Introduction .....	xi
<b>Chapter 1: Cluster Computing at Glance.....</b>	<b>1</b>
1.1 Concept of Cluster Computing .....	2
Need for Cluster Computing.....	3
Simplifying Computing with the Help of Cluster .....	4
Evolution of Parallel Processor .....	5
1.2 Scalable Parallel Computer Architecture.....	6
Massively Parallel Processors .....	6
Symmetric Multiprocessor .....	6
Cache Coherence Non-Uniform Memory Access .....	6
Distributed System.....	7
Cluster.....	7
1.3 Motivation Behind the Evolution of Low-Cost Parallel Computing .....	8
1.4 Windows Services for Computing Environment.....	9
1.5 Cluster Computer and Its Architecture .....	10
1.6 Cluster Classification .....	11
1.7 Commodity Components for Clusters .....	13
Processors.....	13
Memory and Cache.....	13
Operating System.....	14
Disk and I/O .....	16
System Bus.....	17
Cluster Interconnects .....	17
1.8 Network Services/Communication Software .....	19
1.9 SSI and Cluster Middleware .....	20
SSI Layers .....	21
SSI Boundaries .....	23
Middleware Design Goals .....	24
Key Services of SSI and Availability Infrastructure.....	24

1.10	Resource Management and Scheduling.....	26
1.11	Programming Tools.....	27
	Threads .....	27
	MPI and Parallel Virtual Machine .....	28
	DSM System .....	28
	Parallel Debuggers and Profilers.....	30
	Performance Analysis Tools .....	30
	Cluster Administration Tool .....	31
1.12	Cluster Applications .....	31
1.13	Representative Cluster Systems .....	32
	HPVM Project .....	32
	The Beowulf Project .....	33
	The Berkeley NOW Project .....	34
	Solaris MC: A High-Performance OS for Clusters .....	35
	Comparison of the Four Cluster Environments .....	36
1.14	Cluster of SMPS.....	36
1.15	Case Study on Cluster Application.....	37
	Summary .....	38
	Review Questions .....	39
	Multiple Choice Questions.....	39
	Long Answer Type Questions.....	41
	References .....	42
<b>Chapter 2:</b>	<b>Cluster Setup and Administration.....</b>	<b>43</b>
2.1	Types of Servers in a Cluster .....	43
2.2	Establish a Cluster .....	44
	Interconnecting Nodes.....	44
	Establishing Front End of a Cluster .....	44
	Setting a Cluster Node.....	45
	Directory Services of a Cluster.....	45
	Distributed Computing Environment .....	46
	Global Clock Synchronization.....	46
	Heterogeneous Clusters.....	46
	Pile-of-PC Clusters.....	47

---

Summing Up the Steps to Set Up a Cluster .....	47
2.3 Security in Clusters .....	48
Exploring the Incoming Network Services .....	49
Using Front End to Implement Security .....	50
Understanding the Tradeoffs between Security and Cluster Performance .....	51
Exploring Cluster of Clusters .....	52
2.4 Cluster Monitoring .....	52
Exploring the Parameters Used to Monitor a Cluster .....	52
Automatic Corrective Procedures .....	54
Cluster Monitoring Tools .....	54
2.5 Cluster Tuning .....	56
I/O Implications .....	57
Heartbeat Detection .....	58
Load Balancing Policy .....	58
Web Application Settings .....	59
HTTP Session Replication Mechanism .....	59
Lazy Session Validation .....	60
Automatic Failover .....	60
2.6 Case Study on Hadoop Architecture .....	60
Summary .....	64
Review Questions .....	65
Multiple Choice Questions .....	65
Long Answer Type Questions .....	67
Reference Links .....	68
<b>Chapter 3: Constructing Scalable Services for the Cluster of Nodes .....</b>	<b>69</b>
3.1 Environment .....	70
Scalability and Its Measurement .....	71
Summarizing the Assumptions Made .....	73
Weak Consistency of Cluster State .....	74
Model Definition and Requirements .....	74
3.2 Resource Sharing .....	75
FLS Algorithm .....	75
Resource Location Study .....	76
Resource Sharing Algorithm Analysis .....	76

3.3	Enhanced Locality Using the FLS Algorithm.....	78
	State Metric.....	78
	Basic Algorithm Preserving Mutual Interest.....	79
	Resource Proximity.....	81
	Simulation Runs.....	83
	Simulation Results.....	83
3.4	Prototype Implementation and Extension.....	83
	Parallel Virtual Machine.....	84
	Resource Manager Extension.....	84
3.5	Performance Enhancement through Probing.....	84
	Summary.....	85
	Review Questions.....	85
	Multiple Choice Questions.....	85
	Long Answer Type Questions.....	87
	Reference Links.....	88
<b>Chapter 4:</b>	<b>Introduction to Grid and Its Evolution.....</b>	<b>89</b>
4.1	Exploring the Need of Grid.....	89
4.2	Discussing the History of Grid Computing.....	90
	The First Generation of Grid.....	91
	The Second Generation of Grid.....	91
	The Third Generation of Grid.....	95
4.3	Components of Grid.....	97
4.4	Application of Grid.....	97
4.5	Future Predictions of Grid Computing.....	99
	Summary.....	100
	Review Questions.....	100
	Multiple Choices Questions.....	100
	Long Answer Type Questions.....	102
	Reference Links.....	104
<b>Chapter 5:</b>	<b>Implementing Production Grids.....</b>	<b>105</b>
5.1	Grid Context.....	106
	Globus.....	107
	Open Grid Services Architecture.....	108

DOE Science Grid .....	108
5.2 Grid Support for Collaboration .....	108
5.3 Building an Initial Multisite, Computational, and Data Grid .....	109
Building Teams .....	110
Grid Resources .....	110
Creating an Initial Test Bed System .....	110
5.4 Cross Site Trust Management.....	111
Establishing Trust.....	111
Establishing a CA .....	112
5.5 Transition of a Test Bed System to a Prototype Production Grid .....	113
Determining the Features of Grid .....	114
Setting Directory Service Models for GIS .....	114
Performing Local Authorization .....	115
Considering the Issues Related to Security of Sites.....	115
Setting High-Performance Factors .....	116
Using Batch Schedulers .....	116
Preparing Test Cases .....	117
Moving from Test System to Prototype Production Grid .....	117
Administrating Grid Systems.....	117
Managing Data.....	117
Providing Help at User End.....	118
Summary .....	118
Review Questions .....	119
Multiple Choice Questions.....	119
Long Answer Type Questions.....	121
Reference Links.....	122
<b>Chapter 6: Anatomy of Grid .....</b>	<b>123</b>
6.1 Virtual Organizations.....	124
6.2 Nature of Grid Architecture .....	125
6.3 Grid Architecture Description and Practice .....	126
Web Services.....	127
Web Services Resource Framework .....	128
Layers of Grid Architecture .....	130

Practical Implementation of Grid Architecture .....	136
6.4 InterGrid Protocols .....	136
6.5 Relation of Grid with Other Technologies .....	137
6.6 Other Perspective on Grids .....	138
Summary .....	138
Review Questions .....	139
Multiple Choice Questions.....	139
Long Answer Type Questions.....	141
Reference Links.....	142
<b>Chapter 7: Introduction to Cloud Computing .....</b>	<b>143</b>
7.1 Defining Clouds.....	144
Exploring the Working of Cloud Computing .....	145
Describing the Features of Cloud Computing.....	147
Exploring the Benefits of Cloud Computing.....	149
Exploring the Limitations of Cloud Computing .....	149
Describing the Parties Involved in Cloud Computing .....	150
Exploring Cloud Types .....	150
7.2 Comparing Cloud Providers with Traditional IT Service Providers .....	153
7.3 Consuming Cloud Services .....	154
7.4 Exploring Cloud Models.....	154
Introducing Infrastructure as a Service .....	156
Introducing Platform as a Service .....	157
Introducing Software as a Service.....	158
Explaining Cloud Elements.....	159
7.5 Eucalyptus Private Cloud Architecture.....	160
7.6 Moving Inside the Cloud.....	162
Exploring Situations to Use Cloud Computing .....	162
Understanding When Cloud Computing Should Not Be Used .....	165
7.7 Monitoring and Administering Cloud Services .....	167
Understanding Service-Level Agreements.....	167
Monitoring Billing of Cloud Services .....	168
7.8 Discussing about the Technical Interface.....	168
Discussing about Cloud APIs and Data Transformations .....	168

---

Learning about the Application and Data Architecture .....	168
Implementing Security in the Cloud Environment .....	169
7.9 Controlling the Cloud-Services-Based Resources .....	169
Implementing IT Security .....	169
Examining the Performance of Software Services on Cloud .....	170
Requesting a Resource for Immediate Usage.....	170
Summary .....	170
Review Questions .....	171
Multiple Choice Questions.....	171
Long Answer Type Questions.....	173
Reference Links.....	174
<b>Chapter 8: Exploring the Nature of Cloud.....</b>	<b>175</b>
8.1 Evaluating the Benefits of Highly Scaled Data Center .....	176
Comparing Traditional and Cloud Data Center on Financial Basis .....	176
Scaling the Cloud.....	178
Comparing Traditional and Cloud Data Centers on Cost Basis .....	179
8.2 Evaluating the Technical Cost for Scaling Systems .....	180
Comparing Hardware Cost of Both Data Centers .....	181
Examining the Economic Benefits in Business Expansion .....	183
8.3 Managing Cloud's Workload .....	184
Considering Workloads as Planned Services .....	184
Providing Interfaces to Manage Workload .....	186
Exploring the Role of XML in Connecting Containers .....	186
Exploring Container Workloads in Cloud Environment .....	186
Risk Balancing in Data Centers.....	187
8.4 Controlling Data.....	187
Exploring the Types of Data.....	188
Protecting Data .....	188
Managing Large and Diverse Data .....	191
8.5 Exploring Private and Hybrid Clouds .....	193
Knowing More About Private Cloud .....	194
Comparing the Public, Private, and Hybrid Clouds .....	194
Exploring Noteworthy Cloud Service Vendors.....	195

8.6	Homomorphic Encryption.....	200
	Summary .....	201
	Review Questions .....	202
	Multiple Choice Questions.....	202
	Long Answer Type Questions.....	203
	Reference Links.....	204
<b>Chapter 9:</b>	<b>Exploring the Cloud Elements.....</b>	<b>205</b>
9.1	Exploring Infrastructure as a Service.....	206
	Explaining the Concept of Virtualization.....	207
	Describing the Simple Datacenter Model for Cloud Computing Environment .....	210
	Introducing Capacity Planning .....	211
	Introducing Cloud Scaling .....	212
	Tools and Monitoring Systems .....	212
	Comparing the ISP Model and IaaS .....	213
	Introducing the Amazon's EC2 Project .....	214
	Technology Supporting IaaS.....	216
9.2	Exploring Platform as a Service.....	216
	Integrated Life Cycle Platform as a Service .....	217
	Anchored Life Cycle Platform as a Service .....	219
	Introducing Technologies for PaaS.....	221
9.3	Introducing Software as a Service .....	221
	The Salesforce.com Platform .....	223
	Working of the SaaS Model .....	224
	Driving Forces Behind SaaS.....	225
	Summary .....	226
	Review Questions .....	227
	Multiple Choice Questions.....	227
	Long Answer Type Questions.....	229
	Reference Links.....	230
<b>Index.....</b>		<b>231</b>
