

Table of Contents

| | |
|---|-----------|
| Chapter 1: Introduction to Engineering Mechanics | 1 |
| 1.1 Basic Concepts of Engineering Mechanics | 2 |
| 1.2 Idealization of Bodies in Engineering Mechanics | 4 |
| 1.3 Basic Units | 4 |
| 1.4 Scalars and Vectors | 5 |
| 1.5 Effects of Forces on Bodies..... | 6 |
| External Effects of Force..... | 6 |
| Internal Effects of Force..... | 8 |
| 1.6 Axioms in Engineering Mechanics..... | 9 |
| Resultant of Forces | 9 |
| The Principle of Transmissibility of Forces..... | 12 |
| The Principle of Superposition of Forces | 12 |
| Newton's Laws of Motion | 14 |
| Newton's Law of Gravitation | 14 |
| 1.7 Concept of Gravitational Acceleration..... | 15 |
| Summary..... | 17 |
| Review Exercises..... | 17 |
| | |
| Chapter 2: Coplanar Forces | 19 |
| 2.1 Resolution of a Force..... | 19 |
| Graphical Method for the Resolution of Force..... | 20 |
| Analytical Method for the Resolution of Force | 21 |
| 2.2 Rectangular Components of a Force..... | 22 |
| 2.3 Moment of a Force | 24 |
| Varignon's Theorem of Moments | 25 |
| Couples | 26 |
| 2.4 Force Systems | 27 |
| Resultant of a Force System..... | 28 |
| Concept of Equilibrium | 29 |
| Free-Body Diagram..... | 33 |
| 2.5 Types of Supports | 35 |
| Flexible Cable (Belt, Chain, or Rope) | 35 |
| Smooth Surfaces | 36 |
| Rough Surfaces | 36 |
| Simple Support or Roller Support | 37 |

| | |
|---|------------|
| Hinged Support or Simple Pin Connection | 37 |
| Fixed Support of Built-In Support or Encastre | 38 |
| Ball and Socket Joint | 38 |
| Roller or Wheel Support with Lateral Constraint | 39 |
| Collar Joint or Collar Bearing | 39 |
| Metallic Link | 39 |
| Summary | 40 |
| Illustrated Examples | 40 |
| Moment and Couple | 53 |
| Resultant of Parallel Coplanar Force System | 58 |
| Exercises for Practice | 66 |
| Operations with Coplanar Forces | 66 |
| Resultant of Concurrent Coplanar Forces | 77 |
| Resultant of Parallel Coplanar Force Systems | 81 |
| Resultant of General Coplanar Force Systems | 85 |
| Equilibrium of Concurrent Coplanar Force Systems | 91 |
| Equilibrium of Parallel Coplanar Force Systems | 102 |
| Equilibrium of General Force Systems | 106 |
| | |
| Chapter 3: Center of Gravity and Centroids | 121 |
| 3.1 Center of Parallel Forces | 121 |
| 3.2 Center of Gravity | 123 |
| 3.3 Center of Mass | 124 |
| 3.4 Centroid | 125 |
| Centroids of Volumes | 125 |
| Centroids of Areas | 125 |
| Centroids of Lines | 126 |
| 3.5 Important Points Related to the Center of Gravity | 126 |
| 3.6 Centroids of Some Standard Objects | 128 |
| Linear Objects | 128 |
| Laminar Objects | 131 |
| Volumetric Objects | 137 |
| Summary | 141 |
| Illustrated Examples | 141 |
| Centroids of Linear Objects (1-D) | 141 |
| Exercises for Practice | 165 |
| | |
| Chapter 4: Friction | 181 |
| 4.1 Friction | 181 |
| Classification of Friction | 182 |

| | | |
|-------------------|--|------------|
| | Limiting Friction..... | 182 |
| 4.2 | Laws of Friction | 183 |
| | Laws of Static Friction | 183 |
| | Laws of Kinetic or Dynamic Friction | 184 |
| | Coulomb's Law of Dry Friction | 184 |
| 4.3 | Coefficient of Friction (μ) | 184 |
| 4.4 | Angle of Friction (ϕ) | 186 |
| 4.5 | Cone of Friction..... | 187 |
| 4.6 | Angle of Repose..... | 187 |
| 4.7 | Equilibrium of a Body on Rough Surfaces..... | 189 |
| | Equilibrium on Horizontal Plane | 189 |
| | Equilibrium of a Body on an Inclined Plane | 189 |
| 4.8 | Criteria for Sliding or Tipping | 193 |
| 4.9 | Application of Friction..... | 195 |
| | Ladder Friction..... | 195 |
| | Wedges Friction | 196 |
| | Belt Friction | 199 |
| | Summary | 202 |
| | Illustrated Examples | 202 |
| | Exercises for Practice | 237 |
| | Surface Friction | 237 |
| | III. Belt Friction | 252 |
| Chapter 5: | Analysis of Structures | 261 |
| 5.1 | Beams | 261 |
| | Statically Determinate Beams | 261 |
| | Statically Indeterminate Beams | 262 |
| | Compound Beams | 262 |
| 5.2 | Loads | 263 |
| | Types of Loads..... | 263 |
| | Load Analysis..... | 264 |
| 5.3 | Cables | 265 |
| | Assumptions Related to Analysis of Cables | 265 |
| | Analysis of Cables..... | 266 |
| 5.4 | Trusses | 266 |
| | Assumptions for the Analysis of Trusses | 268 |
| | Classification of Trusses | 268 |
| | Analysis of Truss..... | 269 |
| 5.4 | Frames | 272 |
| | Summary | 273 |
| | Illustrated Examples..... | 274 |

| | |
|---|------------|
| Beams | 274 |
| Cables | 278 |
| Trusses: Method of Joints | 284 |
| Trusses: Method of Sections | 300 |
| Frames | 308 |
| Exercises for Practice | 321 |
| I. Simple and Compound Beams | 321 |
| II. Cables | 328 |
| III. Trusses: Method of Joints | 333 |
| IV. Trusses: Method of Sections | 339 |
| V. Frames: Method of Members | 344 |
| | |
| Chapter 6: Space Forces | 353 |
| 6.1 Unit Vector and Vector Triad | 353 |
| 6.2 Scalar Product or Dot Product | 355 |
| 6.3 Vector Product or Cross Product | 356 |
| 6.4 Scalar Triple Product | 358 |
| 6.5 Vector Triple Product | 359 |
| 6.6 Force Vector | 359 |
| 6.7 Moment of a Force about a Point | 361 |
| 6.8 Moment of a Force about a Line | 362 |
| 6.9 A Force Set | 363 |
| Equivalent Sets | 363 |
| Determination of an Equivalent System | 364 |
| 6.10 Resultant of a Force System | 364 |
| 6.11 Wrench | 365 |
| 6.12 Equilibrium of a Space Force System | 367 |
| Summary | 367 |
| Illustrated Examples | 368 |
| Concept of Vector | 368 |
| II. Force Vector | 377 |
| III. Equilibrium of Space Force | 382 |
| IV. Moment of Force | 391 |
| Exercises | 397 |
| I. Operations with Space Forces | 397 |
| II. Resultant of Space Forces | 404 |
| III. Equilibrium of Space Forces | 406 |
| | |
| Chapter 7: Kinematics of Particles | 417 |
| 7.1 Motion of a Particle | 417 |

| | |
|---|-----|
| Displacement | 418 |
| Velocity | 419 |
| Acceleration | 421 |
| Classification of Motion of Particles | 423 |
| 7.2 Rectilinear Motion | 423 |
| 7.3 Motion Curves | 424 |
| 7.4 Motion with Variable Acceleration | 428 |
| 7.5 Simple Harmonic Motion..... | 430 |
| 7.6 Relative Motion | 432 |
| Relative Velocity and Acceleration | 432 |
| Shortest Distance between Two Moving Particles | 433 |
| 7.7 Dependent Motion..... | 433 |
| 7.8 Curvilinear Motion | 434 |
| Rectangular Components | 434 |
| Path Variables | 436 |
| Polar Co-Ordinates | 438 |
| Cylindrical Co-Ordinates | 441 |
| 7.9 Motion of Projectiles..... | 442 |
| Projectile Terminology | 443 |
| Projectiles on Inclined Planes | 447 |
| Summary | 450 |
| Illustrated Examples | 451 |
| Uniformly Accelerated Motion | 451 |
| Motion under Gravity..... | 458 |
| Acceleration = $f(\text{time})$ | 464 |
| Curvilinear Motion in 2-D (Rectangular Components) | 490 |
| Curvilinear Motion in 2-D Path Variables | 497 |
| Curvilinear Motion in 2-D Polar Co-Ordinates:..... | 508 |
| Curvilinear Motion in 2-D Motion of Projectiles..... | 525 |
| Curvilinear Motion in 3-D Cylindrical Co-Ordinates and Rectangular Components | 535 |
| Relative Motion | 542 |
| Dependent Motion..... | 561 |
| Exercises for Practice | 580 |
| Uniformly Accelerated Motion | 580 |
| Rectilinear Motion under Gravity | 583 |
| Rectilinear Motion with Variable Acceleration $a=f(t)$ | 586 |
| Problems on Jerk: | 589 |
| Rectilinear Motion with Variable Acceleration $a=f(v)$ | 590 |
| Rectilinear Motion with Variable Acceleration $a=f(x)$ | 592 |
| Simple Harmonic Motion..... | 595 |
| Graphical Representation of Rectilinear Motion: Motion Curves | 595 |

| | |
|---|------------|
| Curvilinear Motion: Rectangular Co-Ordinates | 604 |
| Curvilinear Motion Tangential and Normal Components of Acceleration (Path Variables) | 611 |
| Curvilinear Motion Radial and Transverse Component of Velocity and Acceleration (Polar Co-Ordinates) | 616 |
| Curvilinear Motion: Motion of Projectiles | 624 |
| Space Curvilinear Motion (Rectangular Components and Cylindrical Co-Ordinates) | 630 |
| Relative Motion | 630 |
| Dependent Motion | 636 |
| | |
| Chapter 8: Kinetics of Particles | 643 |
| 8.1 Newton's Second Law of Motion | 643 |
| 8.2 Newtonian Frame of Reference | 645 |
| 8.3 Derivation of Newton's First Law from Newton's Second Law and Principle of Conservation of Linear Momentum | 645 |
| 8.4 The Concept of Dynamic Equilibrium | 647 |
| 8.5 Impulse Momentum Principle | 648 |
| 8.6 Direct Central Impact | 649 |
| 8.7 Collision of a Body of Finite Mass with a Body of Infinite Mass | 652 |
| 8.8 Work of a Force | 654 |
| 8.9 Work Done by a Constant Force in Rectilinear Motion | 656 |
| 8.10 Work Done by Force of Gravity | 657 |
| 8.11 Work Done by a Resisting Force of the Spring | 658 |
| 8.12 Work Done by Gravitational Force | 659 |
| 8.13 Work Energy Principle | 660 |
| 8.14 Power | 661 |
| 8.15 Efficiency | 662 |
| 8.16 Conservative Forces | 662 |
| 8.17 Conservation of Energy | 663 |
| Summary | 664 |
| Illustrated Examples | 664 |
| Newton's Second Law of Motion and D'Alembert's Principle | 664 |
| Kinetic Energy and Potential Energy | 676 |
| Work-Energy Principle, Power, and Efficiency | 683 |
| Impulse-Momentum Principle and Direct Central Impact | 725 |
| Exercises for Practice | 781 |
| Newton's Second Law of Motion and D'Alembert's Principle | 781 |
| Work Energy Principle and Power | 807 |
| Impulse – Momentum Principle | 831 |
| Direct Central Impact | 831 |
