

Table of Contents

Introduction.....	xi
Chapter 1: Introduction to OS.....	1
1.1 History of OS	2
1.2 Generations of OS.....	3
1.2.1 First Generation: An OS without a User.....	3
1.2.2 Second Generation: Single-User Single Tasking.....	4
1.2.3 Third Generation: Single-User Multitasking.....	5
1.2.4 Fourth Generation: Multiuser Multitasking.....	6
1.3 Introduction to Computers and Operating System.....	7
1.4 Different Views of OS.....	8
1.5 Objectives of OS.....	9
1.6 System Call.....	11
1.6.1 OS Commands.....	11
1.7 Basic Concepts Related to an OS.....	11
1.7.1 Processors.....	12
1.7.2 Memory.....	12
1.7.3 Disks.....	13
1.7.4 Tapes.....	13
1.7.5 I/O Devices.....	14
1.7.6 Buses.....	14
1.8 Services Offered by an OS (Functions of an OS).....	14
1.8.1 Processor Management.....	14
1.8.2 Job Scheduling.....	15
1.8.3 Memory Management.....	15
1.8.4 Virtual Storage.....	15
1.8.5 Device Management.....	16
1.8.6 Information Management.....	16
1.8.7 Security.....	17
1.8.8 Command Interpretation.....	17
1.9 Evolution of OS.....	17
1.10 Types of OS.....	18
1.10.1 Single-Program OS.....	19
1.10.2 Concurrent OS.....	20
1.10.3 Multiprogramming OS.....	20
1.10.4 Multitasking OS.....	20
1.10.5 Multiprocessing OS.....	20

1.10.6	Time-Sharing or Multi-User OS	21
1.10.7	Real-Time OS.....	21
1.10.8	Virtual-Storage OS.....	21
1.10.9	Network OS	21
1.10.10	Distributed OS	22
1.11	Concept of VM.....	22
1.11.1	Creating a Virtual Machine	28
1.11.2	Accessing a Virtual Machine.....	32
1.12	OS Structure.....	37
1.12.1	Monolithic Kernel Structure.....	37
1.12.2	Layered-Kernel Structure.....	38
1.12.3	Micro-Kernel Structure.....	39
	Summary.....	41
	Key Terms.....	41
	Review Exercise	41
	True or False	41
	Multiple Choice Questions.....	42
	Short Descriptive Questions.....	44
Chapter 2: Process Management		49
2.1	Process.....	50
2.1.1	Process vs. Programs.....	51
2.1.2	Process Management	52
2.1.3	Process Management Model.....	52
2.1.4	Process Creation and Termination.....	54
2.1.5	Process Relationship.....	55
2.1.6	Process States.....	55
2.1.7	Process Control Block	57
2.1.8	Context Switching.....	59
2.2	Threads.....	60
2.2.1	Threads vs. Processes.....	61
2.2.2	Types of Threads	62
2.2.3	Multithreading.....	63
2.2.4	Multithreading Models	63
2.2.5	Thread Libraries.....	65
2.2.6	Design Issues in Threads.....	66
2.2.7	Other Threading Issues	69
2.3	Process Scheduling	72
2.3.1	Scheduling Queues.....	73
2.3.2	Schedulers.....	74

2.4	Scheduling Algorithms	76
2.4.1	Scheduling Criteria	76
2.4.2	Types of Scheduling Algorithms.....	76
	Summary.....	82
	Key Terms.....	82
	Review Exercise	83
	True or False	83
	Multiple Choice Questions.....	83
	Short Descriptive Questions.....	85
Chapter 3: Interprocess Communication		91
3.1	Race Conditions.....	92
3.2	Critical Section	93
3.3	Mutual Exclusion	95
3.3.1	Disabling Interrupts.....	96
3.3.2	Lock Variables	96
3.3.3	Hardware Solution.....	97
3.3.4	Strict Alternation	98
3.3.5	Peterson's Solution.....	98
3.4	The Bounded Buffer Producer Consumer Problem.....	100
3.5	Semaphores	101
3.5.1	Solving the Producer-Consumer Problem Using Semaphores.....	102
3.6	Event Counters.....	104
3.7	Monitors.....	105
3.8	Message Passing.....	108
3.8.1	Blocking vs. Non-Blocking Primitives.....	109
3.8.2	Reliable vs. Unreliable Primitives.....	109
3.8.3	Direct vs. Indirect Communication	109
3.9	Classical IPC Problems	110
3.9.1	Dining Philosopher Problem	111
3.9.2	Reader's and Writer Problem	113
	Summary.....	115
	Key Terms.....	116
	Review Exercise	116
	True or False	116
	Multiple Choice Questions.....	117
	Short Descriptive Questions.....	118
Chapter 4: Deadlock.....		123
4.1	Deadlock Problem.....	123
4.1.1	A Deadlock in Traffic System.....	124

4.1.2	Execution Sequence for a Process/System Model.....	124
4.1.3	A Simple Resource Deadlock.....	125
4.1.4	River Crossing Problem.....	126
4.1.5	Resource Concepts.....	127
4.1.6	Necessary Conditions for Deadlock to Occur.....	128
4.1.7	Deadlock Characterization in a Process.....	128
4.1.8	Communication Deadlocks.....	129
4.2	Resource Allocation Graphs.....	130
4.3	Deadlock Handling.....	132
4.3.1	Deadlock Prevention.....	132
4.3.2	Deadlock Avoidance.....	134
4.3.3	Banker's Algorithm for Single & Multiple Resources.....	136
4.4	Deadlock Detection and Recovery.....	141
4.4.1	Resource Allocation Graph Reduction.....	141
4.4.2	Recovery from Deadlock.....	143
4.5	Ostrich Algorithm.....	144
4.6	Two Phase Locking.....	144
	Summary.....	145
	Key Terms.....	145
	Review Exercise.....	146
	True or False.....	146
	Multiple Choice Questions.....	146
	Short Descriptive Questions.....	148
Chapter 5: Memory Management		153
5.1	Storage Organization.....	154
5.2	Logical and Physical Address Map.....	157
5.2.1	Memory Allocation Model.....	159
5.2.2	Memory Allocation Preliminaries.....	162
5.2.3	Contiguous Memory Allocation.....	164
5.3	Swapping.....	165
5.4	Partitioning of Memory.....	166
5.4.1	Fixed Partition Multiprogramming.....	166
5.4.2	Variable Partition Multiprogramming.....	170
5.4.3	Internal and External Fragmentation.....	171
5.5	Compaction.....	173
5.6	Overlay Structured Programs.....	177
5.7	Free Memory Management.....	178
5.8	Paging Principle.....	184
5.8.1	Page Allocation.....	185

5.8.2	Hardware Support for Paging.....	186
5.8.3	Protection and Sharing of Memory.....	187
5.8.4	Advantages and Disadvantages of Paging.....	188
5.8.5	Inverted Page Table	188
5.8.6	Translation Look aside Buffer Mechanism.....	189
5.8.7	Multi-Level Page Table.....	189
5.9	Segmentation.....	190
5.9.1	Address Translation in Segmentation System	190
5.9.2	Sharing in a Segmentation System.....	191
5.10	Virtual Memory.....	191
5.10.1	Demand Paging.....	193
5.10.2	Hardware and Control Structures	193
5.10.3	Locality of Reference and Working Set	194
5.10.4	Page Fault and Dirty Bit.....	195
5.11	Page Replacement Policies.....	196
	Summary.....	204
	Key Terms.....	205
	Review Exercise	205
	True or False	205
	Multiple Choice Questions.....	206
	Short Descriptive Questions	208
Chapter 6: Input/Output Management.....		213
6.1	Principles of Input/Output Hardware.....	214
6.1.1	I/O Devices.....	215
6.1.2	Device Controllers.....	216
6.1.3	Memory-Mapped I/O	217
6.1.4	Direct Memory Access.....	218
6.2	Principles of I/O Software	220
6.2.1	Goals of I/O Software	220
6.2.2	Interrupt Handler	222
6.2.3	Device Driver.....	222
6.2.4	Device Independent I/O Software.....	225
6.2.5	Summary of I/O Software.....	226
6.3	Secondary Storage Structure.....	227
6.3.1	Disk Structure.....	227
6.3.2	Disk Hardware.....	228
6.3.3	RAID.....	230
6.3.3	Disk Formatting.....	241
6.3.4	Disks Arm Scheduling Algorithm	242

Summary.....	249
Key Terms.....	250
Review Exercise.....	250
True or False.....	250
Multiple Choice Questions.....	251
Short Descriptive Questions.....	252
Chapter 7: File Management.....	257
7.1 Concept of Files.....	258
7.1.1 File Attributes.....	259
7.1.2 File Operations.....	260
7.1.3 File Types.....	261
7.1.4 File Structure.....	262
7.1.5 File Access Methods.....	263
7.2 Directories.....	264
7.2.1 Directory Structure.....	265
7.3 File Sharing.....	269
7.4 File Protection.....	270
7.5 File System Implementation.....	271
7.6 Directory Implementation.....	273
7.6.1 Linear List.....	273
7.6.2 Hash Table.....	273
7.7 File Allocation Methods.....	274
7.7.1 Contiguous Allocation.....	274
7.7.2 Linked Allocation.....	276
7.7.3 Indexed Allocation.....	278
7.8 Free Space Management Techniques.....	280
7.8.1 Bit Map.....	280
7.8.2 Linked List.....	281
7.9 File System Performance.....	282
7.10 File System Recovery.....	283
7.10.1 Backup and Restore.....	283
7.10.2 Log-Structured File System.....	283
Summary.....	284
Key Terms.....	284
Review Exercise.....	285
True or False.....	285
Multiple Choice Questions.....	285
Short Descriptive Questions.....	287

Chapter 8: Security and Protection.....	297
8.1 OS Security Environment	298
8.1.1 Goals of OS Security.....	298
8.1.2 Components of OS Security Environment.....	300
8.1.3 OS Security Environment Considerations	303
8.2 OS Security Design Principles.....	304
8.2.1 Security Attack.....	304
8.2.2 Virus.....	306
8.2.3 Worms.....	309
8.2.4 Trojan Horse.....	310
8.3 User Authentication.....	311
8.3.1 Capability Lists.....	311
8.3.2 Considerations for User Authentication	312
8.3.3 Passwords.....	313
8.3.4 Challenge-Response System.....	316
8.4 Biometrics.....	317
8.4.1 Voice Identification	318
8.4.2 Signature Dynamics.....	319
8.4.3 Fingerprints.....	319
8.4.4 Hand Geometry.....	319
8.4.5 Retinal Scans.....	319
8.4.6 Facial Recognition.....	320
8.4.7 Typing and Mouse Characteristics.....	320
8.4.8 Mutual Authentication	320
8.5 Protection Mechanisms.....	320
8.5.1 Principles	321
8.5.2 Physical Protection	321
8.6 Mechanisms for Domain Protection.....	324
8.6.1 Access Lists for Objects	325
8.6.2 Capability Lists.....	325
8.6.3 Lock-Key Mechanism.....	326
8.6.4 Encryption.....	326
8.6.5 Auditing and Intrusion Detection	328
Summary.....	329
Key Terms.....	329
Review Exercise	330
True or False	330
Multiple Choice Questions.....	330
Short Descriptive Questions.....	332

Chapter 9: Unix/Linux Operating System	337
9.1 Linux.....	338
9.1.1 Exploring Linux Distributions.....	339
9.1.2 Exploring Fedora Linux.....	340
9.1.3 Deploying Fedora Linux.....	341
9.1.4 Using the GRUB and LILO Boot Loaders	356
9.1.5 Introducing the Fedora Desktop.....	357
9.2 Kernel and its Function.....	358
9.2.1 Exploring the Functions of the Linux Kernel.....	358
9.2.2 Describing the Architecture of the Linux Kernel.....	359
9.2.3 Describing the Kernel Data Structure	361
9.2.4 Introducing Kernel Modules.....	362
9.3 System Calls	363
9.4 Elementary Shell Programming	364
9.4.1 Describing the Types of Shells in Linux	365
9.4.2 Using Shells in Linux.....	366
9.4.3 Locating Commands.....	367
9.4.4 Re-Running Commands.....	367
9.4.5 Connecting and Expanding Commands	368
9.4.6 Exploring Shell Syntax	369
9.5 Linux Files and Directory Structure	373
9.5.1 Working with Directories in Linux.....	375
9.6 System Administration.....	378
9.6.1 Ensuring System Security.....	379
9.6.2 Monitoring Log files.....	381
9.6.3 Exploring Security-Enhanced Linux (SELinux).....	381
9.7 Case Study.....	381
9.7.1 Linux	381
9.7.2 Windows OS	395
Summary.....	413
Key Terms	413
Review Exercise.....	414
True or False.....	414
Multiple Choice Questions.....	414
Short Descriptive Questions	416
Practicals.....	421
Index.....	435
