compatible IDs, and GUIDs 1301
Planning for Authentication and Authorization 1302
The Password Authentication 1302
The Fine-Grained Password Policy Based Authentication 1303
Lab 4.1: Implementing Fine-Grained Password Policy Based Authentication 1304
The Smart Card Authentication 1306
Summary 1306
Questions and Answers 1307

Chapter 5: Designing Network Access Strategy and Branch Office Deployment 1315

Designing Network Access Strategy 1316
Designing the Perimeter Network Strategy 1316
Designing for Securing the Perimeter Network 1317
Designing for Strategic Services in the Perimeter Network 1318
Designing for Web Service Deployment in the Perimeter Network 1319
Designing for Remote Access Strategy 1319
Planning for VPN based Remote Access 1319
Planning a VPN Protocol Solution 1320
Planning Secure VPN Server Deployment 1321
Planning for RADIUS Server based Remote Access 1321
Planning RADIUS Server for Main Office 1322
Planning RADIUS Server for Branch Office 1323
Lab 5.1: Designing the VPN Solution 1323
Lab 5.2: Designing the RADIUS Solution 1324
Designing Network Access Protection 1324
Planning and Designing NAP IPSec Enforcement 1326
Planning PKI Support for IPSec Enforcement 1327
Planning VPN Enforcement with NAP 1328
Planning DHCP Enforcement with NAP 1328
Designing Domain and Server Isolation 1329
Comparing IPSec Enforcement with Domain and Server Isolation 1329
Migrating to IPSec NAP from Domain and Server Isolation 1330
Designing Branch Office Deployment 1330
Designing Components and Services of Branch Office 1330

Designing Windows Deployment Services ... 1331
Adding DC in a Branch Office ... 1331
Designing Branch Office Server Security ... 1332
Designing Security of Windows Server 2008 in Branch Office ... 1333
The RODC ... 1334
User Password and Lockout Policies ... 1334
Designing Branch Office Security with NAP ... 1334
Summary ... 1334
Questions and Answers ... 1335

Chapter 6: Planning for Terminal Services, Application Deployment and Virtualization ... 1345

Planning for Terminal Services ... 1346
Planning TS Licensing ... 1347
The Licensing Types ... 1347
The Licensing Server Scopes ... 1347
The TS License Server Activation ... 1348
The License Server Placement ... 1349
The License Server Backup and Restore ... 1349
The License Server Deployment ... 1349
Planning the TS Web Access for Application Deployment ... 1349
Planning Terminal Server Farm Deployment ... 1351
Planning Terminal Services Gateway ... 1351
The TS Gateway Protocols ... 1351
The TS Gateway Placement ... 1352
The TS Gateway Security ... 1352
Planning the Deployment of Applications ... 1353
Using Group Policy ... 1353
Using System Center Essentials ... 1354
Using SCCM 2007 ... 1355
Planning for Virtualization ... 1356
Planning for Operating System Virtualization ... 1356
Planning for Virtual Server 2005 R2 ... 1357
Planning for Hyper-V ... 1358
Creating Virtual Servers ... 1358
Managing Virtual Servers ... 1358
Planning for Server Upgrade or Migration ... 1359
Using VSMT ... 1360
Using SCVMM ... 1360
Planning for Application Virtualization ... 1361
Planning Application Virtualization using Microsoft SoftGrid ... 1361
Deployment of Application Virtualization using Microsoft SoftGrid ... 1362
Branch office Deployment using Microsoft SoftGrid ... 1362

Summary ... 1363
Questions and Answers ... 1363

Chapter 7: Planning and Designing Security in an Enterprise ... 1373

Planning PKI Requirements ... 1374
Planning PKI – Enabled Applications ... 1375
Planning Certificate Requirements ... 1375
Planning Certificate Security Requirements ... 1376
Planning the Company Security Policy ... 1376
Planning Business Requirements ... 1377
Planning Active Directory Requirements ... 1377
Planning Certificate Template Requirements ... 1377
Designing Certificate Authority Hierarchy ... 1378
Designing the Certificate Authority Infrastructure ... 1378
The Root Certificate Authority ... 1378
The Internal and Third-Party Certificate Authority ... 1379
Designing Certificate Types and Roles ... 1380
Designing the Certificate Lifecycle Management Plan ... 1381
Planning Certificate Enrollment ... 1381
The Automatic and Manual Requests ... 1382
The Automatic and Manual Approval ... 1383
Designing the Certificate Authority Renewal Strategy ... 1383
Designing the Certificate Revocation Policy ... 1383
The Certificate Revocation List ... 1383
The Online Certificate Status Protocol ... 1384
Summary ... 1384
Questions and Answers ... 1385

Chapter 8: Planning for Data Sharing, Data Security, and Business Continuity ... 1393

Planning for Data Sharing ... 1394
Planning for DFS Deployment ... 1394
DFS Elements ... 1395
The Advanced Settings and Features of DFS Namespace ... 1396
DFS Replication ... 1397
The DFS Design Process ... 1398
Planning for Implementing SharePoint Infrastructure ... 1399
WSS 3.0 ... 1399
MOSS 2007 ... 1400
Planning for Data Security ... 1400
Using Windows BitLocker ... 1401
The BitLocker Authentication Mode ... 1401
The BitLocker Security Design ... 1402

Using EFS ... 1402
Using AD RMS ... 1403
The AD RMS Rights-Protected Information ... 1404
The AD RMS Applications ... 1405
Lab 8.1: Designing a Data Sharing and Data Storage Security Solutions ... 1406
Planning for Business Continuity ... 1406
Using AD DS Backup and Recovery ... 1407
AD DS Backup ... 1407
AD DS Recovery ... 1408
Seizing the Operations Master Roles ... 1408
Using NLB ... 1409
Using Failover Clusters ... 1409
Summary ... 1409
Questions and Answers ... 1410

Chapter 9: Designing Software Updates and Compliance Management ... 1419

Designing Software Updates ... 1420
Using Microsoft Update ... 1420
Using Windows Server Update Services (WSUS) ... 1421
Managing Windows Server Update Services ... 1421
Deploying Windows Server Update Services ... 1421
The Administration Models ... 1422
The Computer Groups ... 1422
Deploying Windows Server Update Services in an Enterprise ... 1423
Lab 9.1: Installing WSUS 3.0 SP1 on Windows Server 2008 ... 1424
Using System Center Essential 2007 ... 1429
Configuring SCE 2007 Software Update ... 1430
Configuring SCE 2007 in an Enterprise ... 1430
Using System Center Configuration Manager 2007 ... 1430
Designing Compliance Management ... 1431
Lab 9.2: Installing the MBSA Tool on Windows Server 2008 ... 1432
Summary ... 1434
Questions and Answers ... 1435

About the CD ... 1445
