Introduction .....	xi
<b>Chapter 1: Introduction to Databases .....</b>	<b>1</b>
1.1 Database Concepts .....	1
Data versus Information.....	2
Record .....	3
File System.....	3
Limitations of File-Based System .....	4
Evolution of Database .....	5
Defining a Database .....	7
Entities and Relationships.....	7
1.2 Database Models and Types.....	8
Object-Based Model.....	9
Record-Based Logical Model.....	13
1.3 Concept of Normalization.....	16
Objectives of Functional Dependency and Normalization .....	16
Designing a Database Schema .....	17
Functional Dependencies .....	19
Normal Forms.....	20
1.4 Introduction to SQL Using MySQL .....	28
Defining SQL.....	29
Data Definition Language .....	30
Data Manipulation Language .....	36
The HAVING Clause.....	64
Data Control Language.....	88
Working with Views.....	91
Summary .....	94
Exercise.....	94
Multiple Choice Questions .....	94
Subjective Type Questions.....	96

<b>Chapter 2: Advanced Database Techniques</b> .....	<b>97</b>
2.1 Structured versus Unstructured Data.....	97
2.2 NoSQL Database Concepts.....	98
2.3 Types of NoSQL Databases.....	99
2.4 NoSQL Data Modeling.....	99
2.5 Benefits of NoSQL.....	101
2.6 Comparative Study of SQL and NoSQL Database Systems.....	103
2.7 NoSQL Using MongoDB.....	104
Introduction to MongoDB Shell.....	104
Running the MongoDB Shell.....	105
MongoDB Client.....	106
Basic Operations with the MongoDB Shell.....	106
Data Types.....	109
Basic Data Types.....	109
Dates.....	111
Arrays.....	112
Embedded Documents.....	112
_id and ObjectIds.....	113
2.8 Querying.....	114
Introduction to the find() Function.....	114
Specifying which Keys to Return.....	115
Query Criteria.....	116
OR Queries.....	117
Type-Specific Querying.....	118
2.9 Index Introduction.....	120
Types of Indexes in MongoDB.....	122
Indexing Properties.....	125
2.10 Aggregation Introduction.....	125
Aggregation Pipeline.....	125
Aggregation Using MapReduce.....	126
Single-Purpose Aggregation.....	127

---

Summary .....	128
Exercise .....	128
Multiple Choice Questions .....	128
Subjective Type Questions .....	130
<b>Chapter 3: Database Transactions .....</b>	<b>131</b>
3.1 Transaction Management in Database Systems .....	132
Atomicity and Durability of Transactions .....	135
Isolation of Transactions .....	137
Transaction Isolation and Atomicity .....	140
3.2 Concurrency Control in Database Systems .....	142
Lock-Based Concurrency Control Protocols .....	142
Snapshot Isolation .....	147
3.3 System Performance Tuning and Query Optimization in SQL Databases .....	149
Tuning SQL Database System Performance .....	149
Optimizing SQL Database System Queries .....	156
3.4 System Performance Tuning and Query Optimization in NoSQL Databases ...	161
Summary .....	162
Exercise .....	162
Multiple Choice Questions .....	162
Subjective Type Questions .....	164
<b>Chapter 4: Database Architecture .....</b>	<b>165</b>
4.1 Introduction to Client-Server Database Model .....	166
Two-Tier Client-Server Model .....	166
Three-Tier Client-Server Model .....	167
4.2 Introduction to Parallel Databases .....	169
Parallel Database System Architecture .....	170
Types of Parallelism .....	173
Parallel Database Implementation .....	173
4.3 Introduction to Distributed Databases .....	174
Benefits of Distributed Database Systems .....	175

	Issues with Distributed Database Systems .....	178
4.4	Database Connectivity and Web Technologies .....	179
	Two-Tier Architecture for Web Connectivity .....	180
	Three-Tier Architecture for Web Connectivity .....	180
4.5	Database Administration and Management.....	181
	Need for Database Administration and Management.....	181
	Database Technology .....	181
	Database Administration and Management Activities.....	182
4.6	Connectivity Using MongoDB and Cassandra .....	183
	Connectivity Using MongoDB .....	183
	Connectivity Using Cassandra .....	184
	Summary .....	184
	Exercise .....	185
	Multiple Choice Questions .....	185
	Subjective Type Questions .....	186
<b>Chapter 5: Big Data Management and Programming .....</b>		<b>187</b>
5.1	XML .....	188
	XML Introduction.....	188
	XML Entity References.....	193
	Namespaces .....	193
	XML DTDs.....	196
	Domain-Specific DTDs .....	200
	Querying XML Data.....	201
5.2	JSON .....	210
	Data Types .....	210
	Object Literals .....	211
	Array Literals.....	212
	JSON Parser .....	213
	JSON Syntax .....	213
5.3	Big Data.....	218
5.4	Introduction to Hadoop .....	219

---

Building Blocks of Hadoop .....	220
Components of Hadoop.....	221
5.5 HBase.....	222
5.6 HIVE.....	223
5.7 Solid-State Drive.....	223
5.8 Cloudera .....	224
5.9 Oracle Cloud.....	225
5.10 Oracle Berkley Database (Oracle BDB).....	226
5.11 MongoDB.....	227
5.12 Introduction to R Programming .....	229
Summary .....	229
Exercise.....	230
Multiple Choice Questions .....	230
Subjective Type Questions.....	231
<b>Chapter 6: Advances in Databases Data .....</b>	<b>233</b>
6.1 Introduction to Data Warehouse .....	234
Characteristics of Data Warehousing.....	234
Functionality of Data Warehousing .....	235
Architecture of Data Warehousing .....	235
Types of Data Warehouse Architecture .....	236
Data Marts .....	237
Data Warehousing Life Cycle.....	238
Data Modeling (Multidimensional Database) for DataWarehousing.....	239
Building of Data Warehouse .....	241
Data Warehouse Development.....	241
OLAP versus OLTP [Data Warehouses versus Operational Databases] .....	244
6.2 Introduction to Data Mining Techniques.....	245
Data Mining Technology and Its Relation to DataWarehousing.....	245
Association Rules.....	246
Classification and Clustering.....	247
Addressing Data Mining Problems and TheirApplications.....	249

	Applications of Data Mining.....	251
	Commercial Tools Used for Data Mining.....	252
6.3	Introduction to Business Intelligence.....	253
	Features of BI.....	254
	BI Component Framework.....	256
	Types of Machine Learning.....	261
	Approaches for Machine Learning.....	262
	Summary .....	262
	Exercise.....	263
	Multiple Choice Questions .....	263
	Subjective Type Questions.....	264
	<b>Index .....</b>	<b>265</b>
