

Table of Contents

Preface	iii
Chapter 1: Introducing Software Engineering	1
1.1 Approach for Software Development	2
Sequential Approach.....	2
Iterative Approach.....	3
Recursive Approach.....	3
1.2 Categories of SDLC Processes	3
1.3 Introducing the Software Development Process Models	4
1.4 Exploring the Software Process Models.....	5
The Build and Fix Model	5
The Waterfall Model.....	5
The Prototyping Model.....	8
The Transformation Model	10
The Spiral Model.....	10
The Cleanroom Model	11
The Rapid Application Development Model	13
The Capability Maturity Model (CMM).....	13
1.5 Agile Methodology	14
Need of Agile Methodology.....	15
Agile Methods.....	15
Benefits of the Agile Methodology.....	16
1.6 Process and Project Metrics	16
1.7 What are Software Engineering Metrics?	17
1.8 Size	18
Lines of Code.....	18
Function Points	18

1.9	Types of Models	19
	Cost Models.....	20
	COCOMO	20
	Constraint Models	26
1.10	Risk Analysis.....	28
1.11	Scheduling, Monitoring, and Controlling the Software Project	29
	Exploring the Gantt Chart.....	33
	Exploring the PERT chart	34
	Summary.....	35
	Quick Revise.....	35

Chapter 2: Requirement Analysis and Engineering.....41

2.1	Requirement Analysis and Specification	41
	Identify Problem/Objectives.....	42
	Determine Information Requirements.....	42
	Analyze System Needs	42
2.2	System Requirements and Specifications	43
	Problems with Requirements.....	43
	Types of Requirements	43
	How to Identify Requirements	44
	System Requirements and Specifications.....	44
	Requirements Determination.....	45
	Requirement Identification Approach.....	46
	Requirements Discovery.....	47
2.3	Various Techniques in Software Requirement Analysis	47
	Data Flows	47
	Data Flow Diagrams versus Flowcharts.....	49
	Data Dictionary	49
	Entity Relationship Diagram.....	49
2.4	Analysis Modeling	51
	Analyzing the Problem using DFD.....	51

Analyzing System using Context-Level Diagram.....	52
Analyzing Systems using Data Dictionary	52
Analyzing Problem using Structured Analysis.....	53
Summary.....	54
Quick Revise.....	54
Chapter 3: Software Design	57
3.1 Design Description.....	58
3.2 Design Activities	59
Abstraction	59
Information Hiding	59
Structure.....	60
Modules	60
3.3 Coupling and Cohesion.....	63
3.4 Architectural Design.....	64
3.5 Distributed System Architecture and Application Architecture.....	65
3.6 Procedural Design.....	67
3.7 Control Flow Oriented Design	68
3.8 Reuse Based Design	69
Reuse Capability Model.....	69
Encouraging Software Reuse	70
Costs Associated with Software Reuse.....	70
Tools for Software Reuse	70
3.9 User Interface Design.....	71
Human Factors.....	71
Interface Standards.....	72
Design Issues.....	73
User Interface Design Process.....	74
Evaluation.....	75
Summary.....	77
Quick Revise.....	77

Chapter 4: Software Configuration Management	87
4.1 Why SCM	88
4.2 Functions in SCM	88
4.3 Strategy for SCM	88
4.4 Software Configuration Management Process.....	89
4.5 SCM Planning	89
4.6 Configuration Item Identification	90
4.7 Configuration Database.....	90
4.8 Change Management.....	91
4.9 Version and Release Management.....	92
4.10 Release Management	92
4.11 Configuration Audit	93
4.12 Status Reporting	94
4.13 Tools for SCM	95
4.14 SCM Standards	97
Summary.....	97
Quick Revise.....	97
Chapter 5: Software Quality and Testing.....	101
5.1 Software Quality Assurance	102
Software Quality Assurance Measures.....	103
Capability Maturity Model	104
5.2 Quality Metrics	106
5.3 Software Reliability	108
5.4 Software Testing.....	109
Deciding What to Test.....	110
Test Planning.....	110
Who Should be Involved?	111
What does the Test Plan Cover?	111
Testing Objectives.....	112
5.5 White Box Testing	114

Basis Path Testing	114
Control Structure Testing	117
5.6 Black Box Testing	118
Equivalence Partitioning	119
Boundary Value Analysis.....	119
Cause-Effect Graphing Techniques.....	120
Comparison Testing	121
5.7 Integration Testing.....	121
Top-Down Integration	122
Bottom-up Integration	123
5.8 System Testing.....	124
5.9 Software Maintenance	124
The Problem of SM	124
Types of SM.....	125
Maintenance Cost Factors.....	127
Maintenance Cost Estimation	129
5.10 Reverse Engineering	130
Summary.....	130
Quick Revise.....	131
Chapter 6: Web Engineering.....	141
6.1 Exploring Attributes	141
6.2 Analysis and Design	143
6.3 Testing.....	146
6.4 Security Engineering.....	147
6.5 Service Oriented Software Engineering	149
6.6 Aspect Oriented Software Development	150
6.7 Test-Driven Development.....	151
Summary.....	151
Quick Revise.....	152

Appendix A: Software Requirement Specification in IEEE Format	159
Appendix B: Scheduling a Project Plan.....	167
Appendix C: Creating DFD and Test Cases Using UML	171
Appendix D: Working with Stubs and Drivers	177
Case Study 1: Corporate Bank	179
Case Study 2: Jain Sports Pvt. Ltd.....	181
Case Study 3: ABC Financial Services (AFS)	183
Case Study 4: Career Shapers	185
Case Study 5: Bharat Telecom Services	187
Additional Software Exercises	189
Model Paper I.....	211
Model Paper II	239
Model Paper III.....	251
Model Paper IV.....	255
Model Paper V	267
Model Paper VI.....	269
Glossary	273
Index	285
