

Table of Contents

Introduction.....	xiii
Chapter 1: Introduction to Computer Networks and Internet	1
1.1 Computer Networks	1
1.1.1 Advantages of Computer Networks	2
1.1.2 Disadvantages of Computer Networks.....	4
1.1.3 Uses of Computer Networks.....	5
1.1.4 Types of Computer Network	6
1.2 Internet.....	10
1.2.1 Internet Architecture Board	11
1.2.2 Internet Engineering Task Force.....	12
1.2.3 Internet Research Task Force.....	12
1.3 Network Edge.....	13
1.3.1 Peer-to-Peer Network	13
1.3.2 Client-Server Network	14
1.3.3 Connection-Oriented Service	16
1.3.4 Connectionless Service	17
1.4 Network Core	17
1.4.1 Circuit-Switched Network.....	19
1.4.2 Packet-Switched Networks.....	21
1.4.3 Message-Switched Network	29
1.5 Access Networks	30
1.5.1 Residential Access Network	30
1.5.2 Institutional Access Network	33

1.5.3	Mobile Access Network.....	35
1.6	Transmission Media	36
1.6.1	Guided Media	36
1.6.2	Unguided Media	48
1.6.3	Common Cable Properties.....	55
1.7	Delay, Loss, and Throughput in a Packet-Switched Network.....	57
1.7.1	Delay in Packet-Switched Network.....	57
1.7.2	Packet Loss.....	59
1.7.3	Throughput.....	59
1.8	Protocol Layers and Their Service Models.....	59
1.8.1	The OSI Reference Model.....	60
1.8.2	The TCP/IP Model.....	67
1.8.3	Comparison between OSI and TCP/IP Reference Models.....	72
1.9	History of Computer Network	72
	Summary.....	85
	Key Terms	85
	Review Exercise	87
	True or False.....	87
	Multiple Choice Questions.....	88
	Short Answer Questions.....	90
Chapter 2: The Application Layer		97
2.1	Principles of Computer Applications.....	98
2.2	Understanding the Concept of the World Wide Web	99
2.2.1	A Brief review about the History of World Wide Web	99
2.2.2	Exploring the Architectural Overview of WWW.....	100

2.2.3	Exploring the Hyper Text Transfer Protocol Used in WWW.....	109
2.3	Understanding the Electronic Mail.....	119
2.3.1	Functions of E-Mail	121
2.3.2	Understanding the Architecture and Services of Electronic Mail..	124
2.3.3	Exploring the User Agents of the Electronic Mail.....	125
2.3.3	Exploring the Message Formats of Electronic Mail.....	127
2.3.4	Understanding the Message Transfer in Electronic Mail.....	131
2.3.5	Learning about the Final Delivery of the Electronic Mail	136
2.4	Understanding the Domain Name System	138
2.4.1	Exploring the DNS Name Space.....	138
2.4.2	Exploring the Domain Name Resolution.....	140
2.4.3	Exploring the Domain Resource Records.....	141
2.4.4	Exploring the Name Servers.....	143
2.5	Exploring Socket Programming.....	143
2.5.1	Understanding Client and Server Communication	144
2.5.2	Learning about Identification of Hosts and Service Ports.....	146
2.5.3	Learning about Sockets and Socket- Based Communication.....	147
2.5.4	Implementing TCP/IP Socket Programming in Java.....	148
	Summary.....	154
	Key Terms	155
	Review Exercise	157
	True or False.....	157
	Multiple Choice Questions.....	158
	Short Answer Questions.....	159

Chapter 3: The Transport Layer	163
3.1 Transport Service and Services Provided to the Upper Layers	164
3.2 Transport Service Primitives.....	165
3.3 Elements of Transport Protocols	167
3.3.1 Addressing	168
3.3.2 Connection Establishment.....	168
3.3.3 Connection Termination.....	171
3.3.4 Flow Control.....	176
3.3.5 Multiplexing and Demultiplexing.....	178
3.3.6 Crash Recovery	180
3.4 Exploring the User Datagram Protocol	182
3.4.1 Exploring Error Control in UDP.....	185
3.5 Principle of Reliable Data Transfer.....	190
3.5.1 Reliable Data Transfer Protocol	191
3.6 Transmission Control Protocol.....	199
3.6.1 Understanding the Features of TCP.....	203
3.6.2 Using Segments, Streams, and Sequence Numbers in Transfer of Segments.....	204
3.6.3 Understanding Variable Window Size, Flow Control, and Out of Sequence Urgent Data	205
3.6.4 Understanding MSS and Optimum Size of Segment.....	207
3.6.5 Computing Checksum Field of a Segment.....	207
3.6.6 Understanding about Acknowledgment of Segments.....	208
3.6.7 Understanding Timeout and Retransmission of Segments.....	209
3.7 Understanding the TCP Connection	211
3.7.1 Establishing a TCP Connection.....	211

3.7.2	Terminating a TCP Connection.....	213
3.7.3	Resetting a TCP Connection	215
3.8	Difference between TCP and UDP Protocols.....	215
3.9	Congestion Control.....	216
3.9.1	Categories of Congestion Control	217
3.9.2	Congestion Control in TCP.....	220
	Summary.....	224
	Key Term.....	224
	Review Questions.....	225
	Multiple Choice Questions.....	224
	True and False.....	226
	Short Answer Questions.....	227
Chapter 4: The Network Layer.....		231
4.1	Network Layer Design Issues.....	231
4.1.1	Services Provided to the Transport Layer.....	232
4.1.2	Network Design.....	232
4.2	Virtual Circuit Network	234
4.3	Datagram Network	239
4.4	Comparison of Virtual Circuit Networks and Datagram Networks	240
4.5	Exploring Routers	241
4.5.1	Input Ports	243
4.5.2	Switching Fabric	244
4.5.3	Output Ports.....	246
4.5.4	Routing Processor.....	246

4.6	Routing Algorithms.....	246
4.6.1	The Optimality Principle	247
4.6.2	Distance Vector Routing.....	247
4.6.3	Link State Routing	252
4.6.4	Hierarchical Routing.....	260
4.6.5	Broadcast Routing	263
4.6.6	Multicast Routing.....	267
4.6.7	Mobile Routing.....	268
4.7	Difference between Distance Vector Routing and Link State Routing.....	270
4.8	Congestion Control Algorithm	271
4.8.1	Leaky Bucket	272
4.8.2	Token Bucket.....	273
4.8.3	Congestion Control in Virtual Circuit Network.....	274
4.8.4	Congestion Control in Datagram Subnets.....	275
4.8.5	Load Shedding.....	278
4.8.6	Random Early Detection	279
4.8.7	Jitter Control	280
4.9	Internet Protocol (IP)	281
4.9.1	IP Addressing	282
4.9.2	IP Version 4 Protocol	282
4.9.3	IP Version 6.....	311
4.10	Comparison between IPv4 and IPv6	322
4.11	Internet Control Protocols	322
4.11.1	ICMP	323
4.11.2	ARP.....	326

4.11.3	Reverse Address Resolution Protocol (RARP).....	331
4.11.4	DHCP.....	333
	Summary.....	338
	Key Terms.....	338
	Review Exercise.....	340
	True or False.....	340
	Multiple Choice Questions.....	341
	Short Answer Questions.....	343
Chapter 5: The Link Layer and Local Area Networks.....		347
5.1	Data Link Layer Functions.....	348
5.1.1	Framing.....	349
5.1.2	Error Control.....	350
5.1.3	Flow Control.....	353
5.1.4	Medium Access Control.....	353
5.2	Defining Error Detection and Correction.....	354
5.2.1	Need for Error Detection and Correction.....	355
5.2.2	Types of Error.....	356
5.2.3	Error-Detecting Codes.....	358
5.2.4	Error-Correcting Codes.....	363
5.3	Multiple Access Protocols.....	368
5.3.1	ALOHA.....	368
5.3.2	CSMA.....	373
5.3.3	Collision Free Protocols.....	377

5.3.4	Limited Contention Protocols	380
5.3.5	Wavelength Division Multiple Access Protocols (WDMA Protocols).....	382
5.3.6	Wireless LAN Protocols	383
5.4	LAN Addressing	385
5.5	Wired LAN: Ethernet.....	386
5.5.1	Traditional Ethernet.....	387
5.5.2	Switched Ethernet.....	387
5.5.3	Fast Ethernet	388
5.5.4	Gigabit Ethernet.....	389
5.6	Connecting LANs.....	389
5.6.1	Repeaters.....	390
5.6.2	Hub	390
5.6.3	Bridges.....	391
5.6.4	Switches.....	394
5.6.5	Gateways	395
5.6.6	Routers.....	396
	Summary.....	397
	Key Terms	397
	Review Questions.....	398
	True or False.....	398
	Multiple Choice Questions.....	398
	Short Answer Questions.....	400

Lab 1: Solving the Travelling Salesman Problem (TSP) with Optimal and Shortest Routing Algorithm	403
Lab 2: Compatibility issues between IPv6 and IPv4	407
Lab 3: Wired Network Convergence with Wireless Network	409
Index	411
