

Table of Contents

Preface iii

INTRODUCTION

1. Introduction to Multimedia & Animation	1
Multimedia	2
Applications of Multimedia	3
Animation	4
Cel Animation	5
Stop Motion Animation	5
Computer Animation	6
Principles of Animation	6
Squash and Stretch	7
Anticipation	7
Staging	8
Straight Ahead and Pose to Pose	8
Follow Through and Overlapping Action	9
Slow In and Slow Out	9
Arcs	9
Secondary Action	10
Timing	10
Exaggeration	11
Solid Drawing	11
Appeal	12
3D Animation Content Development Workflow	12
Preproduction Stage	13
Production Stage	14
Post production Stage	15
Multimedia and Animation Software	15
Photoshop CS5	16
Flash CS5	16
Premiere Pro CS5	17
After Effects CS5	17
Sound Forge Pro 10.0	18
3ds Max 2012	18
Maya 2012	19
ZBrush 4	19
Mudbox 2012	20
Summary	20

PHOTOSHOP CS5

1. Getting Started with Photoshop CS5	21
Launching Photoshop CS5	22
Exploring the Interface	23
The Application Bar	23

The Options Bar	24
The Document window	24
The Panels	25
The Tools Panel	28
Exploring Commonly Used Tools	31
The Move Tool	32
The Eyedropper Tool	32
The Zoom Tool	32
The Hand Tool	32
The Type Tool	32
The Quick Selection Tool	33
The Mixer Brush Tool	33
Creating a New Document	33
Opening an Existing Image	34
Opening an Image Using Adobe Bridge	35
Saving a Document	37
Closing a Document and Quitting Photoshop CS5	38
Summary	38
2. Working with Images and Layers	39
Differentiating Between Bitmap and Vector Images	40
Defining Color Modes	41
Making Color Adjustments	44
Levels Adjustment	45
Brightness/Contrast Adjustments	48
Hue/Saturation Adjustments	49
Editing Images	49
Changing the Resolution of an Image	50
Straightening an Image	52
Cropping an Image	53
Duplicating an Image	55
Working with Selection in an Image	56
Making a Selection	56
Modifying a Selection	59
Saving and Loading a Selection	61
Working with Layers	62
Creating a Layer from Selection	63
Merging Layers	64
Flattening Image	65
Linking and Unlinking Layers	65
Hiding and Showing Layers	66
Aligning and Distributing Layers	67
Changing the Layer Opacity	68
Applying Blend Modes	69

Masking in Photoshop CS5	71
Layer Masking	71
Vector Masking	72
Summary	74
3. Painting and Retouching in Photoshop CS5	75
Setting Foreground and Background Colors	76
Using the Color Picker Dialog Box	77
Using the Eyedropper Tool	78
Filling a Selection	79
Exploring Drawing Tools	81
Working with Painting Tools	83
Gradient Tool	83
Brush Tool	87
Working with Retouching Tools	88
Healing Brush Tool	88
Spot Healing Brush Tool	89
Patch Tool	90
Clone Stamp Tool	91
Pattern Stamp Tool	92
Eraser Tool	93
Background Eraser Tool	93
Magic Eraser Tool	93
Blur Tool	94
Sharpen Tool	94
Smudge Tool	94
Dodge Tool	95
Burn Tool	95
Working with Filters	95
Applying the Cutout Filter	96
Applying the Blur Filter	97
Applying the Pinch Filter	98
Using Render Filters	99
Summary	102

FLASH CS5

1. Getting Started with Flash CS5	103
Launching the Flash Application	104
Creating a New Flash Document	105
Exploring the User Interface of Flash	106
The Menu Bar	107
The Stage and the Pasteboard	108
The Tools Panel	108
The Properties Panel	110
The Library Panel	110
The TIMELINE Panel	111
The MOTION EDITOR Panel	111
Setting the Properties of Stage	112
Exploring the Different Drawing Modes in Flash	114

The Merge Drawing Mode	114
The Object Drawing Mode	114
Working with Drawing Tools in Flash	115
Using the Rectangle Tool	115
Using Pen Tool	116
Using the Brush Tool	117
Using the Deco Tool	117
Working with the Selection and Modification Tools	123
Using Selection Tool	123
Using Free Transform Tool	124
Using the Gradient Transform Tool	126
Using Bone Tool	128
Saving a Flash Document	129
Closing the Document and Quitting Flash	130
Summary	130
2. Working with Objects and Symbols	131
Editing Objects in Flash	132
Changing the Shape and Outline of an Object	132
Converting Lines to Fills	133
Breaking Apart a Group and an Object	134
Transforming Objects	135
Distorting an Object	135
Modifying an Object using the Envelope Option	137
Scaling an Object	138
Rotating and Skewing an Object	139
Creating Symbols	140
Creating a Symbol from an Existing Object	140
Converting an Animation into a Movie Clip Symbol	142
Inserting Instances in Flash	146
Summary	146
3. Working with TIMELINE Panel	147
Working with Frames and Keyframes in Flash	148
Inserting Frames and Keyframes in the TIMELINE Panel	148
Converting a Keyframe into a Frame	150
Copying and Pasting a Frame or Sequence of Frames	151
Changing the Length of a Sequence of Frames	153
Deleting a Frame or a Sequence of Frames	153
Working with Layers and Layer Folders in Flash	154
Creating a Layer	155
Locking and Unlocking a Layer	155
Hiding a Layer	156
Creating a Layer Folder	157
Renaming a Layer or Layer Folder	158
Copying and Pasting the Content of a Layer	159

Deleting a Layer	161
Summary	162
4. Creating Animations	163
Understanding Tweened Animations	164
Creating Frame-by-Frame Animations	164
Using Shape Tweening in Flash	166
Creating a Shape Tween	167
Using Shape Hints to Control Changes in the Shape Tween	168
Exploring the Onion Skinning Feature	171
Working with Motion Tweening in Flash	172
Creating a Motion Tween	172
Setting the Properties of a Tweened Object by using the PROPERTIES Panel	174
Adding an Additional Tween to an Existing Tweened Layer	176
Working with Motion Presets in Flash	178
Previewing a Motion Preset	178
Applying a Motion Preset	180
Saving a Tween as a Custom Motion Preset	181
Deleting a Motion Preset	183
Understanding Classic Tween in Flash	184
Creating a Classic Tween	184
Creating Classic Tween Motion along a Guided Path	187
Working with Sound Files in Flash	188
Importing a Sound File	189
Adding a Sound File in the TIMELINE Panel	190
Using Video in Flash	193
Importing a Video File	193
Importing a Video File from a Local Source	194
Loading an External Video File with Playback Components	194
Embedding a Video File in a Flash Document	197
Importing a Video File from an External Source	199
Summary	202
5. Publishing and Exporting Flash Files	203
Publishing Files in Flash	204
Working with Publish Settings	204
Exploring the Formats Tab	206
Exploring the Flash Tab	206
Exploring the HTML Tab	208
Working with Publish Profiles	210
Exporting Files in Flash	219
Exploring the Various Export File Formats	219
Exporting Files from Flash Projects	219
Summary	222

3DS MAX 2012

1. Getting Started with 3ds Max 2012	223
Exploring the Features of 3ds Max 2012	224
Launching 3ds Max 2012	225
Understanding the 3ds Max User Interface	226
Understanding Geometry Primitives	228
Working with Objects	228
Creating and Saving an Object	228
Selecting an Object	230
Moving an Object	232
Rotating an Object	233
Scaling an Object	234
Cloning an Object	235
Mirroring an Object	237
Linking and Unlinking an Object	238
Setting Properties of an Object	240
Exploring Grids	241
Working with Pivot Points	242
Exploring Layers	243
Working with Splines	243
Drawing Splines	244
Editing Splines	245
Rendering Splines	247
Exploring MassFX	248
Summary	252
2. Modeling in 3ds Max 2012	253
Exploring Modeling Concepts	254
Working with Editable Poly Objects	254
Converting Primitives into an Editable Poly	255
Applying the Edit Poly Modifier	256
Modifying Editable Poly Objects	257
Selecting the Sub-Objects of an Editable Poly Object	258
Extruding a Polygon	258
Exploring the Graphite Modeling Tools Ribbon	260
Exploring NURBS Modeling	260
Creating a NURBS Surface Sub-Object	261
Converting an Object to a NURBS Object	262
Editing a NURBS Object	263
Exploring Subdivision Modeling	265
Summary	266
3. Working with Lights, Materials, and Cameras	267
Working with Lights	268
Exploring Categories of Lights	268
Properties of Light	268
Creating Standard Lights	269

Creating Photometric Lights	271
Working with Materials	272
Exploring the Slate Material Editor	273
Using Standard Materials	274
Exploring Shader Types	276
Working with Cameras	277
Creating a Camera	278
Creating a Camera from a Specific View	279
Exploring Camera Attributes	280
Animating a Camera	280
Summary	282
4. Animating in 3ds Max 2012	283
Understanding Animation Concepts	284
Defining Time Configuration Dialog Box	284
Using the Auto Key Mode	285
Using the Set Key Mode	287
Creating and Viewing Previews	289
Exploring Kinematics	290
Exploring the Inverse Kinematics Methods	291
Understanding Character Studio	291
Working with Biped	292
Creating a Biped	292
Manipulating a Biped	293
Animating a Biped	295
Understanding Physique	296
Understanding Particle Systems	297
Working with MassFX	297
Summary	300
5. Rendering in 3ds Max 2012	301
Introducing the Scanline Renderer	302
Introducing Ray Tracing	303
Introducing Advanced Lighting	304
Introducing the mental ray Renderer	304
Defining Global Illumination	306
Defining Caustics	306
Introducing the VUE File Renderer	307
Using Texture Baking	307
Introducing the Quicksilver Hardware Renderer	309
Introducing the iray Renderer	310
Exploring the Rendered Frame Window	311
Quitting the 3ds Max 2012 Application	312
Summary	312
6. Getting Started with Mudbox 2012	313
Understanding Mudbox Workflow Stages	314
Exploring the New and Enhanced Features	315
Exploring the Mudbox 2012 Interface	316

Views	316
Trays	317
Layers/Object List/Viewport Filters windows	318
Properties Window	319
Heads-Up Display	320
Understanding the Sculpt Tools and their Properties	320
Size and Strength	321
Invert Function	321
Mirror	321
Falloff	322
Use Stamp Image and Stamp Spacing	323
Sculpting in Mudbox	323
Loading a Base Mesh	323
Navigating in the 3D View	324
Transforming the Base Mesh	326
Sculpting the Base Mesh	328
Subdividing a Mesh	330
Texture-Painting in Mudbox	331
Understanding UV Mapping	332
Exploring Painting Tools and Paint Modes	332
Painting on a Model	333
Painting Using Brush Stamp	335
Painting Using Stencil Projection	337
Working with Materials	338
Lighting and Rendering	342
Lighting a Scene	342
Applying Visual Effects	346
Creating a Turntable Movie in Mudbox	346
Exporting Your Model from Mudbox	348
Summary	350

MAYA 2012

1. Getting Started with Maya 2012	351
Exploring the New Features of Maya 2012	352
Launching Maya 2012	353
Understanding Maya 2012 UI	354
Main Menu Bar and Menu Set	355
Status Line	356
Shelf	356
Tool Box	356
Viewport	357
Channel Box/Layer Editor	358
Time Slider and Range Slider	359
Command Line and Help Line	359
Hotbox and Marking Menu	360
Working with Projects and Scenes	360
Creating a New Project	360
Creating a New Scene	362

Saving a Scene	362	Creating Lens Flare Effect	421
Getting Familiar with Maya 3D Space	363	Adding Glow Effect on an Object	422
Understanding Wireframe and Shaded Modes	364	Exploring Mental ray for Maya Lighting	424
Working with Objects	364	Caustic	425
Creating an Object in Maya	364	GI	425
Transforming Objects	368	Final Gather	425
Working with Views	371	Describing the Mental Ray Attributes	425
Duplicating Objects in Maya	372	Summary	426
Deleting Construction History	373	4. Animating and Rendering in Maya 2012	427
Exiting Maya 2012	373	Exploring Types of Animation	428
Summary	374	Working with Keyframe Animation	430
2. Modeling in Maya 2012	375	Adding Keyframes	430
Exploring the Components of a Polygon Mesh	376	Adding Keyframes Automatically	433
Working with Polygon Modeling	378	Editing a Keyframe	434
Creating a Polygon Mesh	378	Using Graph Editor	435
Modifying a Polygon Mesh	381	Previewing an Animation	438
Creating a Symmetrical Polygon Mesh	388	Creating Editable Motion Trail	438
Using the Soft Selection Feature	389	Ghosting an Animated Object	440
Working with NURBS Modeling	391	Exploring Types of Renderer	441
Exploring the NURBS Components	391	Maya Software Renderer	442
Drawing a NURBS Curve	394	Maya Hardware and Hardware 2.0 Renderer	442
Editing NURBS Curves	397	Mental ray for Maya Renderer	442
Creating a NURBS Surface	401	Maya Vector Renderer	442
Editing a NURBS Surface	403	Selecting a Renderer	443
Working with Booleans	406	Rendering a Scene	444
Union	406	Setting Attributes in the Common Tab	444
Difference	407	Setting Attributes in the Maya Software Tab	446
Intersection	407	Rendering Using Render View	450
Summary	408	Working with Render Layers	451
3. Shading and Lighting in Maya 2012	409	Using mental ray for Maya Renderer	452
Exploring Common Shader Types	410	Working with Cameras	455
Exploring Common Shader Attributes	411	Creating a Camera	455
Color	412	Viewing a Scene through the Camera	456
Transparency	412	Making a Camera Renderable	456
Ambient Color	413	Adding Depth of Field	457
Incandescence	413	Enabling Motion Blur	458
Diffuse	413	Summary	460
Translucence Depth and Translucence Focus	413	5. Getting Started with ZBrush 4	461
Specular Color	413	Exploring the New and Enhanced Features	462
Reflectivity	413	Exploring the ZBrush 4 Interface	464
Roughness, Highlight Size, and Whiteness	414	The Canvas	465
Eccentricity	414	The Palettes	466
Specular Rolloff	414	The Trays	466
Cosine Power	414	The Shelf	467
Working with Hypershade Window	414	The Title Bar	467
Working with Lights	416	The Status Bar	468
Applying Lighting Effects	419	Working with ZBrush Projects	468
Illuminating Fog Effect	419	Saving a Project in ZBrush	468

Loading a Project in ZBrush	469
Creating a New ZBrush Document	470
Working with ZTools and the Edit Mode	471
Differentiating Edit Mode and Draw Mode	472
Navigating in Edit Mode	474
Working with Digital Clay or Mesh	475
Exploring Different Types of Sculpting Brushes	475
Subdividing Mesh	476
Sculpting with Symmetry	478
Working with SubTools	481
Working with ZSphere	486
Applying Materials in ZBrush	489
Rendering in ZBrush	491
Working with a 3D Model Imported from Maya	493
Summary	494

SOUND FORGE PRO 10.0

1. Getting Started with Sound Forge Pro 10.0	495
Exploring MIDI and Digital Audio	496
Introducing MIDI	496
Introducing Digital Audio	496
Exploring the File Formats Supported by Sound Forge	497
Getting Started with Sound Forge	498
Exploring the Interface	500
Title Bar	501
Menu bar	501
Toolbars	501
Status Bar	501
Workspace	501
Data Window	501
Channel Meters Window	502
Opening an Existing Audio File	502
Working with a Data Window	503
Setting the Cursor Position	504
Selecting the Data in a Data Window	505
Introducing Transport Toolbar	507
Working with Markers	507
Inserting Markers	508
Renaming Markers	508
Navigating Markers	509
Working with Regions	511
Creating a Region	511
Splitting a Region	512
Extracting Regions to a New File	516
Converting Markers into Regions	518
Saving the Audio File	520
Summary	522

2. Recording and Editing in Sound Forge	523
Using Automatic Retake Recording	524
Using Punch-In Recording	529
Describing Automatic Recording	531
Working with Editing Tools	535
The Edit Tool	535
The Magnify Tool	535
The Pencil Tool	537
The Event Tool	537
The Envelope Tool	537
Using Paste Special Options	537
Mixing Data	537
Overwriting Data	540
Replicating Data	542
Trimming/Cropping data	543
Using the Channel Converter	544
Converting a Stereo File to Mono	545
Converting a Mono File to Stereo or Multichannel	547
Working with the Audio Volume	549
Using the Graphic Fade Method	549
Using Fade In and Fade Out	553
Inverting the Audio Data	554
Muting the Audio Data	556
Smoothing/Enhancing the Audio Data	556
Summary	558

PREMIERE PRO CS

1. Getting Started with Premiere Pro CS5	559
Introducing Non-Linear Editing in Premiere Pro CS5	560
Creating a New Project	560
Creating a Sequence	562
Exploring the User Interface/ Workspace	563
Exploring the Title bar	564
Exploring the Menu bar	564
Exploring the Tools Panel	564
Exploring the Project Panel	565
Exploring the Resource Central Panel	565
Exploring the Source Monitor Panel	566
Exploring the Effect Controls Panel	566
Exploring the Audio Mixer Panel	566
Exploring the Program Monitor Panel	566
Exploring the Media Browser Panel	566
Exploring the Info Panel	567
Exploring the Effects Panel	567
Exploring the History Panel	567
Exploring the Timeline Panel	568
Exploring the Audio Master Meters	568

Customizing the User Interface/Workspace	568	Adding the Strokes Effect	627
Selecting Project Settings	571	Adding the Shadows Effect	630
Specifying Project Settings	571	Exploring the Opacity Effect	632
Specifying Sequence Settings	571	Using the Blend mode	635
Specifying Preferences	572	Working with the Four Point Garbage Matte Effect	638
Importing Video/ Audio clips/Images into a Project	573	Summary	642
Using Imported Objects	574	4. Finalizing and Exporting the Project	643
Saving the Project	575	Understanding Rendering and Previewing	644
Summary	576	Defining Work Area for Rendering	645
2. Working with Videos and Audios	577	Deleting Rendered Files	647
Using the Timeline Panel	578	Exploring Export Options	648
Moving the Current-Time Indicator	579	Using the Export Settings Dialog Box	649
Moving Current-Time Indicator using the Time Code	579	Exploring Formats to Export	649
Snapping the Current-Time Indicator to the Clip Edge	580	Exploring Export Options	652
Editing Clips using the Timeline Panel	581	Exploring the Project Manager	653
Trimming a Clip	581	Exporting Sequence, Nested Sequences, and Still Images	654
Splitting Clips Using the Razor Tool	582	Exporting Sequence	654
Using the Ripple Delete Tool	584	Exporting Nested Sequences	655
Exploring Video Effects	584	Exporting Still Images	658
Adding Keyframe Effects	585	Exporting Video for Web and Mobile Devices	660
Adding Transition on a Clip	586	Summary	662
Setting the Parameters using the Effect Controls panel	589		
Understanding Effects and Transitions	590	AFTER EFFECT CS5	
Adding Transition on a Clip	591	1. Getting Started with After Effects CS5	663
Adjusting Color in a Video	594	Exploring the New and Improved Features	664
Using the Change to Color Effect	594	Understanding System Requirements	665
Using the Color Balance (RGB) Effect	597	Understanding Motion Graphics	666
Using the Tint Effect	600	Digital Video	666
Adjusting Audio Volume using the Timeline panel	601	Resolution and Transparency	666
Adjusting Audio Volume using the Effects Control panel	603	Exploring the After Effects CS5 Interface	667
Exploring Audio Mixer	603	The Tools Panel	667
Summary	604	The Project Panel	668
3. Working with Titles and Compositing Techniques	605	The Composition Panel	669
Working with Different Types of Titles	606	The Timeline Panel	669
Creating a Still Title	606	Overviewing Projects, Compositions, and Layers	669
Creating a Roll Title	611	Working with Projects	670
Creating a Crawl Title	614	Creating a New Project	670
Using the Path Type Tool	618	Importing Media Files	671
Drawing Shapes in Titles	622	Importing Image Sequences	673
Adding Text Effects	625	Working with Compositions	674
Adding the Sheen Effect	625	Creating a New Composition	675
		Importing Photoshop/Illustrator Files as Compositions	677
		Working with Layers	679

Adding a Composition or Footage into the Timeline Panel	680	3. Compositing and Exporting in After Effects CS5	737
Creating New Layers	681	Working with Masks	738
Exploring Layer Switches	683	Creating a Mask with the Shape Tools	739
Showing or Hiding a Layer	685	Creating a Mask using Pen Tool	741
Working with Layer Properties	686	Editing a Mask	742
Setting a Layer Property	686	Animating a Mask	746
Applying Blending Modes	688	Working with Track Mattes	748
Applying Layer Styles	689	Creating a Chroma Key	750
Previewing Media Files	691	Creating a Garbage Matte	751
Trimming a Video Clip	693	Creating a Chroma Key	752
Saving a Project and Quitting After Effects	695	Using Color Correction	754
Summary	696	Working with Effects and Presets	756
2. Drawing, Painting, and Animating in After Effects CS5	697	Applying Effects	757
Working with Shape Tools	698	Animating Effects	758
Drawing a Parametric Shape	699	Applying an Animation Preset	761
Exploring Shape Tool Options	701	Rendering a Composition	763
Creating a Shape using Pen Tool	703	Exporting a Project File	765
Editing a Shape	704	Exporting a Composition for Web	768
Working with Path Operations	705	Summary	772
Using the Repeater Path Operation	706	About the CD	773
Using the Zig Zag Path Operation	708		
Working with Paint Tools	709		
Creating Brush Strokes Using Brush Tool	710		
Using Eraser Tool	712		
Using Clone Stamp Tool	713		
Working with Animations	714		
Adding a Keyframe	714		
Editing a Keyframe Value	715		
Animating Layer Transformation	716		
Working with Motion Path	718		
Working with a Null Object	720		
Working with Text	722		
Creating Text using Type Tools	723		
Formatting the Text	724		
Creating Text on Path	726		
Animating Text	728		
Animating Text using a Text Animation Preset	729		
Creating Custom Text Animation	731		
Summary	736
