<b>Introduction .....</b>	<b>vii</b>
<b>Chapter 1: Introduction to Linux .....</b>	<b>1</b>
1.1 Understanding UNIX .....	2
1.2 Exploring Linux .....	2
1.3 Exploring GNU.....	2
1.4 Exploring Linux Distribution .....	3
1.5 Understanding Duties of the Linux System Administrator.....	4
Installing and Configuring servers .....	4
Installing and Configuring Application Software.....	5
Creating and Maintaining User Accounts.....	5
Backing Up and Restoring Files.....	5
Monitoring and Tuning Performance .....	6
Configuring a Secure System.....	6
Using Tools to Monitor Security.....	7
1.6 Booting and Shutting Down.....	7
Boot Loaders.....	7
Bootstrapping .....	9
Init Process .....	10
RC Scripts .....	11
Enabling and Disabling Services .....	12
1.7 Understanding the File System Structure .....	12
Working with Linux-Supported File Systems .....	14
Memory and Virtual File Systems .....	16
Linux Disk Management.....	17
Summary.....	21
Exercise .....	21
<b>Chapter 2: System and Network Configurations in Linux.....</b>	<b>23</b>
2.1 System Configuration Files.....	23
System wide Shell Configuration Scripts.....	24
System Environmental Settings .....	26
Network Configuration Files.....	29
Managing the init Scripts.....	33
2.2 TCP/IP Networking .....	35
Understanding Network Classes .....	36
Setting Up a Network Interface Card (NIC) .....	37
Understanding Subnetting .....	39
Working with Gateways and Routers .....	44

---

	Configuring Dynamic Host Configuration Protocol .....	45
	Configuring the Network Using the Network Configuration Tool .....	46
	Editing your Network Configuration .....	51
2.3	The Network File System .....	54
	Versions of NFS .....	54
	NFS Advantages and Disadvantages .....	55
	Planning an NFS Installation .....	55
	Configuring an NFS Server .....	56
	Configuring an NFS Client .....	60
	Using Automount Services .....	61
	Examining NFS Security .....	62
	Summary .....	63
	Exercise .....	63
<b>Chapter 3: Introduction to Microsoft Networks and Network Services .....</b>		<b>65</b>
3.1	Connecting to Microsoft Networks .....	65
	Installing and Configuring Samba Server .....	65
	Creating Samba Users .....	68
	Connecting Windows PC to the Samba Server .....	68
3.2	Additional Network Services .....	69
	Configuring a Timeserver .....	69
	Providing a Caching Proxy Server .....	74
	Optimizing Network Services .....	78
3.3	Internet Services .....	80
	Secure Services .....	80
	Less Secure Services .....	82
	Linux Machine as a Server .....	82
	Configuring the xinetd server .....	82
	Comparing xinetd and Standalone .....	83
	Configuring Linux Firewall Packages .....	85
	Summary .....	85
	Exercise .....	85
<b>Chapter 4: Domain Name System and Mail Services .....</b>		<b>87</b>
4.1	Understanding Domain Name System (DNS) .....	87
	Understanding Types of Domain Servers .....	89
	Examining Server Configuration Files .....	90
	Configuring a Caching DNS Server .....	95
	Configuring a Secondary Master DNS Server .....	96
	Configuring a Primary Master Server .....	97
	Checking Configuration .....	97
4.2	Configuring Mail Services .....	98
	Tracing the Email Delivery Process .....	98

---

Introducing SMTP.....	99
Configuring Sendmail.....	100
Using the Postfix Mail Server .....	103
Serving Email with POP3 and IMAP.....	106
Maintaining Email Security.....	106
4.3 Configuring FTP Services .....	107
Introducing and Configuring vsftpd.....	107
Configuring FTP Server .....	109
Using SFTP .....	115
Summary.....	116
Exercise .....	116
<b>Chapter 5: Apache Web Server.....</b>	<b>117</b>
5.1 Introducing Apache Web Server .....	117
Configuring Apache .....	119
Implementing SSL.....	126
Enabling CGI.....	128
Enabling PHP .....	129
Creating a Secure Server with SSL.....	130
5.2 Providing Web Services.....	134
Creating Mailing Lists through Mailman.....	135
Setting Up Web-Based Email .....	137
RSS Feed .....	138
Adding Search Functionality.....	140
Summary.....	142
Exercise .....	142
<b>Chapter 6: Optimizing Internet Service.....</b>	<b>143</b>
6.1 Optimizing Internet Services .....	143
Optimizing LDAP Services .....	143
Optimizing DNS Services.....	144
Optimizing Mail Services.....	146
Optimizing FTP Services.....	147
Optimizing Web Services.....	148
6.2 System Administration .....	148
Updating System .....	149
Upgrading and Customizing Kernel .....	150
Administering Users and Groups.....	151
Summary.....	157
Exercise .....	158

<b>Lab</b> .....	<b>159</b>
LAB-1: Installing Fedora Linux and Configuring Grub Boot Loader .....	159
LAB-2: Installing a Software Application .....	167
LAB-3: Using Shell Scripting .....	170
LAB-4: Setting up a dial-up PPP .....	173
LAB-5: Configuring TCP/IP .....	176
LAB-6: Working with the FTP Server .....	179
LAB-7: Working with the Samba File Server .....	183
LAB-8: Working with the Apache Web Server .....	187
LAB-9: Setting up a NFS File Server .....	192
LAB-10: Assigning a Proxy .....	194
LAB-11: Programming Using C .....	197
LAB-12: Configuring an IP Table Firewall .....	200
LAB-13: Socket Programming .....	212
LAB-14: Setting up a Hardware Device (Printer) .....	216
LAB-15: Working with X-windows .....	219
<b>Index</b> .....	<b>224</b>
