*To the Atlantis Team, who helped me
stay on track with my writing schedule:
Malcolm, Ellen, Michael, Gregory, Randy,
Adam, and Momma, along with Brit Lee.*

*And to Christopher, for helping me
stay on track every day.*

brief contents

- 1 ■ Before you begin 1
- 2 ■ Server assessment and configuration 8
- 3 ■ T-SQL crash course 16
- 4 ■ Managing databases 34
- 5 ■ Backup and recovery 44
- 6 ■ Authentication: who are you? 56
- 7 ■ Authorization: what are you allowed to do? 65
- 8 ■ Accounting: what did you do? 75
- 9 ■ Analyzing indexes 82
- 10 ■ Maintaining indexes 92
- 11 ■ Tuning index designs 101
- 12 ■ Reading query execution plans 110
- 13 ■ Block and deadlock analysis 119
- 14 ■ Automating management with SQL Server Agent 128
- 15 ■ Multiserver management 137
- 16 ■ Windows PowerShell and SQL Server 143
- 17 ■ Using Extended Events 153

- 18 ■ Monitoring and analyzing performance 166
- 19 ■ Options for high availability 178
- 20 ■ Virtualizing SQL Server 189
- 21 ■ Moving, migrating, and upgrading databases 197
- 22 ■ SQL Server performance checklist 205
- 23 ■ Never the end 207

contents

preface xvii
acknowledgments xviii
about this book xix

1 *Before you begin* 1

- 1.1 Is this book for you? 1
- 1.2 How to use this book 2
- 1.3 Setting up your lab environment 3
 - Choosing a SQL Server edition for your lab* 3
 - *Selecting a version of Windows for your lab* 4
 - *My recommendation for your lab environment* 5
 - *A word about SQL Server versions* 5
- 1.4 SQL Server documentation 5
- 1.5 Online resources 6
- 1.6 A word on my recommendations 6
- 1.7 Being immediately effective with SQL Server 7

2 *Server assessment and configuration* 8

- 2.1 Identifying instances and versions 8
- 2.2 Identifying databases 11
- 2.3 Identifying other server objects 13

- 2.4 Inventorying the server configuration 14
- 2.5 Hands-on lab 15

3 *T-SQL crash course* 16

- 3.1 SELECT queries 16
 - A basic SELECT query* 17
 - *Returning specific rows from the table* 19
 - *Delimiting string and date values* 20
 - Sorting results* 20
 - *Finding T-SQL documentation* 21
- 3.2 DELETE, UPDATE, and INSERT queries 23
 - DELETE queries* 23
 - *UPDATE queries* 24
 - INSERT queries* 24
- 3.3 Assessing a database's structure 25
- 3.4 Multitable SELECT queries 31
- 3.5 Hands-on lab 33

4 *Managing databases* 34

- 4.1 Configuring database options 34
- 4.2 Detaching and attaching databases 36
- 4.3 Assessing database storage 38
- 4.4 Identifying potential performance concerns in storage 38
 - Problems with file layout* 38
 - *Problems with file size* 40
 - Filegroups* 41
- 4.5 System databases 41
- 4.6 An overview of storage hardware 42
- 4.7 Hands-on lab 43

5 *Backup and recovery* 44

- 5.1 The transaction log 44
- 5.2 How backups work 47
 - Making a full database backup* 48
 - *Making a differential database backup* 48
 - *Making a transaction log backup* 48
- 5.3 How restoration works 49
 - Preparing for recovery* 50
 - *Starting the recovery* 50
- 5.4 Model backup and recovery scenarios 52
- 5.5 Special procedures for system databases 54

- 5.6 Backup and recovery using T-SQL or PowerShell 54
- 5.7 Hands-on lab 55

6 *Authentication: who are you?* 56

- 6.1 Understanding logins 56
 - Windows Authentication* 57 ▪ *Mixed Mode Authentication* 58
- 6.2 Understanding database users 59
- 6.3 How the real world often does authentication 62
- 6.4 Understanding application roles 63
- 6.5 Hands-on lab 64

7 *Authorization: what are you allowed to do?* 65

- 7.1 Understanding SQL Server permissions 65
 - Securing database objects* 66 ▪ *Revoking permissions* 67
 - Column-level permissions* 68 ▪ *The many sources of permissions* 68
- 7.2 Using server roles 68
- 7.3 Using database roles 69
- 7.4 Schemas and owners 70
 - Owners* 70 ▪ *Schemas* 70
- 7.5 Permission chains 71
- 7.6 How the real world often does authorization 73
- 7.7 Hands-on lab 74

8 *Accounting: what did you do?* 75

- 8.1 Triggers 75
- 8.2 SQL Server Profiler 76
- 8.3 Event logs and C2 auditing 76
- 8.4 SQL Audit 76
 - SQL Audit architecture* 76 ▪ *Creating an audit* 77
 - Using SQL Audit for security auditing* 79
 - Using SQL Audit for troubleshooting* 80
- 8.5 Hands-on lab 81

9 *Analyzing indexes* 82

- 9.1 Index basics 82
- 9.2 Heaps 83

- 9.3 Clustered indexes 84
- 9.4 Nonclustered indexes 86
- 9.5 Index inventory 88
- 9.6 Constraints and indexes 90
- 9.7 More about indexes 90
- 9.8 Hands-on lab 91

10 *Maintaining indexes* 92

- 10.1 Understanding index fragmentation 92
- 10.2 Analyzing index fragmentation 94
- 10.3 Indexes maintenance strategies 95
 - Fill factor* 96 ■ *Databases that aren't yours* 96
- 10.4 Performing the maintenance 97
 - Recreating an index with DROP_EXISTING* 97
 - Rebuilding an index by using ALTER INDEX* 98
 - Rebuild the index online* 98 ■ *Reorganizing an index* 98
- 10.5 Suggestions for index maintenance 99
- 10.6 Hands-on lab 100

11 *Tuning index designs* 101

- 11.1 How indexes can become less useful 101
- 11.2 Using Profiler to capture usage patterns 102
 - Creating a trace template* 102 ■ *Capturing the traffic* 103
- 11.3 Using the Database Engine Tuning Advisor 103
 - Backing up an index* 103 ■ *Running the Advisor* 104
- 11.4 What you can and can't do with indexes on someone else's database 105
- 11.5 Hands-on lab 107
- 11.6 Way above and way beyond 107
 - Index key size* 107 ■ *Index selectivity* 108
 - Compound indexes* 108 ■ *Covering indexes* 109

12 *Reading query execution plans* 110

- 12.1 What's an execution plan? 110
- 12.2 Common plan symbols and what they mean 113
- 12.3 How to read an execution plan 115

- 12.4 What to look for in an execution plan 117
- 12.5 Hands-on lab 118

13 *Block and deadlock analysis* 119

- 13.1 What's locking and blocking? 119
- 13.2 Understanding transactions 120
- 13.3 Types of locks 120
- 13.4 Lock and block analysis 122
- 13.5 Deadlocks 125
- 13.6 Mitigating blocks and deadlocks 126
- 13.7 Hands-on lab 127

14 *Automating management with SQL Server Agent* 128

- 14.1 What is SQL Server Agent? 128
- 14.2 Jobs 129
- 14.3 Operators 130
- 14.4 Alerts 132
- 14.5 Database Mail 132
- 14.6 SQL Server Agent security 134
- 14.7 A quick cheat: Database Maintenance Plans 134
- 14.8 Ideas for using SQL Server Agent 135
- 14.9 Hands-on lab 136

15 *Multiserver management* 137

- 15.1 What is multiserver management? 137
- 15.2 Creating a multiserver management hierarchy 137
- 15.3 Creating and using multiserver management jobs 140
- 15.4 Ideas for multiserver jobs 141
- 15.5 Hands-on lab 142

16 *Windows PowerShell and SQL Server* 143

- 16.1 Windows PowerShell overview 143
- 16.2 SQL Server and PowerShell 145
 - Meet the SQLSERVER provider* 146
 - Doing something useful* 148

- 16.3 SQL Server Agent and PowerShell 149
- 16.4 Hands-on lab 152

17 *Using Extended Events* 153

- 17.1 What are Extended Events? 153
- 17.2 Creating and using a session 154
 - Using the New Session Wizard* 154
 - *Viewing live session data* 157
 - *Working with session logs* 159
- 17.3 Creating a custom session 161
- 17.4 Tips for Extended Events 165
- 17.5 Hands-on lab 165

18 *Monitoring and analyzing performance* 166

- 18.1 Key Performance Monitor counters 166
 - Setting up Performance Monitor* 167
 - *Memory* 169
 - SQLServer:Buffer Manager* 169
 - *SQLServer:Memory Manager* 170
 - *PhysicalDisk* 170
 - Processor(_Total) %* 170
 - *System* 171
 - SQL Server:SQL Statistics* 171
 - *Network interface and network segment* 171
- 18.2 Using Data Collectors and reports 171
 - Setting up the data warehouse* 172
 - *Configuring data collection* 172
 - *Configuring a data collection set* 173
 - Working with data collection reports* 174
- 18.3 Watching for performance trends 175
- 18.4 The big performance killers 175
 - Memory* 175
 - *Disk* 176
 - *Processor* 176
- 18.5 Hands-on lab 177

19 *Options for high availability* 178

- 19.1 What is high availability? 178
- 19.2 Log shipping 179
- 19.3 Database mirroring 179
 - Mirroring modes* 180
 - *Mirroring failover* 181
 - Connecting clients to a mirror set* 181
- 19.4 AlwaysOn Clustering 182
 - Cluster architecture* 182
 - *Data file redundancy in clusters* 183
 - Cluster failover scenario* 184
 - *Clustering pros and cons* 184

- 19.5 AlwaysOn Availability Groups 184
 - Availability group replication* 186
 - *Availability group failover* 186
 - *Availability group bonuses* 186
- 19.6 HA beyond SQL 187
- 19.7 HA comparison 187

20 *Virtualizing SQL Server* 189

- 20.1 Why virtualize? 189
- 20.2 Understanding virtual and physical hardware 191
- 20.3 CPU and memory in a virtual environment 192
 - Sizing CPUs* 192
 - *Sizing memory* 192
- 20.4 Disk I/O in a virtual environment 193
- 20.5 Tricks with performance monitoring in a virtual environment 195
- 20.6 Hands-on lab 196

21 *Moving, migrating, and upgrading databases* 197

- 21.1 Refresh: detaching and attaching databases 197
- 21.2 The Copy Database Wizard 200
- 21.3 Overview: SQL Server Integration Services 200
- 21.4 Database upgrades 201
- 21.5 Compatibility levels 202
- 21.6 Hands-on lab 204

22 *SQL Server performance checklist* 205

23 *Never the end* 207

- appendix Installing SQL Server* 209
- index* 225
